Stokes, 2024-10-18 Western science teaches that our beings are governed by the laws of physics and our minds play no part There are however flaws in this thinking most prominently unexplained paranormal phenomena that defy explanation by modern theories of physics Collected by parapsychologists these data include extrasensory perception ESP poltergeist occurrences and psychokinesis Much of the current data in parapsychology and their implications for understanding the true nature of the self are examined here Beginning with a consideration of several instances of spontaneous psi the book examines the theoretical explanations of paranormal phenomena It covers the hypothesis and evidence that minds contain the so called hidden variables that determine the outcomes of the quantum process thus interweaving parapsychology with modern physics The reader is also forced to consider in detail the relationship between the conscious mind and the physical brain and the evidence that minds survive the death of bodies Непорочная пустота. Hess, 1993 In Science in the New Age David Hess explores ideologies of the paranormal in the United States He offers a map of the labyrinth of views put forward by

parapsychologists and skeptical debunkers spirit channelers and crystal healers Hollywood poltergeist scripts and prophets of the New Age Adopting a cultural perspective Hess moves beyond the question of who is right or wrong to the cultural politics of how each group constructs its own boundaries of true and false knowledge Hess begins by looking at each group's unique version of knowledge science and religion and at its story about the other groups Comparing the various discourses texts writers and groups as cultures he shows how skeptics parapsychologists and New Agers may disagree vehemently with each other but end up sharing many rhetorical strategies metaphors models values and cultural categories Furthermore he argues their shared paraculture has a great deal in common with the larger culture of the United States The dialogue on the paranormal Hess concludes has as much to do with gender power and cultural values as it does with spirits extrasensory perception and crystal healing

dialogue with both literary and posthumanist analysis Kafka's Zoopoetics critically revisits animality interspecies relations and the very human animal contradistinction in the writings of Franz Kafka Kafka's animals typically stand at the threshold between humanity and animality fusing together human and nonhuman features Among his liminal creatures we find a human transformed into vermin in *The Metamorphosis* an ape turned into a human being in *A Report to an Academy* talking jackals in *Jackals and Arabs* a philosophical dog in *Researches of a Dog* a contemplative mole like creature in *The Burrow* and indiscernible beings in *Josefine the Singer or the Mouse People* Depicting species boundaries as mutable and obscure Kafka creates a fluid human animal space which can be described as humanimal The constitution of a humanimal space radically undermines the stark barrier between human and other animals dictated by the anthropocentric paradigm Through denying animalistic elements in humans and disavowing the agency of nonhuman animals excluding them from social life and neutralizing compassion for them this barrier has been designed to regularize both humanity and animality The contextualization of Kafka's animals within posthumanist theory engenders a post anthropocentric arena which is simultaneously both imagined and very real
