Seventeenth-Century Italian Drawings in the Metropolitan Museum of Art Jacob Bean, 2012 **17th Century Italian Drawings in the Metropolitan Museum of Art** Metropolitan Museum of Art (New York, N.Y.), Jacob Bean, 1979

This volume describes and reproduces 379 drawings by Italian artists of the seventeenth century in The Metropolitan Museum of Art. The most brilliant draughtsmen of this period Annibale Carracci, G. B. Castiglione, Pietro da Cortona, Guercino, Carlo Maratti and Salvator Rosa are well represented in the Museum's collection and the book offers a survey of Italian baroque draughtsmanship. It includes innovative work by Carracci as well as drawings by such late baroque masters as Sebastiano Ricci and Francesco Solimena. Four hundred five illustrations are contained in this inventory. Entries for the drawings provide essential bibliographical references, provenance and a discussion of the purpose of the drawing when known. Inside jacket flap.

Perhaps more than any other collector of his generation in the United States, Robert Lehman was interested in acquiring early drawings. He made a great effort to add drawings to the collection of paintings, sculpture, ceramics, glass and other objects that his father Philip Lehman had begun assembling. The 116 Italian drawings analyzed and discussed in this volume are among the more than 2,000 works of art from the collection now housed in the Robert Lehman Wing of The Metropolitan Museum of Art. Robert Lehman's collection demonstrates the variety of drawings produced in Italy from the fifteenth to the seventeenth century, a period when the purposes and techniques of drawings as well as the aims and abilities of the artist who made them became increasingly sophisticated. The volume includes an elaborate design for an equestrian monument by Antonio Pollaiuolo, a magnificent study of a bear by Leonardo da Vinci, a cartoon by Luca Signorelli, a study for a vault fresco by Taddeo Zuccaro and many other drawings that are among the best Italian examples to have survived from that era. Most types of drawings in a wide variety of techniques are represented: figure studies, grand compositions, landscapes, cartoons, modelli and even sculptors' studies.

Early European art was a consuming interest of both Robert Lehman and his father Philip Lehman; an interest reflected in the remarkable number and quality of drawings they owned from the fifteenth and early sixteenth centuries. In addition to an important group of early German drawings, the collection includes a Saint Paul from a series associated with Jan van Eyck and the famous Scupstoele from the circle of Rogier van der Weyden, the only design for a decorative sculpture to survive from the fifteenth century. The great artists of the

seventeenth century Peter Paul Rubens Jacob Jordaens Claude Lorrain and Rembrandt among them are also represented Rembrandt by seven drawings including the large study of Leonardo's Last Supper that would stay in his mind all through his career Drawings by Antoine Watteau Jean Honor Fragonard Gabriel de Saint Aubin Thomas Gainsborough Paul Sandby and George Romney are among the many from eighteenth century France and England The volume discusses all 153 drawings at length placing each in its art historical setting and complementing the discussion with comparative illustrations of related works This e book on the MetPublications website is also accompanied by links to related works and under the Additional resourcestab are links to Met works of art and Heilbrunn Timeline of Art History essays and timelines viewed May 1 2014
