

Theory and Method in the Comparative Study of Values

Critique and Alternative to Inglehart

Marc Haller

This paper critically reviews Ronald Inglehart's recent comparative work on value change in modern societies. It is argued that Inglehart's central thesis – value change seen primarily as a consequence of technological development and economic growth, leading to the spread of secular-rational and self-expression values – is materialist, unilinear, and comparative-static. The example of religious secularization is used to show an alternative comparative approach which takes into consideration institutional characteristics of states and societies. Two aspects of Inglehart's methodology are investigated: his measurement of 'traditional vs. secular-rational' and 'survival vs. self-expression values' and his treatment of units and levels of measurement. It is shown that his scales are heterogeneous collections of items, that his classification of the countries into 'cultural zones' is not very consistent, and that he is unaware of the distinction between the macro and micro levels of analysis. Comparative data on national identity and pride are used to show the importance of this distinction. Three general requirements of comparative research are outlined in the concluding section.

Introduction

Ronald Inglehart's theory of value change in modern societies has become one of the most influential approaches in present-day sociology and political science, both among scholars specializing in this topic and in general textbooks and intellectual discussions. His strengths are: continuous work on the same theme for three decades; a coherent and seemingly powerful theoretical concept; an empirical database which is unique in its size and comprehensiveness, and interesting, new empirical results. The findings prove the significance of culture and values in general, and of religion in particular, as continuing important elements of modern societies (see Inglehart, 1977, 1990, 1997; Inglehart, Nevitte and Basanez, 1996; Inglehart and Baker, 2000).

Yet, I aim to show in this paper that Inglehart's work contains significant weaknesses, including doubtful theoretical assumptions, poorly defined concepts and scales, and problematic methodological procedures. This discussion is focused on two of Inglehart's most recent works (Inglehart,

1997; Inglehart and Baker, 2000).¹ I will discuss this work in three steps:

- his general theory of value change and its relation to economic and social change;
- his concepts and scales of different 'values'; and
- methodological aspects of his classification of countries and level of analysis.

This critique is guided by an alternative approach which focuses on:

- a distinction between universal values and the concrete value orientations of people;
- the situational and institutional embedding of values; and
- a consideration of the different levels of analysis.

I will exemplify this alternative approach by presenting a different conceptualization of the relationship between societal contexts and religious values, and by showing the relevance of the distinction between the micro and macro levels of analysis for the case of national identity and pride.

Chirawu, 2012 *Understanding Policy Domains their Salient Forces and Organisational Challenges* examines the complexity of policy making processes within the context of human action arising from culture life necessities and politics It provides an understanding of human environmental and institutional behaviour and identifies the policy factors that underline the success or failure of governments and institutions This book provides policy makers practitioners and other researchers in the field with a clear understanding of the process of policy making and who is responsible for what It sets the tone for academics and policy practitioners to confront the problems and challenges that countries face as they seek to improve governance and service delivery The author provokes debate on the cause and effect of past present and future human actions bringing into play the issues of honesty transparency and political will He promotes policy as a way towards achieving social harmony in the human struggle for survival User friendly for both students and lecturers as well as for researchers government and NGO policy gurus *Understanding Policy Domains their Salient Forces and Organisational Challenges* is also valuable for political parties whose members are often unaware of this important aspect of government responsibility

Origins, Foundations, Sustainability and Trip Lines of Good Governance: Archaeological and Historical Considerations Gary M. Feinman, Richard Edward Blanton, Stephen A. Kowalewski, Lane Fargher Navarro, 2022-10-05 Until recently scholarly consensus across the social sciences and history adhered to the view that the incorporation of citizen voice in governance e.g. democracy was an entirely Western phenomenon that mostly is a product of the emergence of rational thought and the modern world These views are now empirically questioned and subject to serious reconsideration Yet even researchers who recognize a broader temporal span for democratic or good governance draw fundamental distinctions between these political forms in the past and present Building on the collective action theories in particular those focused on fiscal financing the editors of this Research Topic outline fundamental characteristics internal financing equitable taxation checks on power and a functioning bureaucracy at the core of good governance which are neither the sole project of the contemporary West nor tied to any specific ideological construct or form of leadership Even elections can no longer be conceived as assurance of good governance At this time of global challenges to democracy understanding the comparative history of good governments their core institutions how they worked their foundations what led to their downfalls and the factors that prompted their sustenance or their collapses are extremely important to document The historical trends and coactive processes that underpinned those human cooperative arrangements which fostered growth
