Settlement Of Disputes In Early Medieval Europe:

The Settlement of Disputes in Early Medieval Europe Wendy Davies, Paul Fouracre, 1992-04-23 This is a collection of original essays on the settlement of disputes in the early middle ages a subject of central importance for social and political history Case material from the evidence of charters is used to reveal the realities of the settlement process in the behaviour and interactions of people instead of the prescriptive and idealised models of law codes and edicts The book is not therefore a technical study of charters evidence The geographical range across Europe is unusually wide which allows comparison across differing societies Frankish material is inevitably prominent but the contributors have sought to integrate Celtic Greek Italian and Spanish material into the mainstream of the subject Above all the book aims to demystify the study of early medieval law and to present a radical reappraisal of established assumptions about law and society

Settlement of Disputes in Early Medieval Europe Alexander Joseph Ralston, Paul Fouracre (Supervisor.), University of Manchester. School of Arts, Histories, and Cultures, 2009

Conflict in Medieval Europe Warren C. Brown, Piotr Górecki, 2017-05-15 Conflict is defined here broadly and inclusively as an element of social life and social relations Its study encompasses the law not just disputes concerning property but wider issues of criminality coercion and violence status sex sexuality and gender as well as the phases and manifestations of conflict and the behaviors brought to bear on it It engages too with the nature of the transformation spanning the Carolingian period and its implications for the meanings of power violence and peace Conflict in Medieval Europe represents the American school of the study of medieval conflict and social order Framed by two substantial historiographical and conceptual surveys of the field it brings together two generations of scholars the pioneers who continue to expand the research agenda and younger colleagues who represent the best emerging work on this subject The book therefore both marks the trajectory of conflict studies in the United States and presents a set of original highly individual contributions across a shifting conceptual range indicative of a major transition in the field

A Companion to the Early Middle Ages Pauline Stafford, 2013-03-26 Drawing on 28 original essays A Companion to the Early Middle Ages takes an inclusive approach to the history of Britain and Ireland from c 500 to c 1100 to overcome artificial distinctions of modern national boundaries A collaborative history from leading scholars covering the key debates and issues Surveys the building blocks of political society and considers whether there were fundamental differences across Britain and Ireland Considers potential factors for change including the economy Christianisation and the Vikings

Italy and Early Medieval Europe Ross Balzaretti, Julia Barrow, Patricia Skinner, 2018-07-26 A comprehensive survey of recent work in Medieval Italian history and archaeology by an international cast of contributors arranged within a broader context of studies on other regions and major historical transitions in Europe c 400 to c 1400CE Each of the contributors reflect on the contribution made to the field by Chris Wickham whose own work spans studies based on close archival work to broad and ambitious statements on economic and social change in the transition from Roman to medieval Europe and the value of comparing this across time

and space *Re-Thinking Kinship and Feudalism in Early Medieval Europe* Stephen D. White,2023-07-07 This is the second collection of studies by Stephen D White to be published by Variorum the first being *Feuding and Peace Making in Eleventh Century France* The essays in this volume look principally at France and England from Merovingian and Anglo Saxon times up to the 12th century They analyze Latin and Old French discourses that medieval nobles used to construct their relationships with kin lords men and friends and investigate the political dimensions of such relationships with particular reference to patronage clientage the use of land as an item of exchange and feuding In so doing the essays call into question the conventional practice of studying kinship and feudalism as independent systems of legal institutions and propose new strategies for studying them *Law and Authority in the Early Middle Ages* Thomas Faulkner,2016-02-15 An examination of the barbarian laws in Carolingian Europe contributing to debates concerning written law kingship and ethnic identities

State and Society in the Early Middle Ages Matthew Innes,2000-04-24 This book first published in 2000 is a pioneering study of politics and society in the early Middle Ages Whereas it is widely believed that the source materials for early medieval Europe are too sparse to allow sustained study of the workings of social and political relationships on the ground this book focuses on a uniquely well documented area to investigate the basis of power Topics covered include the foundation of monasteries their relationship with the laity and their role as social centres the significance of urbanism the control of land the development of property rights and the organization of states community kinship and lordship justice and dispute settlement the uses of the written word violence and the feud and the development of political structures from the Roman empire to the high Middle Ages *Living with Disfigurement in Early Medieval Europe* Patricia Skinner,2016-12-21 This book is open access under a CC BY 4.0 license This book examines social and medical responses to the disfigured face in early medieval Europe arguing that the study of head and facial injuries can offer a new contribution to the history of early medieval medicine and culture as well as exploring the language of violence and social interactions Despite the prevalence of warfare and conflict in early medieval society and a veritable industry of medieval historians studying it there has in fact been very little attention paid to the subject of head wounds and facial damage in the course of war and or punitive justice The impact of acquired disfigurement for the individual and for her or his family and community is barely registered and only recently has there been any attempt to explore the question of how damaged tissue and bone might be treated medically or surgically In the wake of new work on disability and the emotions in the medieval period this study documents how acquired disfigurement is recorded across different geographical and chronological contexts in the period

Reframing Treaties in the Late Medieval and Early Modern West ,2025-08-02 The history of peacemaking has traditionally been reduced to isolated case studies and seen as the prelude to the presumed universal and modern international order Countering this one dimensional and Eurocentric narrative this multi authored volume reconceptualizes peace treaties as a range of successful and failed agreements settlements truces leagues and other forms of conflict resolution thus recovering their multilayered

history throughout the medieval and early modern period Rather than a series of great treaties peacemaking is reframed as a flexible phenomenon a political grammar whose complexity is reflected in its variety of forms and sources Drawing on both diplomatic history and international relations studies this volume traces the central role that peacemaking has played in the political history of the Western World
