Blood Memory Dayton Duncan, Ken Burns, 2023-10-10 The epic story of the buffalo in America from prehistoric times to today a moving and beautifully illustrated work of natural history inspired by the PBS series *American Buffalo* The American buffalo our nation's official mammal is an improbable shaggy beast that has found itself at the center of many of our most mythic and sometimes heartbreaking tales The largest land animals in the Western Hemisphere they are survivors of a mass extinction that erased ancient species that were even larger For nearly 10 000 years they evolved alongside Native people who weaved them into every aspect of daily life relied on them for food clothing and shelter and revered them as equals Newcomers to the continent found the buffalo fascinating at first but in time they came to consider them a hindrance to a young nation's expansion And in the space of only a decade they were slaughtered by the millions for their hides with their carcasses left to rot on the prairies Then teetering on the brink of disappearing from the face of the earth they would be rescued by a motley collection of Americans each of them driven by different and sometimes competing impulses This is the rich and complicated story of a young republic's heedless rush to conquer a continent but also of the dawn of the conservation era a story of America at its very best and worst

Outback and Out West examines the ecological consequences of a settler colonial imaginary by comparing expressions of settler colonialism in the literature of the American West and Australian Outback Tom Lynch traces exogenous domination in both regions which resulted in many similar means of settlement including pastoralism homestead acts afforestation efforts and bioregional efforts at belonging Lynch pairs the two nations' texts to show how an analysis at the intersection of ecocriticism and settler colonialism requires a new canon that is responsive to the social cultural and ecological difficulties created by settlement in the West and Outback Outback and Out West draws out the regional Anthropocene dimensions of settler colonialism considering such pressing environmental problems as habitat loss groundwater depletion and mass extinctions Lynch studies the implications of our settlement heritage on history art and the environment through the cross national comparison of spaces He asserts that bringing an ecocritical awareness to settler colonial theory is essential for reconciliation with dispossessed Indigenous populations as well as reparations for ecological damages as we work to decolonize engagement with and literature about these places *River Reflections* Verne Huser,2005 Three hundred and
