Dialectical Approaches to Studying Personal Relationships Barbara M. Montgomery, Leslie A. Baxter, 2013-09-13 This book describes many different and useful ways of understanding personal relationships from a dialectical perspective It is written for scholars in higher education both faculty and students across many fields within the social sciences and the humanities who seek answers to questions about how people relate to one another The book is valuable for all scholars who pursue new ideas because it models a form of scholarly communication in which multiple voices can be acknowledged as valid the worth of one perspective is not measured by the denigration of another and difference is celebrated as conducive to learning rather than threatening to it The contributors emphasize the characteristics of their dialectical view that set them apart from other dialectical authors and describe their methods of studying relationships from a dialectical perspective Following the Bakhtinian perspective they honor the values of dialogism by respecting different and sometimes contradictory views assuming that these views can be valid and joining in a discussion with the editors and other contributors about their emerging work They also acknowledge that the chapters in this text are part of an ongoing process to frame and reframe emerging ideas and allow the dialogue that occurs within this frame the freedom to express creative unique ideas

Deeper Learning with Psychedelics David J. Blacker,2024-06-01 In both clinical and informal settings psychedelics users often report they have undergone something profound and even life altering Yet there persists a confounding inability to articulate just what has been imparted Informed by multidisciplinary emerging research this book provides an account of the specifically educational aspects of psychedelics and how they can render us ready to learn Drawing from indigenous peoples worldwide who typically revere these substances as plant teachers and from canonical thinkers in the western tradition such as Plato Spinoza Kant and Heidegger the author proposes an original set of categories through which to understand the educational capabilities of entheogens psychedelics with visionary qualities It emerges that entheogens real power lies not in destabilizing and decentering turning on and dropping out but as powerful aids in restoring and reenchancing our shared worlds
