The Secret Life of Cosmetics Vicki Cobb,1985 Briefly discusses the history of cosmetics and gives instructions for experiments which show how and why cosmetics such as shampoo toothpaste soap and nail polish work **Literature for Science and Mathematics** DIANE Publishing Company,1998 Representing the perspectives of educators in both the science and mathematics communities this publication is intended to serve as a resource for teachers of students in kindergarten through grade 12 in choosing science and mathematics related literature for their schools and classrooms It contains over 1 000 annotated entries on the physical sciences earth sciences life sciences and mathematics Formatted for easy use each entry provides information on the author publisher and publication date type of literature subject emphasis suggested grade span and illustrations The Continuum Encyclopedia of Children's Literature Bernice E. Cullinan,Diane Goetz Person,2005-01-01 Provides articles covering children s literature from around the world as well as biographical and critical reviews of authors including Avi C S Lewis J K Rowling and Anno Mitsumasa **Science Fair Project Index, 1985-1989** Cynthia Bishop,Katherine Ertle,Karen Zeleznik,1992-06 Includes science projects and experiments found in 195 books published between 1985 and 1989 Almost all areas of science and many areas of technology are covered *The Complete Home Learning Sourcebook* Rebecca Rupp,1998 Lists all the resources needed to create a balanced curriculum for homeschooling from preschool to high school level Light Action! Vicki Cobb,Josh Cobb,2005 Allow the young people in your life to be the masters of light with optics the science of the future From the exciting experiments in this book they ll learn how to bend light around corners stop time with a pair of sunglasses pour light into their palms project a big screen image from a small TV fool a doorbell with a bike reflector plus dozens more experiments Once they get their heads and hands into optics their world will never look the same again *The Secret Life of Science* Jeremy J. Baumberg,2018-05-15 A revealing and provocative look at the current state of global science We take the advance of science as given But how does science really work Is it truly as healthy as we tend to think How does the system itself shape what scientists do The Secret Life of Science takes a clear eyed and provocative look at the current state of global science shedding light on a cutthroat and tightly tensioned enterprise that even scientists themselves often don t fully understand The Secret Life of Science is a dispatch from the front lines of modern science It paints a startling picture of a complex scientific ecosystem that has become the most competitive free market environment on the planet It reveals how big this ecosystem really is what motivates its participants and who reaps the rewards Are there too few scientists in the world or too many Are some fields expanding at the expense of others What science is shared or published and who determines what the public gets to hear about What is the future of science Answering these and other questions this controversial book explains why globalization is not necessarily good for science nor is the continued growth in the number of scientists It portrays a scientific community engaged in a race for limited resources that determines whether careers are lost or won whose research visions become the

mainstream and whose vested interests end up in control The Secret Life of Science explains why this hypercompetitive environment is stifling the diversity of research and the resiliency of science itself and why new ideas are needed to ensure that the scientific enterprise remains healthy and vibrant **Look Great, Live Green** Deborah Burnes,2009 Body care and eco consciousness need not be mutually exclusive according to Deborah Burnes In Part I of this timely book she explains the historical roots of the search for beauty and how it has led to a 60 billion cosmetics industry that misleads and confuses consumers on everything from product effectiveness to toxicity In Part II Burnes details options for buying natural and organic products in a range of budgets with each graded on a good better or best scale in terms of chemical content and overall health impact Part III discusses the positive effects chemical free products have on overall health and how those effects are expressed in the appearance of our skin Part IV contains a wealth of facts tips and shortcuts to help consumers experience living green and enhancing personal beauty Written in an engaging style but based in science Look Great Live Green offers a fresh perspective on living an eco friendly body friendly beauty friendly lifestyle *Something about the Author* Joyce Nakamura,1988 A collection of autobiographical essays written by prominent authors and illustrators of books for children and young adults **Something about the Author** ,1988 Library Media Connection ,1986
