Cooperation and Conflict between Europe and Russia Magdalena Dembińska, Frederic Mérand, 2021-08-26 When thinking about relations between Europe and Russia International Relations scholars focus on why conflict has replaced cooperation The geostrategic debate excludes the possible coexistence of cooperation and conflict Tracking the evolution of conflict and cooperation patterns in three zones of contact Estonia Kaliningrad and Moldova between 1991 and 2016 this edited volume argues that although the standard narrative remains compelling local patterns of cooperation and conflict are partly autonomous from the geostrategic level To account for the coexistence of cooperation and conflict the first chapter elaborates a theoretical proposition distinguishing fluid rigid and disputed symbolic boundaries which have different impacts on the ground The subsequent chapters address distinct dimensions of Euro Russian relations paying attention to local reality in Estonia Moldova Ukraine or Kaliningrad different sectors from energy to peoples movement and across institutional contexts such as the EU and NATO They confirm that the standard narrative holds in most cases but also that Euro Russian relations vary in crucial ways according to the interests and representations of actors immersed in specific geopolitical fields Despite a deterioration of geostrategic relations between Europe and Russia since the end of the Soviet Union Cooperation and Conflict between Europe and Russia explores the intriguing coexistence of conflict and cooperation at the local level and across sectors and institutions The chapters in this book were originally published as a special issue of the journal East European Politics

International Cooperation When Mistrust Deepens Perri 6, Eva Heims, 2025-01-16 In the years leading up to the outbreak of war in 1914 Britain was collaborating closely with Germany on the development of an improved telegraph service despite preparations for war also being made by both countries This cooperation rested upon both states intensive participation in the global regulatory regime for telecommunications Why states commit to cooperating in such multilateral regimes with other states while their relationship struggles with deepening mistrust is a longstanding puzzle As

tensions rise among great powers today and international organisations struggle again this puzzle is as important now as it was when international regulatory regimes first emerged The book challenges many of the conventional explanations for this puzzling situation and draws on neo Durkheimian institutional theory to develop a novel explanation It examines the case of Britain s relationship with the first global regulatory regime which was concerned with international telegraphy submarine telegraph cables and radiotelegraphy from the 1860s through to 1914 The regime was created in a time of European wars and growing imperial conflicts Although Britain seriously contemplated leaving the International Telegraph Union in 1901 2 the state went on to deepen cooperation with other countries in telegraphy including with Germany even as preparations for war advanced Drawing on extensive archival sources Perri 6 and Eva Heims show that social organisation in government can cultivate institutional buffering between aspects of external policy which can sustain commitment despite deepening conflict In doing so they show how a neo Durkheimian approach provides a powerful explanation for deepening cooperation even as mistrust rises which has significant implications for understanding state formation

Games of Conflict and Cooperation in Asia Motoshi Suzuki,Akira Okada,2017-02-07 This edited volume is an outcome of the first major collaborative project between Japanese economists and political scientists funded by the Japan Society for the Promotion of Science The authors of the individual chapters show that Asian states play games of conflict and cooperation strategically by creating changing or destroying institutions For them conflict and cooperation are inseparable phenomena and are integral parts of states strategic interactions under constraints Through the establishment of appropriate institutions that coordinate states actions present conflict can be turned into stable cooperation in the future No discernible difference exists in the extent of rationality between the East and the West but substantial variations between regions or even within a region are found in institutions that are influenced by history and culture Historical and cultural variations divide contemporary Asia making regional institutional cooperation difficult and prompting some Asian states to use global or inter regional arrangements in order to obtain benefits of cooperation Qualifications are provided for this line of argument in the first chapter which also discusses the affinity of international relations theory and game theory with special attention to Japan and Asia The following ten substantive chapters are developed based on the conceptual framework and for integrity and coherence are sub grouped into four parts that correspond to major issues in international relations scholarship 1 conflict management 2 arms control 3 trade and 4 currency

Cross-Border Cooperation as Conflict Transformation Maria-Adriana Deiana,Milena Komarova,Cathal McCall,2022-02-27 Has European integration helped to build peace in Europe and its neighbourhood The book addresses this question through theoretically and empirically informed case studies that explore the successes of and the challenges to EU cross border cooperation as a tool for conflict transformation Conceptually the contributors link the question of transforming conflict to changing understandings of borders and bordering Empirically the contributions represent case studies of practices and discourses of EU sponsored cross border cooperation and challenges to it The case

studies encompass the multiple geographical perspectives of the EU internal boundaries its sometimes disputed external borders and borders involving third countries From a thematic point of view the collection focuses on the intersection of two levels at which bordering processes unfold and are enacted the level of governance devolution and international intervention and that of grass roots or civil society efforts including cultural cooperation and artistic production The collection thus offers a kaleidoscopic view of border politics and conflict that zooms in and out of the EU frontiers and their geopolitics of peacebuilding security and cooperation The chapters in this book were originally published as a special issue of the journal *Geopolitics*

Culture and Cooperation in Europe's Borderland ,2016-08-29 Scholarly interest in the study of state borders and border regions is growing in Europe keeping pace with the remarkable changes associated with the transformation of old borders and the creation of new ones in the European Union and beyond over the last fifteen years Social scientists have increasingly examined cross border co operation as one way to understand the changes which affect European borderlands Ironically given the recent turn to issues of culture and identity in the social

sciences one of the most neglected aspects of the critical and comparative analysis of cross border co operation has been culture Culture and Cooperation in Europe s Borderlands the first collection of essays to provide multidisciplinary perspectives on these issues in European borderlands presents three modes of analysis of culture and cross border co operation as a tentative way forward to redress this imbalance These overlapping perspectives on cultures of co operation co operation about culture and the impact of culture on forms of co operation are offered as possible strategies in the comparative social science of European borderlands The contributions to this collection examine some or all of the following cross border cooperation about culture in such areas of culture as tradition language use and rights and education cross border cooperation and culture i e in ways in which culture enhances or hinders economic and political co operation across state borders as for example through issues of national regional and local identity cultural practices and ethnic relations the culture of cooperation i e ways in which co operation across borders creates new cultural codes political practices organizational cultures and transnational social and political institutions

Global Cooperation and the Human Factor in International Relations Dirk Messner, Silke Weinlich, 2015-12-14 This book aims to pave the way for a new interdisciplinary approach to global cooperation research It does so by bringing in disciplines whose insights about human behaviour might provide a crucial yet hitherto neglected foundation for understanding how and under which conditions global cooperation can succeed As the first profoundly interdisciplinary book dealing with global cooperation it provides the state of the art on human cooperation in selected disciplines evolutionary anthropology and biology decision sciences social psychology complex system sciences written by leading experts The book argues that scholars in the field of global governance should know and could learn from what other disciplines tell us about the capabilities and limits of humans to cooperate This new knowledge will generate food for thought and cause creative disturbances allowing us a different interpretation of the obstacles to cooperation observed in world politics today It also offers first accounts of interdisciplinary global cooperation research for instance by exploring the possibilities and consequences of global we identities by describing the basic cooperation mechanism that are valid across disciplines or by bringing an evolutionary perspective to diplomacy This book will be of great interest to scholars and postgraduates in International Relations Global Governance and International Development The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution CC BY 4.0 license
