Identity and the Second Generation Faith G. Nibbs, Caroline B. Brettell, 2021-04-30 Most recently Americans have become familiar with the term second generation as it is applied to children of immigrants who now find themselves citizens of a nation built on the notion of assimilation This common worldwide experience is the topic of study in *Identity and the Second Generation* These children test and explore the definition of citizenship and their cultural identity through the outlets provided by the Internet social media and local community support groups All these factors complicate the ideas of boundaries and borders of citizenship and even of home Indeed the second generation is a global community and endeavors to make itself a home regardless of state or citizenship This book explores the social worlds of the children of immigrants Based on rich ethnographic research the contributors illustrate how these young people the so called second generation construct and negotiate their lives Ultimately the driving question is profoundly important on a universal level How do these young people construct an identity and a sense of belonging for themselves and how do they deal with processes of inclusion and exclusion

[Second-Generation Fiscal Rules](#) Luc Eyraud, Mr. Xavier Debrun, Andrew Hodge, Victor Duarte Lledo, Ms. Catherine A Pattillo, 2018-04-13 Fiscal rule frameworks have evolved significantly in response to the global financial crisis Many countries have reformed their fiscal rules or introduced new ones with a view to enhancing the credibility of fiscal policy and providing a medium term anchor Enforcement and monitoring mechanisms have also been upgraded However these innovations have made the systems of rules more complicated to operate while compliance has not improved The SDN takes stock of past experiences reviews recent reforms and presents new research on the effectiveness of rules It also proposes guiding principles for future reforms to strike a better balance between simplicity flexibility and enforceability Read the blog

Second-Generation Memory and Contemporary Children's Literature Anastasia Ulanowicz, 2013-09-02 Winner of the Children's Literature Association Book Award This book visits a range of textual forms including diary novel and picturebook to explore the relationship between second generation memory and contemporary children's literature Ulanowicz argues that second generation memory informed by intimate family relationships textual mediation and technology is characterized by vicarious rather than direct experience of the past As such children's literature is particularly well suited to the representation of second generation memory insofar as children's fiction is particularly invested in the transmission and reproduction of cultural memory and its form promotes the formation of various complex intergenerational relationships Further children's books that depict second generation memory have the potential to challenge conventional Western notions of selfhood and ethics This study shows how novels such as Lois Lowry's *The Giver* 1993 and Judy Blume's *Starring Sally J Freedman as Herself* 1977 both of which feature protagonists who adapt their elders' memories into their own mnemonic repertoires implicitly reject Cartesian notions of the unified subject in favor of a view of identity as always already social relational and dynamic in character This book not only questions how and why second

generation memory is represented in books for young people but whether such representations of memory might be considered radical or conservative Together these analyses address a topic that has not been explored fully within the fields of children's literature, trauma and memory studies and Holocaust studies *The Position of the Turkish and Moroccan Second Generation in Amsterdam and Rotterdam* Maurice Crul, Liesbeth Heering, 2008 Annotation The Dutch second generation of Turkish and Moroccan origin is coming of age and making a transition from education to the labour market This first publication of the TIES Project Towards the Integration of the European Second Generation studies the social situation and views of this ethnic group drawing on the research carried out in Amsterdam and Rotterdam in 2006/07 among the Dutch born children of immigrants from Turkey and Morocco and a comparison group of young people age 18-35 whose parents were born in the Netherlands This title can be previewed in Google Books <http://books.google.com/books/vid/ISBN9789089640611> This title is available in the OAPEN Library <http://www.oapen.org>

Hispanics and the Future of America National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Population, Panel on Hispanics in the United States, 2006-02-23 Hispanics and the Future of America presents details of the complex story of a population that varies in many dimensions including national origin immigration status and generation The papers in this volume draw on a wide variety of data sources to describe the contours of this population from the perspectives of history demography geography education family employment economic well being health and political engagement They provide a rich source of information for researchers policy makers and others who want to better understand the fast growing and diverse population that we call Hispanic The current period is a critical one for getting a better understanding of how Hispanics are being shaped by the U S experience This will in turn affect the United States and the contours of the Hispanic future remain uncertain The uncertainties include such issues as whether Hispanics especially immigrants improve their educational attainment and fluency in English and thereby improve their economic position whether growing numbers of foreign born Hispanics become citizens and achieve empowerment at the ballot box and through elected office whether impending health problems are successfully averted and whether Hispanics geographic dispersal accelerates their spatial and social integration The papers in this volume provide invaluable information to explore these issues
