*Out of a Gray Fog* Claudia Franziska Bruhwiler, 2021-08-19 As to Europe keep it in a gray ominous evil fog Ayn Rand 1905-1982 thus commented on the role of Europe in her key novel *Atlas Shrugged* 1957 The same could be said of the way Europe features in her own biography and in the general perception of her persona Even though Rand was born in pre-revolutionary Russia she is nowadays considered an American phenomenon whose reach ends at the Atlantic shore This book lifts the gray fog cast over her relationship with Europe retracing the changing perception of the continent in both her fiction and thought Her apparent lack of success with European readers is often explained by allegedly different reading tastes However a look at her publication history and reception shows that many factors played a role why her work found fewer European than US readers Finally an archipelago of European readers and admirers emerges which is testament to Rand's impact on European art and politics

**Color Monitors** Martin Kevorkian, 2018-07-05 *Color Monitors* looks at a particular subset of imagined computer use focusing on scenarios that demand from the person at the keyboard an intimate technical knowledge My research has uncovered a peculiar pattern race comes into sharp relief when computer use is depicted as difficult labor requiring special expertise Time and again in such scenarios the helpful person of color is there to take the call to provide technical support to deal with the machines In interpreting such images *Color Monitors* analyzes the computer fearing strain in American whiteness an aspect of white identity that defines itself against information technology and the racial other imagined to love it and excel at it Martin Kevorkian Following up on Ralph Ellison's intimation

that blacks serve as the machines inside the machine Color Monitors examines the designation of black bodies as natural machines for the information age Martin Kevorkian shows how African Americans are consistently depicted as highly skilled intelligent and technologically savvy as they work to solve complex computer problems in popular movies corporate advertising and contemporary fiction But is this progress Or do such seemingly positive depictions have more disturbing implications Kevorkian provocatively asserts that whites historical fear of a black planet has in the age of microprocessing converged with a new fear of computers and the possibility that digital imperatives will engulf human creativity Analyzing escapist fantasies from Mission Impossible to Minority Report Kevorkian argues that the placement of a black man in front of a computer screen doubly reassures audiences he is nonthreatening safely occupied even imprisoned by the very machine he attempts to control an occupation that simultaneously frees the action heroes from any electronic headaches The study concludes with some alternatives to this scheme looking to a network of recent authors with shared affinities for Ellison and Pynchon willing to think inside the black box of technology Connecting race technology and American empire Color Monitors will attract attention from scholars working in emerging areas of race theory African American studies film studies cultural studies and technology and communication studies **The Pragmatist** ,1998 **World Authors, 2000-2005** Jennifer Curry,2007 Representing a broad range of ethnic diversity these in depth profiles present fascinating accounts of lives and careers the circumstances under which works were produced and their literary significance Each profile also includes critical evaluation a list of the author s principal works with date first published a list of major critical works and a portrait or photograph where available
