

The Second Waltz, Op. 99

(Jazz Suite No. 2)

Vivacissimo
♩ = 172

Dmitri Shostakovich
Arr: Raif Husicic

The first system of the musical score is written for piano. It consists of a treble and a bass staff. The key signature has two flats (B-flat and E-flat), and the time signature is 3/4. The first four measures of the treble staff contain whole rests. The bass staff begins with a piano (*p*) dynamic marking and plays a series of chords, each consisting of a quarter note and a pair of beamed eighth notes. A bar line occurs after the fourth measure. The final three measures of the system show the treble staff with a half note followed by a half note, and the bass staff continuing with the chordal accompaniment.

The second system of the musical score continues the piece. It begins with a measure number '9' above the treble staff. The treble staff features a melodic line of eighth and quarter notes. The bass staff continues with the chordal accompaniment from the first system, maintaining the same rhythmic pattern.

Orchestral "Pops" Music Lucy Manning, 2013-10-10 In this second edition of *Orchestral Pops Music: A Handbook* Lucy Manning brings forward to the present her remarkable compendium of information about this form of orchestral music. Since the appearance of the first edition in 2008, this work has proven critical to successful pops concert programming. With changes in publishers and agents, the discontinuation of the publication of certain original material, or worst of all, presses going out of business, music directors, orchestra conductors, and professional instrumentalists face formidable challenges in tracking down accurate information about this vast repertoire. This revised handbook alleviates the time-consuming task of researching these changes by offering a list of works for orchestral pops concerts that is comprehensive, informative, and current. Manning's emphasis on clarity and accuracy gives users an indispensable tool for gathering vital information on the style, instrumentation, and availability of the repertoire listed, as well as notes on its performance. The user-friendly appendices include expanded instrumentation choices, easy-to-find durations, and handy title cross-references. In addition to corrections and updates, this new edition of *Orchestral Pops Music* includes at least 1,000 new title listings. *Orchestral Pops Music: A Handbook* is the ideal tool for working conductors and orchestral librarians, as well as music program directors at colleges, conservatories, and orchestras.

Dmitri Shostakovich Catalogue Derek C. Hulme, 2010-02-18 This is an updated and expanded edition of the catalogue of Dmitri Shostakovich's music, a comprehensive listing of all his published and unpublished works from 1915 to 1975. More than 175 major works are described and annotated with details including dates of composition, durations, premieres, instrumentation, bibliographic information, and recordings.

Fundamentals of Music Processing Meinard Müller, 2021-04-09 The textbook provides both profound technological knowledge and a comprehensive treatment of essential topics in music processing and music information retrieval. Including numerous examples, figures, and exercises, this book is suited for students, lecturers, and researchers working in audio engineering, signal processing, computer science, digital humanities, and musicology. The book consists of eight chapters. The first two cover foundations of music representations and the Fourier transform concepts used throughout the book. Each of the subsequent chapters starts with a general description of a concrete music processing task and then discusses in a mathematically rigorous way essential techniques and algorithms applicable to a wide range of analysis.

classification and retrieval problems By mixing theory and practice the book's goal is to offer detailed technological insights and a deep understanding of music processing applications As a substantial extension the textbook's second edition introduces the FMP fundamentals of music processing notebooks which provide additional audio visual material and Python code examples that implement all computational approaches step by step Using Jupyter notebooks and open source web applications the FMP notebooks yield an interactive framework that allows students to experiment with their music examples explore the effect of parameter settings and understand the computed results by suitable visualizations and sonifications The FMP notebooks are available from the author's institutional web page at the International Audio Laboratories Erlangen

Information Retrieval for Music and Motion Meinard Müller, 2007-09-09 A general scenario that has attracted a lot of attention for multimedia information retrieval is based on the query by example paradigm retrieve all documents from a database containing parts or aspects similar to a given data fragment However multimedia objects even though they are similar from a structural or semantic viewpoint often reveal significant spatial or temporal differences This makes content based multimedia retrieval a challenging research field with many unsolved problems Meinard Müller details concepts and algorithms for robust and efficient information retrieval by means of two different types of multimedia data waveform based music data and human motion data In Part I he discusses in depth several approaches in music information retrieval in particular general strategies as well as efficient algorithms for music synchronization audio matching and audio structure analysis He also shows how the analysis results can be used in an advanced audio player to facilitate additional retrieval and browsing functionality In Part II he introduces a general and unified framework for motion analysis retrieval and classification highlighting the design of suitable features the notion of similarity used to compare data streams and data organization The detailed chapters at the beginning of each part give consideration to the interdisciplinary character of this field covering information science digital signal processing audio engineering musicology and computer graphics This first monograph specializing in music and motion retrieval appeals to a wide audience from students at the graduate level and lecturers to scientists working in the above mentioned fields in academia or industry Lecturers and students will benefit from the didactic style and each unit is suitable for stand alone use in specialized graduate courses Researchers will be interested in the detailed description of original research results and their application in real world browsing and retrieval scenarios
