**Vril: Secrets of the Black Sun** David Hatcher Childress, 2024-03-04. Childress reveals numerous secrets of the Black Sun in this final volume in his series about the Fourth Reich. David Childress, popular author and star of the History Channel show *Ancient Aliens*, unveils the amazing story of the German flying disks designed and built during WWII. It was not until 1989 that a German researcher named Ralf Ettl, living in London, received an anonymous packet of photographs and documents concerning the planning and development of at least three types of unusual craft, including the Vril, Haunebu, and Andromeda. Ettl went on to make several television documentaries based on the material in the packet and released most of the documents and photos to researchers in Austria and other parts of Europe. What the Ralf Ettl document dump shows us is what many have suspected for a long time: that WWII did not end in the manner in which we have been told, and a remnant of the Nazi military, particularly the SS, continued to operate aircraft and submarines around the world in the decades after the end of the war. This volume closes with how the SS operates today in Ukraine and how the Wagner second-in-command, Dmitry Utkin, killed in the fiery crash of Yevgeny Prigozhin's private jet between Moscow and St. Petersburg in August of 2023, had SS tattoos on his

shoulders and often signed his name with the SS runes Chapters include Secrets of the Black Sun The Extra Territorial Reich
