Education for Wicked Problems and the Reconciliation of Opposites Raoul J. Adam, 2016-02-26 The recognition and reconciliation of opposites lies at the heart of our most personal and global problems

and is arguably one of the most neglected developmental tasks of Western education. Such problems are wicked in the sense that they involve real life decisions that have to be made in rapidly changing contexts involving irreducible tensions and paradoxes. By exploring our human tendency to bifurcate the universe, *Education for Wicked Problems: the Reconciliation of Opposites* proposes a way to recognise and re-solve some of our most wicked problems. Applying an original theory of bi-relational development to wicked problems, Adam proposes that our everyday ways of knowing and being can be powerfully located and understood in terms of the creation/emergence/opposition/convergence/collapse and transposition of dyadic constituents such as nature/culture/conservative/liberal and spirit/matter. He uses this approach to frame key debates in and across domains of knowledge and to offer new perspectives on three of the most profound and related problems of the twenty-first century: globalisation, sustainability and secularisation. This book is a comprehensive study of dyads and dyadic relationships and provides a multidisciplinary and original approach to human development in the face of wicked problems. It will be of great interest to students and academics in education and psychosocial development as well as professionals across a range of fields looking for new ways to recognise and re-solve the wicked problems that characterise their professions.
