

NOMADS OF THE SEA

Whales and dolphins are the most diverse group of mammals on Earth. They live in every ocean and are found in all climates. Some whales, like the blue whale, are the largest animals ever known to have lived on Earth. Others, like the sperm whale, are the largest toothed mammals. Whales and dolphins are also highly intelligent and have complex social structures. They are known for their ability to communicate over long distances and for their playful behavior. Unfortunately, many whale species are endangered due to hunting and habitat loss. Conservation efforts are being made to protect these magnificent creatures.
