The Culture and Commerce of Publishing in the 21st Century Albert N. Greco, Clara E. Rodriguez, Robert M. Wharton, 2007 This is the definitive social and economic analysis of the current state and future trends of the American book publishing industry with an emphasis on the trade college textbook and scholarly publishing sectors Drawing on a rich and extensive data the thoughtful analysis presented in this book will be valuable to leaders in publishing as well as the scholars and analysts who study this industry

The Handbook of Art and Design Librarianship Amanda Gluibizzi, Paul Glassman, 2010 While much attention has been paid to art librarianship as it exists in museum settings comparatively less notice has been taken of academic and art and design school art librarianship as a distinct focus However the skills of subject specialists in the arts and their advocacy on behalf of their users are fundamental elements in vital art libraries that fully support and anticipate the needs of artists designers architects and the historians who study these disciplines Put together by an international team of contributors this

essential handbook examines methods of innovative librarianship in academic and art school libraries throughout the world. With a focus on the intersection of best practice and best opportunities the book brings together the philosophies and realities of the most creative librarians working in the field of art librarianship today and serves as a field guide to academic art libraries in the twenty first century. Key discussions include the role of liaison to the visual arts, visual literacy for highly literate viewers, art history pedagogy and special collections, technology in an art and design library, collection management, renewal and de accession, new forms of scholarly communication and their impact on art librarianship, the making of the 21st century art library. Readership: This timely book is essential reading for all information professionals working in art and design environments. It will also be of interest to students of librarianship interested in the challenges currently facing professionals working in this specialized area.

Scholarly Communications John J. Regazzi, 2015-02-12. **Scholarly Communications: A History from Content as King to Content as Kingmaker** traces the development of scholarly communications from the creation of the first scientific journal through the wide diversity of professional information services today. Unlike any other book, this work is an authoritative history by the past President of Elsevier and current Professor at Long Island University, which examines the changing nature of scholarly communication throughout its history, including its research importance as well as its business value. It specifically covers four key themes: the value of scholarly content and information at various stages of its development and use; the role that technology has played on the use, importance and value of scholarly information and research communications; the changing business models affecting the system of scholarly communication from the way it is produced to how it is distributed and consumed; and some of the implications of mobile, cloud and social computing technologies on the future of scholarly communications. Attention is paid to analyzing the structural changes that the professional publishing community now faces. Regazzi examines research content as an economic good, how technology and business models have greatly affected the value of scholarly publishing and the drivers of the future sustainability of our system of scholarly communication.

Empowering People: Collaboration between Finnish and Namibian University Libraries, 2012. **The Academic Research Library in A Decade of Change** Reg Carr, 2007-01-31. This book starts from the premise that the last decade has brought more changes for the academic research library than any ever previously known. The book provides an authoritative overview and analysis of the issues and challenges affecting academic research libraries from the closing years of the 20th century onwards. While the focus on this period of white water change is primarily British, with a number of case studies based on the transformative initiatives of the UK's Joint Information Systems Committee (JISC) and its seminal Electronic Libraries Programme (eLib), as well as on the Bodleian Libraries' far reaching responses to the complex demands of the digital age, the issues themselves are presented in their global context, with implications drawn for research libraries everywhere. Written by one of the world's leading academic research librarians, it provides a comprehensive overview of the factors at work in an exceptionally

significant and fast moving decade of research library development Contains personal insights into many of the key library and information initiatives of recent years **Serials Collection Management in Recessionary Times** Karen

Lawson,2015-04-08 Strategic planning collaboration continual stewardship best practices and re engineering can provide librarians with a toolkit of innovative strategies that meets the worst of economic times with bold persistent experimentation This book covers the implications for libraries of a broad range of technological and economic challenges These challenges include the fallout from the global economic crisis the positioning of usage statistics the advent of open access scholarship database management responding to budgetary constrictions and general access to serials Taken as a whole this collection provides practitioners in the library sector and in higher education with a wide variety of insights on the strengths weaknesses threats and opportunities involved with serials collection management in recessionary times written by academic librarians vendors publishers fundraisers and higher education professionals This book was published as a special issue of

The Serials Librarian **Journal of Scholarly Publishing** ,2007-10 *Foundations of Library and Information Science, Fourth Edition* Richard E. Rubin,2017-11-22 *Health Sciences Collection Management for the Twenty-First Century* Susan

K. Kendall,2018-01-15 Selected as a 2025 Doody's Core Title Health Sciences Collection Management for the Twenty First Century is intended for those with any level of experience in health sciences collection management This book from the authoritative Medical Library Association starts with the context of health sciences publishing and covers the foundations of selection budgeting and management It won't tell new librarians what to buy but will give them background and criteria that should go into their selections However the focus of this book is not only on best practices but also on the big picture and the deeper changes in the field that affect decision making Subjects not always covered in many collection development textbooks such marketing or accessibility are included because they are part of the larger collections landscape Chapter contributors bring their own perspectives to the topics Stories of different libraries experiences bring interesting topics to the forefront in practical specific and timely detail While whole books have been written that go into some of these topics more in depth on their own the treatment of each topic here focuses on the unique perspective and concerns of the collection manager

Technical Services in the 21st Century Samantha Schmehl Hines,2021-01-08 By showcasing the work of technical services and the ground breaking changes they have encountered this edited collection provides readers with an opportunity to re assess the opportunities and challenges for library administration and to understand how libraries should be managed in the future Fool's Gold Mark Y. Herring,2015-01-09 This work skeptically explores the notion that the

internet will soon obviate any need for traditional print based academic libraries It makes a case for the library's staying power in the face of technological advancements television microfilm and CD ROM's were all once predicted as the

contemporary library's heir apparent and devotes individual chapters to the pitfalls and prevarications of popular search engines e books and the mass digitization of traditional print material

Centers and Peripheries in Knowledge Production

Leandro Rodriguez Medina,2013-10-01 This book examines the circulation of knowledge within globalization focusing on the differences between centers and peripheries of knowledge production in the social sciences It explores not only how knowledge is appropriated in peripheral fields but also how foreign ideas shape those fields and the trajectories of scholars and uses actor network theory to explain circulation of knowledge as an extension of socio technical networks that transcend borders

Equity and Excellence in American Higher Education William G. Bowen,Martin A. Kurzweil,Eugene M. Tobin,Susanne C. Pichler,200? Thomas Jefferson once stated that the foremost goal of American education must be to nurture the natural aristocracy of talent and virtue Although in many ways American higher education has fulfilled Jefferson s vision by achieving a widespread level of excellence it has not achieved the objective of equity implicit in Jefferson s statement In *Equity and Excellence in American Higher Education* William G Bowen Martin A Kurzweil and Eugene M Tobin explore the cause for this divide Employing historical research examination of the most recent social science and public policy scholarship international comparisons and detailed empirical analysis of rich new data the authors study the intersection between excellence and equity objectives Beginning with a time line tracing efforts to achieve equity and excellence in higher education from the American Revolution to the early Cold War years this narrative reveals the halting episodic progress in broadening access across the dividing lines of gender race religion ethnicity and socioeconomic status The authors argue that despite our rhetoric of inclusiveness a significant number of youth from poor families do not share equal access to America s elite colleges and universities While America has achieved the highest level of educational attainment of any country it runs the risk of losing this position unless it can markedly improve the precollegiate preparation of students from racial minorities and lower income families After identifying the equity problem at the national level and studying nineteen selective colleges and universities the authors propose a set of potential actions to be taken at federal

state local and institutional levels With recommendations ranging from reform of the admissions process to restructuring of federal financial aid and state support of public universities to addressing the various precollegiate obstacles that disadvantaged students face at home and in school the authors urge all selective colleges and universities to continue race sensitive admissions policies while urging the most selective and privileged institutions to enroll more well qualified students from families with low socioeconomic status
