Second Of Creole:

Creoles, their Substrates, and Language Typology Claire Lefebvre, 2011-02-17 Since creole languages draw their properties from both their substrate and superstrate sources the typological classification of creoles has long been a major issue for creolists typologists and linguists in general Several contradictory proposals have been put forward in the literature For example creole languages typologically pair with their superstrate languages Chaudenson 2003 with their substrate languages Lefebvre 1998 or even creole languages are alike Bickerton 1984 such that they constitute a definable typological class McWhorter 1998 This book contains 25 chapters bearing on detailed comparisons of some 30 creoles and their substrate languages As the substrate languages of these creoles are typologically different the detailed investigation of substrate features in the creoles leads to a particular answer to the question of how creoles should be classified typologically The bulk of the data show that creoles reproduce the typological features of their substrate languages This argues that creoles cannot be claimed to constitute a definable typological class *The Handbook of Pidgin and Creole Studies* Silvia Kouwenberg, John Victor Singler, 2009-02-11 Featuring an international contributor list this long awaited and broad ranging collection examines the key issues topics and research in pidgin and creole studies A comprehensive reference work exploring the treatment of core aspects of pidgins creoles focusing on the questions that animate creole studies Brings together newly commissioned entries by an international contributor team Accessibly structured into four sections covering the character of pidgins and creoles the relation of pidgins creoles to other language phenomena and other languages issues in pidgin creole genesis and the role of pidgins creoles in society Provides a valuable resource for students scholars and researchers working across a number linguistic disciplines including sociolinguistics historical linguistics and the anthropology of language *L2 Acquisition and Creole Genesis* Claire Lefebvre, Lydia White, Christine Jourdan, 2006-01-01 In this volume second language L2 acquisition researchers and creolists engage in a dialogue focusing on processes at work in L2 acquisition and creole genesis The volume opens with an overview of the relationship between L2 acquisition and pidgins creoles Siegel The first group of papers addresses current language contact at a societal or an individual level Smith Terrill and Dunn Bruhn de Garavito and Atoche Liceras et al Muller The second section focuses on processes characterizing various stages of L2 acquisition and creole genesis relexification and transfer from the L1 and their role in the initial state Sprouse Schwartz Kouwenberg Aboh Ionin Chapters in the third section discuss processes involved in developing grammars namely reanalysis and restructuring Sanchez Brousseau and Nikiema Steele and Brousseau The final section concentrates on fossilization and the end state Cornips and Hulk Montrul Lardiere Between them the chapters cover lexical morphological phonological semantic and syntactic properties of interlanguage grammars and creole grammars Pidgins and Creoles Jacques Arends, Pieter Muysken, Norval Smith, 1994-12-20 This introduction to the linguistic study of pidgin and creole languages is clearly designed as an introductory course book It does not demand a high level of previous linguistic

knowledge Part I General Aspects and Part II Theories of Genesis constitute the core for presentation and discussion in the classroom while Part III Sketches of Individual Languages such as Eskimo Pidgin Haitian Saramaccan Shaba Swahili Fa d Ambu Papiamentu Sranan Berbice Dutch and Part IV Grammatical Features such as TMA particles and auxiliaries noun phrases reflexives serial verbs fronting can form the basis for further exploration A concluding chapter draws together the different strands of argumentation and the annotated list provides the background information on several hundred pidgins creoles and mixed languages Diversity rather than unity is taken to be the central theme and for the first time in an introduction to pidgins and creoles the Atlantic creoles receive the attention they deserve Pidgins are not treated as necessarily an intermediate step on the way to creoles but as linguistic entities in their own right with their own characteristics In addition to pidgins mixed languages are treated in a separate chapter Research on pidgin and creole languages during the past decade has yielded an abundance of uncovered material and new insights This introduction written jointly by the creolists of the University of Amsterdam could not have been written without recourse to this new material

The Atlas of Pidgin and Creole Language Structures Susanne Maria Michaelis,Philippe Maurer,Martin Haspelmath,Magnus Huber,2013-09-05 The Atlas presents commentaries and colour maps showing how 130 linguistic features phonological syntactic morphological and lexical are distributed among the world s pidgins and creoles Designed and written by the world s leading experts it is a unique resource of outstanding value for linguists of all persuasions throughout the world

Roots of Creole Structures Susanne Michaelis,2008-10-29 This book reflects an ongoing shift in the study of contact languages After a period of history free universalism it directs the attention to the individual historical circumstances under which the pidgin and creole languages arose The contributions deal with different areas of language structure including phonology morphology and syntax providing a wealth of structural and sociohistorical data that any comprehensive theory of contact languages will have to account for Each of the papers provides a thorough description of a structural phenomenon against the background of the sociohistorical contact situation The languages covered in the book are Guin Bissau Creole Haitian Creole Hawai i Creole Indo Portuguese creoles Jamaican Creole Lingua Franca North American French Mauritian Creole Santomense Saramaccan Seychelles Creole Sranan Surinamese Maroon creoles Vincentian Creole and Zamboangue o Chavacano

Issues in the Study of Pidgin and Creole Languages Claire Lefebvre,2004-02-26 The content of this book is concerned with various issues at stake in Creole studies that are also of interest for general linguistics These include the general issue of Creole genesis and of the accelerated linguistic change that characterizes the emergence of these languages as compared to ordinary cases of linguistic change the problem of the development of morphology in incipient Creoles the problem of the validity of data in linguistic analysis the issue of multifunctionality as regards the concept of lexical entry the question of whether Creole languages are semantically more transparent than languages not known as Creoles the issue of whether Creole languages constitute a typologically identifiable class and the problem of the

interaction between the processes involved in the emergence and development of Creole languages The purpose of this book is to present the major debates that are currently taking place in the field of Creole studies evaluate the arguments against data mainly drawn from Haitian Creole and address the issues at stake within the framework of new paradigms The various positions on each issue are summarized on the basis of a thorough review of the literature The Cambridge Handbook of Sociolinguistics Rajend Mesthrie, 2011-10-06 The most comprehensive overview available this Handbook is an essential guide to sociolinguistics today Reflecting the breadth of research in the field it surveys a range of topics and approaches in the study of language variation and use in society As well as linguistic perspectives the handbook includes insights from anthropology social psychology the study of discourse and power conversation analysis theories of style and styling language contact and applied sociolinguistics Language practices seem to have reached new levels since the communications revolution of the late twentieth century At the same time face to face communication is still the main force of language identity even if social and peer networks of the traditional face to face nature are facing stiff competition of the Facebook to Facebook sort The most authoritative guide to the state of the field this handbook shows that sociolinguistics provides us with the best tools for understanding our unfolding evolution as social beings **Pidgins, Creoles and Mixed Languages** Viveka Velupillai, 2015-04-15 This lucid and theory neutral introduction to the study of pidgins creoles and mixed languages covers both theoretical and empirical issues pertinent to the field of contact linguistics Part I presents the theoretical background with chapters devoted to the definition of terms the sociohistorical settings theories on the genesis of pidgins and creoles as well as discussions on language variation and the sociology of language Part II empirically tests assumptions made about the linguistic characteristics of pidgins and creoles by systematically comparing them with other natural languages in all linguistic domains This is the first introduction that consistently applies the findings of the Atlas of Pidgin and Creole Language Structures and systematically includes extended pidgins and mixed languages in the discussion of each linguistic feature The book is designed for students of courses with a focus on pidgins creoles and mixed languages as well as typologically oriented courses on contact linguistics *Imagining the Creole City* Rien Fertel, 2014-11-17 In the early years of the nineteenth century the burgeoning cultural pride of white Creoles in New Orleans intersected with America's golden age of print to explosive effect *Imagining the Creole City* reveals the profusion of literary output histories and novels poetry and plays that white Creoles used to imagine themselves as a unified community of writers and readers Rien Fertel argues that Charles Gayarr's English language histories of Louisiana which emphasized the state's dual connection to America and to France provided the foundation of a white Creole print culture predicated on Louisiana's exceptionalism The writings of authors like Grace King Adrien Rouquette and Alfred Mercier consciously fostered an image of Louisiana as a particular social space and of themselves as the true inheritors of its history and culture In turn the forging of this white Creole identity created a close knit community of cosmopolitan Creole elites who reviewed each other's books attended the same salons

crusaded against the popular fiction of George Washington Cable and worked together to preserve the French language in local and state governmental institutions Together they reimagined the definition of Creole and used it as a marker of status and power By the end of this group s era of cultural prominence Creole exceptionalism had become a cornerstone in the myth of Louisiana in general and of New Orleans in particular In defining themselves the authors in the white Creole print community also fashioned a literary identity that resonates even today

The Emergence of Creole Syllable Structure

Mareile Schramm,2014-12-12 This book presents an empirical study of syllable structure and phonotactic restructuring in six Caribbean creoles with Dutch English and French as main lexifier languages It is shown that although some structures are more commonly permitted than others there is considerable cross creole variation especially with respect to word final structures The findings provide support for recent SLA approaches to the emergence of creole phonology
