between business theories on the one hand and the realities of the workplace and uncertainties of the marketplace on the other. In place of reasoned management and disciplined organization, John Harte depicts daily disorder, vagueness and confusion instead of the logical processes of classroom case histories with rational solutions. He provides tales of an abundance of irrational judgments, personal foibles and business follies. Once a top operational manager with multinational organizations, Harte applies his hands-on knowledge of the business world to a realistic examination of workplace conditions. He describes methodically how to handle human limitations in the average business enterprise as well as how to develop management strengths. The author observed superior and inferior management firsthand and therefore witnessed the painful demise of many companies, some of which in his opinion could have been saved. With thirty years' experience to draw on, he analyzes why so many businesses and products fail while others succeed. He examines the amazing progress of Japan and other Pacific Asian countries, explains the decline of German, Canadian, British and French management practices and provides strategies for the marketplace. The business sectors described in this all-encompassing book include high technology, fast-moving packaged consumer goods like detergents, manufacturing and retailing consumer durables like furniture and appliances, soft goods, fashion products, service sector industries, manufacturing, wholesaling and retail trade and a whole range of new service industries. Harte stresses that while management and trade in the West has declined, the challenge is how to manage change by innovating and replacing senile customs, systems and institutions with more progressive ones suited to the new business environment.
