Rubian Icons 14th 16th Centuries:

Mary of Mercy in Medieval and Renaissance Italian Art Katherine T. Brown, 2017-07-05 Mater Misericordiae Mother of Mercy emerged as one of the most prolific subjects in central Italian art from the late thirteenth through the sixteenth centuries. With iconographic origins in Marian cult relics brought from Palestine to Constantinople in the fifth century, the amalgam of attributes coalesced in Armenian Cilicia, then morphed as it spread to Cyprus. An early concept of Mary of Mercy, the Virgin standing with outstretched arms and a wide mantle under which kneel or stand devotees, entered the Italian peninsula at the ports of Bari and Venice during the Crusades, eventually converging in central Italy. The mendicant orders adopted the image as an easily recognizable symbol for mercy and aided in its diffusion. In this study, the author's primary goals are to explore the iconographic origins of the Madonna della Misericordia as a devotional image by identifying and analyzing key attributes to consider circumstances for its eventual overlapping function as a secular symbol used by lay confraternities and to discuss its diaspora throughout the Italian peninsula, Western Europe, and eastward into Russia and Ukraine. With over 100 illustrations, the book presents an array of works of art as examples, including altarpieces, frescoes, oil paintings, manuscript illuminations, metallurgy, glazed terracotta, stained glass, architectural relief, sculpture, and processional banners.

Painting the Soul Robin Cormack, 2013-06-01 Painting the Soul is a beautifully illustrated study of the creation and development of the icon. This book is a firework display. It sets off scores of explosions which light up the sky over arching our field terrain that is normally traversed nose down and too mindful of the footsteps of our predecessors. Burlington Magazine

The Art of Anatomy in Medieval Europe Taylor McCall, 2023-07-31 A new history of the medieval illustrations that birthed modern anatomy. This book is the first history of medieval European anatomical images. Richly illustrated. The Art of Anatomy in Medieval Europe explores the many ways in which medieval surgeons, doctors, monks, and artists understood and depicted human anatomy. Taylor McCall refutes the common misconception that Renaissance artists and anatomists such as Leonardo da Vinci and Andreas Vesalius were the fathers of anatomy who performed the first human dissections. On the contrary, she argues that these Renaissance figures drew upon centuries of visual and written tradition in their works.

Byzantium Metropolitan Museum of Art (New York, N.Y.), 2004 The fall of the Byzantine capital of Constantinople to the Latin West in 1204 during the Fourth Crusade abruptly interrupted nearly nine hundred years of artistic and cultural traditions. In 1261, however, the Byzantine general Michael VIII Palaiologos triumphantly re-entered Constantinople and reclaimed the seat of the empire, initiating a resurgence of art and culture that would continue for nearly three hundred years, not only in the waning empire itself but also among rival Eastern Christian nations eager to assume its legacy. Byzantium: Faith and Power, 1261-1557 and the groundbreaking exhibition that it accompanies explore the artistic and cultural flowering of the last centuries of the Empire of the Romans and its enduring heritage.
