The Sexual Paradox Susan Pinker, 2010-01-11 After four decades of eradicating gender barriers at work and in public life why do men still dominate business politics and the most highly paid jobs Why do high achieving women opt out of successful careers Psychologist Susan Pinker explores the illuminating answers to these questions in her groundbreaking first book In *The Sexual Paradox* Susan Pinker takes a hard look at how fundamental sex differences continue to play out in the workplace By comparing the lives of fragile boys and promising girls Pinker turns several assumptions upside down that the sexes are biologically equivalent that smarts are all it takes to succeed that men and women have identical goals If most children with problems are boys then why do many of them as adults overcome early obstacles while rafts of competent even gifted women choose jobs that pay less or decide to opt out at pivotal moments in their careers Weaving interviews with men and women into the most recent discoveries in psychology neuroscience and economics Pinker walks the reader through these minefields Are men the more fragile sex Which sex is the happiest at work What does neuroscience tell us about ambition Why do some male school drop outs earn more than the bright motivated girls who sat beside them in third grade Pinker argues that men and women are not clones and that gender discrimination is just one part of the persistent gender gap A work world that is

satisfying to us all will recognize sex differences not ignore them or insist that we all be the same **Who's Afraid of Charles Darwin?** Griet Vandermassen, 2005-02-10 Why should feminism and the biological sciences be at odds And what might be gained from a reconciliation In *Who's Afraid of Charles Darwin* Vandermassen shows that rather than continuing this enmity feminism and the biological sciences and in particular evolutionary psychology have the need and the potential to become powerful allies Properly understood the Darwinian perspective proposed in this volume will become essential to tackling the major issues in feminism Sexual Difference Between Psychoanalysis and Vitalism Arun Saldanha, Hoon Song, 2015-03-24 Throughout the twentieth century psychoanalysis and feminism were the practico intellectual fields most systematic and subversive in demonstrating that humanity is sexually fissured More recently further advances in the philosophy of difference and renewed emphases on embodiment materiality and life offer possibilities for attending to dimensions of gender and sexuality that were previously underdeveloped This collection examines these possibilities insofar as they can either deepen or displace the traditional centrality of psychoanalysis in matters sexual The authors come from a wide range of backgrounds and defend their approaches to the problem of sexual difference in a variety of idioms drawing on key thinkers such as Lacan Irigaray Deleuze Foucault and Badiou It is rare to come across these thinkers together but sex is too crucial a site for critical thought not to mobilize every conceptual power available This book was originally published as a special issue of the journal *Angelaki: The Journal of the Theoretical Humanities* *Biosocial Criminology* Anthony Walsh, Kevin M. Beaver, 2008-11-12 Pt 1 An overview of the biosocial approach pt 2 Major correlates of crime pt 3 Serious violent criminals and biosocial approaches to crime prevention **Evolutionary Psychology, Public Policy and Personal Decisions** Charles Crawford, Catherine Salmon, 2004-05-20 During the last 15 years human sociobiology has metamorphosed into evolutionary psychology It is concerned with the social problems and stresses hominid and primate ancestors encountered the psychological mechanisms natural selection shaped to deal with these stresses and the way those ancient mechanisms work now Evolutionary psychologists are making great progress in expanding the understanding of human nature however this knowledge has had little impact on policymakers and legislators Supreme Court justices and managers seldom consult evolutionary psychologists to help with their deliberations When faced with private decisions few individuals ask themselves how a Darwinian perspective might help them This volume's aim is to start the process of using theory and findings of evolutionary psychology to help make the world a better place to live This book takes evolutionary psychology explicitly into applied areas in a way no other book has It includes a reasonable scope of applications from pornography to psychopaths and from morality to sex differences in the workplace An applications section provides concrete ideas for dealing with social and policy issues including chapters on women in the workplace rape and child support Providing good coverage of basic issues and theory of the field this book gives lay people and law policymakers appropriate background to fully understand the applications chapters Part II provides information on basic psychological mechanisms for group living

including chapters on emotions reciprocity and legal reasoning and self deception that impact on how well public policy and law function The material in the first two sections provide an intellectual basis for the chapters in the third part of the book which deals with the application of evolutionary psychology to a variety of substantive areas related to public policy and personal decisions A political scientist concludes the book with a commentary on evolutionary psychology and public policy The book is designed to serve as a stand alone text in evolutionary psychology and public policy that can be used in a variety of disciplines such as psychology social work law and psychology and public policy
