*Secondhand Man* Erkut Demirel, Starting with my childhood and throughout my entire life Istanbul provided me with a rich and broad understanding of storytelling witnessed skyscrapers being raised to the skies around the glorious historical areas yet ironically I also watched those skyscrapers being surrounded by jerry built tenements I sadly watched the spectacular fabric of this city getting more and more polluted over time including its green hills also pillaged and destroyed its beautiful woodlands in a blink of an eye I don t believe any other populace in any other place has been as inattentive or negligent as Istanbul I wrote over hundred stories by using a plain natural and in straightforward narrative style Objectively to the best of my abilities I tried portraying the people of Istanbul who are neither urban nor are rustic folks but a mixture of both in their truest forms *Second hand smoke and COPD: lessons from animal studies* Adelheid Kratzer,Laima

Taraseviciene-Stewart,Michael Borchers,2015-05-07 Cigarette smoke exposure is the key initiator of chronic inflammation alveolar destruction and the loss of alveolar blood vessels that lead to the development of chronic obstructive pulmonary disease COPD which is comprised of emphysema and chronic bronchitis Exposure to secondhand smoke SHS is the major risk factor for non smokers to develop emphysema While the first hand smoke is directly inhaled by smokers passive smoking occurs when non smokers are involuntary exposed to environmental tobacco smoke also known as second hand smoke SHS SHS is a mixture of 2 forms of smoke that come from burning tobacco side stream smoke smoke that comes from the end of a lit cigarette pipe or cigar and mainstream smoke smoke that is exhaled by a smoker These two types of smoke have basically the same composition however in SHS many toxic components are more concentrated than in first hand smoke therefore more hazardous for people s health Several pathological events have been implicated in the development of SHS induced COPD but many aspects of this pathology remain poorly understood halting the development of new advanced treatments for this detrimental disease In this respect we have welcomed leading investigators in the field to share their research findings and provide their thoughts regarding the mechanisms of the SHS exposure induced immune responses and inflammatory mechanisms of lung destruction in SHS induced COPD and related comorbidities **Protection from Exposure to**
