Secondary Cities Of Argentina The Social History Of Corrientes Salta And Mendoza 1850 191:

Secondary Cities of Argentina James Scobie, 1988-08-01 This study of three Argentine provincial capitals introduces a new concept in Latin American urban studies the historical role of secondary cities settlements large enough to possess all the elements commonly associated with urban areas and yet too small to figure among a country's major cities The principal contribution of the book is to explain how and why smaller cities grew What determined and shaped their growth How did local inhabitants and especially the dominant social elites react to internal and external influences To what extent were they able to control growth What relationships developed with the surrounding regions and the outside world The study shows that secondary cities linked rural economies and inhabitants with the outside world while insulating the traditional rural environment from the changing character of large urban centers In this intermediate position economic relationships and social structure changed slowly and only in response to outside innovations such as railroads Continuity within the secondary centers thus reinforced conservatism accentuated the gap between the major cities and the rest of the country and contributed to the resistance to change that characterizes much of Latin America today The book is illustrated with photographs and maps Yearbook ,1990 **A London Bibliography of the Social Sciences** ,1931 Vols 1-4 include material to June 1 1929 *Bibliographic Guide to Latin American Studies* Benson Latin American Collection,1981 **Arts & Humanities Citation Index** ,1990
