**Standards and Public Policy** Shane Greenstein, Victor Stango, 2006-12-21 Technological standards are a cornerstone of the modern information economy affecting firm strategy market performance and by extension economic growth While there is general agreement that swift movement to superior technological standards is a worthwhile goal there is much less agreement on the central policy questions do markets choose efficient standards How do standards organizations affect the development of standards And finally what constitutes appropriate public policy toward standards In this volume leading researchers in public policy on standards including both academics and industry experts focus on these key questions Given the dearth of applied work on standards and public policy this volume significantly advances the frontier of knowledge in this critical but understudied area It will be essential reading for academic and industrial researchers as well as policymakers

**All Politics Is Global** Daniel W. Drezner, 2008-08-18 Has globalization diluted the power of national governments to regulate their own economies Are international governmental and nongovernmental organizations weakening the hold of nation states on global regulatory agendas Many observers think so But in All Politics Is Global Daniel Drezner argues that this view is wrong Despite globalization states especially the great powers still dominate international regulatory regimes and the regulatory goals of states are driven by their domestic interests As Drezner shows state size still matters The great powers the United States and the European Union remain the key players in writing global regulations and their power is due to the size of their internal economic markets If they agree there will be effective global governance If they don't agree governance will be fragmented or ineffective And paradoxically the most powerful sources of great power preferences are the least globalized elements of their economies Testing this revisionist model of global regulatory governance on an unusually wide variety of cases including the Internet finance genetically modified organisms and intellectual property rights Drezner shows why there is such disparity in the strength of international regulations
