Suppressed Terror Bettina Greiner, 2014-04-24 At the end of World War II the Soviet secret police installed ten special camps in the Soviet occupation zone later to become the German Democratic Republic Between 1945 and 1950 roughly 154 000 Germans were held incommunicado in these camps Whether those accused of being Nazis spies or terrorists were indeed guilty as charged they were indiscriminately imprisoned as security threats and denied due process of the law One third of the captives did not survive To this day most Germans have no knowledge of this postwar Stalinist persecution even though it exemplifies in a unique way the entangled history of Germans as perpetrators and victims How can one write the history of victims in a society of perpetrators This is only one of the questions Displaced Terror History and Perception of Soviet Special Camps in Germany raises in exploring issues in memory culture in contemporary Germany The study begins with a detailed description of the camp system against the backdrop of Stalinist security policies in a territory undergoing a transition from war zone to occupation zone to Cold War hot spot The interpretation of the camps as an instrument of pacification rather than of denazification does not ignore the fact that while actual perpetrators were a minority the majority of the special camp inmates had at least been supporters of Nazi rule and were now imprisoned under life threatening conditions together with victims and opponents of the defeated regime Based on their detention memoirs the second part of the book offers a closer look at life and death in the camps focusing on the prisoners self organization and the frictions within these coerced communities The memoirs also play an important role in the third and last part of the study Read as attempts to establish public acknowledgment of violence suffered by Germans they mirror German memory culture since the end of World War II

Embodiments of Power Gary B. Cohen, Franz A. J. Szabo, 2008 The period of the baroque late sixteenth to mid eighteenth centuries saw extensive reconfiguration of European cities and their public spaces Yet this transformation cannot be limited merely to signifying a style of art architecture and decor Rather the dynamism emotionality and potential for grandeur that were inherent in the baroque style developed in close interaction with the need and desire of post Reformation Europeans to find visual expression for the new political confessional and societal realities Highly illustrated this volume examines these complex interrelationships among architecture and art power religion and society

from a wide range of viewpoints and localities From Krakow to Madrid and from Naples to Dresden cities were reconfigured visually as well as politically and socially Power in both its political and architectural guises had to be negotiated among constituents ranging from monarchs and high churchmen to ordinary citizens Within this process both rulers and ruled were transformed Europe left behind the last vestiges of the medieval and arrived on the threshold of the modern

The Holy Roman Empire, Reconsidered Jason Philip Coy,Benjamin Marschke,David Warren Sabeen,2010-10-01 The Holy Roman Empire has often been anachronistically assumed to have been defunct long before it was actually dissolved at the beginning of the nineteenth century The authors of this volume reconsider the significance of the Empire in the sixteenth seventeenth and eighteenth centuries Their research reveals the continual importance of the Empire as a stage and audience for symbolic performance and communication as a well utilized problem solving and conflict resolving supra governmental institution and as an imagined political religious and cultural world for contemporaries This volume by leading scholars offers a dramatic reappraisal of politics religion and culture and also represents a major revision of the history of the Holy Roman Empire in the early modern period

Nazi Buildings, Cold War Traces and Governmentality in Post-Unification Berlin Clare Copley,2020-05-28 Bringing together approaches from cultural and urban history as well as German studies and political

theory Clare Copley's probing study reflects on post unification responses to iconic Nazi architecture to reveal insights into power legitimacy and memory politics in the Berlin Republic Analysing public debates physical interventions into the buildings and the structuring of the memory landscapes around them the book demonstrates that the politics of memory impact not just upon the built environment of the post dictatorship city but upon the way decisions about it are made In doing so Nazi Buildings Cold War Traces and Governmentality in Post Unification Berlin makes the case for conceiving of a specifically post authoritarian governmentality and uses the responses to constructions like Goering's Aviation Ministry Tempelhof Airport and the Olympic complex to explore its features

Identities and Politics During the Putin Presidency Philipp Casula, Jeronim Perovic, 2009-11-01 How could an undemocratic regime manage to stabilise Russia What is Putin's success formula What are the symbolic and discursive underpinnings of Russia's new stability Many outside observers of Russia regarded the authoritarian tendencies during the Putin presidency as a retreat from or even the end of democratization Rather than attempting to explain why Russia did not follow the trajectory of democratic transformation this book aims to attain an understanding of the stabilization process during Putin's tenure as president Proceeding from the assumption that the stability created under Putin is multi layered the authors attempt to uncover the underpinnings of the new equilibrium inquiring especially about the changes and fixations that occurred in the discourses on political and national identity In doing so the authors analyse the trajectories of the past years from the traditional perspective of transitology as well as through the lens of post structuralist discourse theory The two approaches are seen as complementary with the latter focusing less on the end point of transition than on the nature of the mechanisms that stabilize the current regime The book focuses on how nationalism became an increasingly important tool in political discourse and how it affected political identity Sovereign democracy is seen by many contributors as the most explicit manifestation of a newfound post Soviet identity drawing on nationalist ideas while simultaneously appeasing most sectors of the Russian political spectrum

The Life, Works, and Witness of Tsehay Tolessa and Gudina Tumsa, the Ethiopian Bonhoeffer Samuel Yonas Deressa, Sarah Hinlicky Wilson, 2017-06-15 This book opens a window into the lives and extraordinary witness of a Christian couple whose faithful life of service has earned the moniker of Ethiopia's Bonhoeffer In Part One the reader encounters the extant writings of Gudina Tumsa Gudina's ideas were by no means silenced by his murder If anything quite the opposite as is so often the case with martyrs Part Two is a highly personal account of Gudina and Tsehay's life witness and sufferings Aud Saeveras a Norwegian missionary working with her husband in Ethiopia got to know Tsehay during her many years in prison often bringing her food After Tsehay was finally released Saeveras encouraged her to report the truth about what had happened The result was this memoir first written in Norwegian then translated into German and now for the first time in English Saeveras frames the story but most of the words are Tsehay's This collection concludes with an essay by Samuel Yonas Deressa on the impact that Gudina's vision has had on the EECMY and the formation of the Gudina Tumsa Foundation with its various scholarly and

development activities Gudina lives on in the many Ethiopian Christians who continue to be inspired by his life and witness

Transloyalties, Connected Histories and World Christianity during the Period of Decolonization and the Cold War Frieder Ludwig, Ellen Veä Rosnes, Joar Haga, Marina Xiaojing Wang, Jairzinho Lopes Pereira, 2025-06-30 Focusing on the history of World Christianity this book relates the concept of transloyalties to developments during the Period of Decolonization and the Cold War This was a time when the terms loyal and loyalty became more frequently used not only in the United States where a loyalty program was introduced but also in Africa Asia and Europe Churches and ecumenical organizations had to navigate in this context of new loyalty demands They had to clarify whether changes in church state relations and corresponding changes in their organizational structures were necessary or whether they affected core identities Was the restriction or exclusion of Western missionaries a threat to the universal character of the church or a transition to self governing churches How did African and Asian churches relate to Western mission societies in the new context Was the strive for justice a basis for cooperation with socialist governments or were the concepts fundamentally different How were denominations organized at a national level Which forms of church government were chosen Which denominations could become members of Christian Councils that represented joint interests toward the states These are some of the questions that underlie the importance of this volume to the study of the history of World Christianity

Parties, Opposition and Society in West Germany (RLE: German Politics) Eva Kolinsky, 2018-10-24 In this volume originally published in 1984 the author examines the social composition of the electorate of membership and leadership of West German political parties as well as their representation and finances Kolinsky argues that while affiliation and electorates remained distinct the social composition of party organisations became narrower and more uniform The book examines how the parties became alienated from contemporary West German society and discusses the difficulties experienced by opposition parties in trying to develop alternative strategies in particular those of the Green Party

The World of Yesterday's Humanist Today Marion Sonnenfeld, 1984-06-30 Fifty years ago Stefan Zweig who committed suicide in 1942 was the most widely read and translated living writer in the world Zweig's Vienna was a world of bright brittle superficialities in which the bourgeoisie gradually elevated the eternal business of seeing and being seen to the purpose of the existence To break through the facades of this society Zweig developed a remarkable literary and psychological method In The World of Yesterday's Humanist Today thirty scholars of history literature and music share their studies of Zweig and their insight into his works

Modernizing Europe's Imperial Monarchies Heidi Hein-Kircher, Frederik Frank Sterkenburgh, 2025-05-28 Up until recently Europe's three imperial monarchies the German Austrian and Russian Empires were seen as moribund political entities unable to accommodate the forces of political social economic and cultural modernization and as a result collapsed collectively during or shortly after the First World War More recently scholars have underlined the viability of these polities including as frameworks for democratic experiments and fixed points for supra national identification notwithstanding the suppression of minorities and colonial undertakings of these empires This book takes a different approach it demonstrates that these three imperial monarchies were capable of and willing to initiate and steer the modernization of their institutions and polities Rather than understanding modernization as a linear and teleological process this contributed volume draws instead on Samuel Eisenstadt's notion of multiple modernities to demonstrate how these empires sought to modernize on their own terms By drawing on this concept it becomes possible to challenge notions of inevitable decline and instead demonstrate how these imperial monarchies sought to forge modernization on their own terms in the nineteenth and early twentieth century

How the World Hunger Problem Was not Solved Christian Gerlach, 2024-02-14 The world food crisis 1972-1975 gave rise to new development concepts To eradicate world hunger small peasants were supposed to use modern inputs like high yielding seeds fertilizer pesticides and irrigation This would turn subsistence producers into business owners transform rural areas invigorate national economies and the crisis stricken world economy and thus stabilize capitalism Together with an in depth account of the world food crisis this book analyses how this global scheme largely failed It shows its diverse initiators their reasoning and motives its political breakthrough the degrees to which it was implemented globally and nationally in the following decades and its socioeconomic effects in rural areas Despite internationally coordinated policies and coercive means the scheme failed on all

levels situation analysis design policies incapable institutions including big business implementation and peasants responses Selective realization in certain regions and for certain crops and the appropriation of funds by local elites often aggravated inequality and hunger Case studies are about Bangladesh Indonesia Tanzania and Mali The book shows limits to global social engineering imperialism and state control It is aimed at students scholars activists and non specialists interested in development and the world food problem The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Goering's Man in Paris Jonathan Petropoulos, 2021-01-01 A charged biography of a notorious Nazi art plunderer and his career in the postwar art world Petropoulos brings Lohse into sharper focus as a personality and axis point from which to explore a network of art dealers collectors and museum curators connected to Nazi looting What emerges from Petropoulos's research is a portrait of a charismatic and nefarious figure who tainted everyone he touched Nina Siegal New York Times Readers of art history and WWII biographies will appreciate this engrossing deep dive into one of the world's most prolific art looters Publishers Weekly Bruno Lohse 1911-2007 was one of the most notorious art plunderers in history Appointed by Hermann Göring to Hitler's art looting agency in Paris he went on to help supervise the systematic theft and distribution of more than thirty thousand artworks taken largely from French Jews and to assist Göring in amassing an enormous private art collection By the 1950s Lohse was officially denazified but was back in the art dealing world offering masterpieces of dubious origin to American museums After his death dozens of paintings by Renoir Monet and Pissarro among others were found in his Zurich bank vault and adorning the walls of his Munich home Jonathan Petropoulos spent nearly a decade interviewing Lohse and continues to serve as an expert witness for Holocaust restitution cases Here he tells the story of Lohse's life offering a critical examination of the postwar art world

Gendered Practices of Rulership at the Court of Württemberg, 1568-1634 Regine Maritz, 2025-08-14 Gender history has alerted us to the fact that it is misleading to assume transhistorical features when it comes to issues such as childbearing mother and fatherhood and gendered systems of labour division Instead all of these are culturally inflected and thus variable across time *Gendered Practices of Rulership at the Court of Württemberg 1568-1634* explores the ways in which socially constructed differences between men and women supported the dynastic practice of power in the early modern duchy of Württemberg The book investigates three generations of the Württemberg ducal family from the late sixteenth to the first half of the seventeenth century In five chapters five gendered practices are examined They include the gendering of courtly space of high ceremonial events and of dynastic marriage and concubinage as well as the gendering of kinship practices The history of the Württemberg dynasty in this period allows for the observation of a range of approaches to the practice of power It is documented by rich archival sources many of which are analysed here for the first time and thus provides opportunities for comparison between different ruling couples Duke Friedrich I rarely saw eye to eye with his wife Duchess Sibylla von Anhalt r. 1593-1608 and he engaged in numerous

extramarital affairs even seeking to institutionalise concubinage This couple s son Duke Johann Friedrich enjoyed a much more harmonious relationship with his wife Duchess Barbara Sophia von Brandenburg r 1608 1628 with the couple amicably sharing many tasks of rulership The book however does not merely seek to show how individual men women and couples engaged in dynastic rulership through gendered relationships Instead it also seeks to identify the types of gendered work the dynastic system relied on in order to remain functional over a long period of time To do so examples of failed relationships are at least as useful as those of marriages built on common understanding As a result of this methodological shift aspects of life at court emerge that have previously escaped in depth discussion for instance the emotionally cohesive effects of gendered court topography as well as the crucial emotion work dynastic women were expected to perform in their marital relationships and which had wide reaching political consequences
