The Stigmatization of Conspiracy Theory since the 1950s Katharina Thalmann, 2019-03-06 Are conspiracy theories everywhere and is everyone a conspiracy theorist This ground breaking study challenges some of the widely shared assessments in the scholarship about a perceived mainstreaming of conspiracy theory It claims that conspiracy theory underwent a significant shift in status in the mid 20th century and has since then become highly visible as an object of concern in public debates Providing an in depth analysis of academic and media discourses Katharina Thalmann is the first scholar to systematically trace the history and process of the delegitimization of conspiracy theory By reading a wide range of conspiracist accounts about three central events in American history from the 1950s to 1970s the Great Red Scare the Kennedy assassination and the Watergate scandal Thalmann shows that a veritable conspiracist subculture emerged in the 1970s as conspiracy theories were pushed out of the legitimate marketplace of ideas and conspiracy theory became a commodity not unlike pornography alluring in its illegitimacy commonsensical and highly profitable This will be of interest to scholars and researchers interested in American history culture and subcultures as well of course to those fascinated by conspiracies

How Ottawa Spends, 2009-2010 Maslove Allan, 2009-10-01 This is the thirtieth volume in the series How Ottawa Spends It is arguable that never in these years have Canadians faced such serious economic upheaval and political dysfunction as the current climate The dramatic and seemingly sudden changes in the economy occurred simultaneously with a political drama one that was largely disassociated from the real and pressing economic challenge Early Harper budgets delivered lower taxes for all Canadians partly through highly targeted but politically noticeable small tax breaks on textbooks for students tools for apprentices in skilled trades and public transit costs The needs of the beleaguered average Canadian and the swing voter in the swing constituencies of an already strategized next election were a key part of Conservative agenda setting In the 2007 budget alone there were twenty nine separate tax reductions and federal spending was projected to increase by 10 billion including a 5 7 percent increase in program spending A small surplus of 3 3 billion was planned almost all of which would go to debt reduction As Harper savoured his 14 October 2008 re election with a strengthened minority government although without his desired majority he and his minister of Finance already knew that his surpluses were likely gone in the face of the crashing financial sector and a looming recession Future deficits were firmly back on the agenda Contributors include Malcolm G Bird Carleton University Chris Brown Carleton University G Bruce Doern Carleton University and University of Exeter Melissa Haussman Carleton University Robert Hilton Carleton University Ruth Hubbard University of Ottawa Edward T Jackson Carleton University Kirsten Kozolanka Carleton University Evert Lindquist University of Victoria Allan M Maslove Carleton University Peter Nares Social

Hearns-Branaman,2024-06-21 This volume examines the global media coverage of the armed conflict in Ukraine focusing on the marginalization of dissident perspectives in the West and the information quality and diversity on social media Along with presenting original empirical studies on how mainstream media in countries as diverse as Israel the Czech Republic Ghana and the Netherlands have covered the conflict between NATO and Russia since 2022 this book sheds light on the role of the state and the media in policing the boundaries of permissible thought on the conflict in the West as well as in Russia and Ukraine It also delves into the war s representation on prominent social media platforms Written by a diverse group of international researchers this multifaceted volume offers new perspectives and insights on the reporting of the ongoing conflict It will interest scholars of international communication and media foreign policy and international politics war and conflict content analysis and journalism     *Decentralized Autonomous Organizations* Sven Van Kerckhoven,Usman W.

Chohan,2024-04-30 Decentralized Autonomous Organizations DAOs constitute a comparatively novel area in academic research and scholarship but the budding interest in this category of digital and algorithmic organization across various disciplines provides an indication of the possibilities that DAOs wield in terms of informing and advancing our understanding of the potentialities of the digital economy s forthcoming iterations It also points towards practical use cases to solve problems that the increasing decentralization and amorphization of the structures of the digital economy portend At the same time DAOs are afflicted by various strands of skepticism that are attributable to their vulnerabilities subjacent hype ultimate purpose and usefulness This skepticism also requires scholarly attention and careful study through multidisciplinary perspectives as further research may come to either dispel or confirm the array of concerns that continue to loom large about DAOs as technological governance societal and economic instruments in the future With all this in mind the aim of this book is to offer multiple studied perspectives that explore DAOs from a variety of perspectives across several disciplinary prisms It does not seek simply to weigh the balance of DAO s merits and demerits but rather to conceive appreciate and discover various elements of ultimate import to DAOs over their future evolutionary course Drawing upon the insights of interdisciplinary subject matter experts this book allows for a holistic enquiry into the role potential and limitations of DAOs The book will thus be of interest to a multidisciplinary audience of scholars in organizational studies computer science economics sociology of technology philosophy law and the governance of innovation     Terrorists' Target Selection C.

Drake,1998-08-26 The author examines the factors which influence terrorists target selection In particular he looks at the influence of the ideologies strategies and tactics of terrorist groups and describes how these are restricted by the terrorists resources by protective and anti terrorist measures by the society within which the terrorists operate and by the nature of

the terrorists and their supporters He concludes that terrorists target selection is often both explicable and logical *The*
