Hansen, 2008-09-30 Hirata Atsutane 1776 1843 has been the subject of numerous studies that focus on his importance to nationalist politics and Japanese intellectual and social history Although well known as an ideologue of Japanese National

Learning Kokugaku Atsutane's significance as a religious thinker has been largely overlooked. His prolific writings on supernatural subjects have never been thoroughly analyzed in English until now. In *When Tengu Talk*, Wilburn Hansen focuses on *Senkyo ibun* 1822, a voluminous work centering on Atsutane's interviews with a fourteen-year-old Edo street urchin named Kozo Torakichi, who claimed to be an apprentice tengu, a supernatural creature of Japanese folklore. Hansen uncovers in detail how Atsutane employed a deliberate method of ethnographic inquiry that worked to manipulate and stimulate Torakichi's surreal descriptions of everyday existence in a supernatural realm, what Atsutane termed the Other World. Hansen's investigation and analysis of the process begins with the hypothesis that Atsutane's project was an early attempt at ethnographic research, a new methodological approach in nineteenth-century Japan. Hansen posits that this scientific analysis was tainted by Atsutane's desire to establish a discourse on Japan not limited by what he considered to be the unsatisfactory results of established Japanese philological methods. A rough sketch of the milieu of 1820s Edo Japan and Atsutane's position within it provides the backdrop against which the drama of *Senkyo ibun* unfolds. There follow chapters explaining the relationship between the implied author and the outside narrator, the Other World that Atsutane helped Torakichi describe, and Atsutane's nativist discourse concerning Torakichi's fantastic claims of a newly discovered Shinto holy man called the sanjin. Sanjin were partly defined by supernatural abilities similar but ultimately more effective and thus superior to those of the Buddhist bodhisattva and the Daoist immortal. They were seen as holders of secret and powerful technologies previously thought to have come from or been perfected in the West, such as geography, astronomy, and military technology. Atsutane sought to deemphasize the impact of Western technology by claiming these powers had come from Japan's Other World. In doing so, he creates a new Shinto hero and, by association, asserts the superiority of native Japanese tradition. In the final portion of his book, Hansen addresses Atsutane's contribution to the construction of modern Japanese identity. By the late Tokugawa, many intellectuals had grown uncomfortable with continued cultural dependence on Neo-Confucianism, and the Buddhist establishment was under fire from positivist historiographers who had begun to question the many contradictions found in Buddhist texts. With these traditional discourses in disarray and Western rationalism and materialism gaining public acceptance, Hansen depicts Atsutane's creation of a new spiritual identity for the Japanese people as one creative response to the pressures of modernity. *When Tengu Talk* adds to the small body of work in English on National Learning. It moreover fills a void in the area of historical religious studies, which is dominated by studies of Buddhist monks and priests, by offering a glimpse of a Shinto religious figure. Finally, it counters the image of Atsutane as a forerunner of the ultra-nationalism that ultimately was deployed in the service of empire. Lucid and accessible, it will find an appreciative audience among scholars of Shinto and Japanese and world religion. In addition to religion specialists, it will be of considerable interest to anthropologists and historians of Japan.

recognized classes warrior farmer craftsman and merchant From the warriors perspective the merchants at the base of the social order had no virtue and existed only to skim profits as middlemen between producers and consumers But were these accusations correct Were the merchants really unethical beings who engaged in unfair business practices There is ample evidence that negates the ubiquitous slanders of the warrior class and suggests that merchants no less than the warriors possessed and acted in accordance with a well developed ethical code a spirit that may be called shonindo or The Way of the Merchant This book examines whether a comparison of shonindo depicting the ethical point of view of the merchant class and Bushido embodying that of the warrior class reveals that shonindo may have in fact surpassed Bushido in some aspects Comparing contemporarily published historical documents concerning both shonindo and Bushido as well as Inazo Nitobe s classic work Bushido The Soul of Japan published in 1900 the author examines how Bushido surpassed shonindo in that warriors were willing to die for their strict ethical code Shonindo however may have surpassed Bushido in that merchants were liberal willing to expand and extend application of their ethical beliefs into all aspects of everyday life for the overall benefit of society This ethical code is compared with that of the conservative Bushido which demonstrably proved not up to the task for the modernization and improved well being of Japan Ichiro Horide is professor emeritus of Reitaku University Edward Yagi Reitaku University and Stanley J Ziobro II Trident Technical College collaborated in the translation of the original Japanese manuscript into English
