## Scare Tactics:

**Scare Tactics** Douglas Walton, 2013-06-29 *Scare Tactics* the first book on the subject provides a theory of the structure of reasoning used in fear and threat appeal argumentation Such arguments come under the heading of the argumentum ad baculum the argument to the stick club traditionally treated as a fallacy in the logic textbooks The new dialectical theory is based on case studies of many interesting examples of the use of these arguments in advertising public relations politics international negotiations and everyday argumentation on all kinds of subjects Many of these arguments are amusing once you see the clever tactic used others are scary Some of the arguments appear to be quite reasonable while others are highly suspicious or even outrageously fraudulent In addition to the examples taken from logic textbooks other cases treated come from a variety of sources including political debates legal arguments and arguments from media sources like magazine articles and television ads The purpose of this book is to explain how such arguments work as devices of persuasion and to develop a method for analyzing and evaluating their reasonable and fallacious uses in particular cases The book shows how such arguments share a common structure revealing several distinctive forms of argument nested within each other Based on its account of this cognitive structure the new dialectical theory presents methods for identifying analyzing and evaluating these arguments as they are used in specific cases The book is a scholarly contribution to argumentation theory It is written in an accessible style and uses many colorful and provocative examples of fear and threat appeal arguments that are suitable for classroom discussions The matters treated will be of interest to professionals and students in law critical thinking advertising speech communication informal logic cognitive science rhetoric and media studies     *Scare Tactics* Michael P. Colaresi, 2005-12-29 Why do international situations spiral out of control and into war Why do conflicts finally wind down after years if not decades of tension Various faults in conventional thinking ranging from relying on indeterminate predictions to ignoring the interaction between domestic and international events have impeded adequate explanations for the continuation escalation and dampening of rivalry conflict In *Scare Tactics The Politics of International Rivalry* Michael P. Colaresi explains how domestic institutions and interactions among nations converge to create incentives for either war or peace Specifically domestic pressure to continue a rivalry and resist capitulating to the enemy can be exacerbated in situations where elites benefit from fear mongering a process Colaresi refers to as rivalry outbidding When rivalry outbidding becomes fused with pressure to change the status quo even a risky escalation may be preferable to cooperation or rivalry maintenance The eventual outcomes of such dynamic two level pressures if unchecked are increased conflict destruction and death Colaresi contends however that if leaders can resist pressures to escalate threats and step up rivalries a deteriorating status quo can instead spur cooperation and peace     *Scare Tactics* John Russo, 1992 The insider's guide to making your first horror movie covering the art craft and trade secrets of writing producing and directing chillers and thrillers Filled with valuable tips and featuring interviews with some of today's hottest filmmakers including Wes Craven Clive Barker John
