think of creating a business online they think of creating a product selling the product and hope to make enough capital to finance their next product idea This kind of thinking is short term and doesn't lend itself well to a long term business venture When you stop and think about a longer term business model whether online off line or a mix of the two you really need to think about the bigger picture What's really needed is a method to capture leads convert those leads into smalltime customers and gradually build them towards customers that spend more with you in terms of three factors frequency monetary value and recency In terms of frequency I think it is self evident that we want them to spend more money with our business on a more regular basis In terms of monetary value we would like each transaction to be bigger and have them spend more per transaction When it comes down to recency ideally it would be better if they purchased last week rather than five years ago This makes them a fresher customer that's more likely to purchase again soon promoting the other two qualities I just mentioned There's also a fourth quality that's rarely discussed We don't necessarily care how they buy from us just that they do buy from us However some channels of distribution are significantly cheaper than others Ideally then media or the method you used to bring in the sale becomes increasingly important So how do you turn a single product to product mentality into a thriving long term business Well to begin with you need to have a viable business model And part of that business model absolutely must include the marketing funnel This is where it comes into play
