Sex Gender And Kinship A Cross Cultural Perspective:

Sex, Gender, and Kinship Burton Pasternak, Carol R. Ember, Melvin Ember, 1997 Responding to a growing interest in the nature and place of family in society this text looks at gender families family relationships and the role of larger kin groups from a cross cultural perspective It draws upon ethnographic accounts and cross cultural studies to determine and illustrate possible characteristics and outcomes highlight options that occur more or less frequently and where possible to account for choices made *Encyclopedia of Sex and Gender* Carol R. Ember, Melvin Ember, 2003-12-31 The central aim of this encyclopedia is to give the reader a comparative perspective on issues involving conceptions of gender gender differences gender roles relationships between the genders and sexuality The encyclopedia is divided into two volumes Topics and Cultures The combination of topical overviews and varying cultural portraits is what makes this encyclopedia a unique reference work for students researchers and teachers interested in gender studies and cross cultural variation in sex and gender It deserves a place in the library of every university and every social science and health department Contents Glossary Cultural Conceptions of Gender Gender Roles Status and Institutions Sexuality and Male Female Interaction Sex and Gender in the World s Cultures Culture Name Index Subject Index **Sexual Revolutions** Jane Peterson, 2002 The change from a hunting gathering lifestyle to one dependent upon farming constitutes a truly revolutionary event in the human career Most archaeologists agree that how ancient people organized their work and family groups was crucial to the success of early attempts at farming Yet little serious attention has been paid to the social organization of labor in the prehistoric past This book addresses that lacuna by investigating sexual divisions of labor As a case study Peterson chose the southern Levant of West Asia where the world s first farming societies emerged some 10 000 years ago Shattering long held assumptions about women s work that lead to generalizations about gender roles Peterson shows that gender studies can be both scientific and thoroughly grounded in feminist theory *Cross-Cultural Research Methods* Carol R. Ember, Melvin Ember, 2009-07-16 Without ethnography cross cultural comparison would not be possible But without cross cultural comparison we would know nothing of what may be universal or variable across human cultures or why variation exists *Cross Cultural Research Methods* is an introductory teaching tool that shows students and potential researchers how to describe compare and analyze patterns that occur in different cultures that is how to form and test anthropological sociological psychological medical or political hypotheses about cultural variation **Gender, Development and Marriage** Caroline Sweetman, 2003 This book traces the economic and social impact of inequality in marriage and considers its implications for development Looking at child marriage the link between women s economic contribution equality within marriage NGO responses to domestic violence and the need to understand particular forms of marriage for appropriate development policy **Social Relationships** Joseph P. Forgas, Julie Fitness, 2008 Human beings are an intrinsically gregarious species our personal relationships are of immense interest to us and are a key factor in achieving happiness and well being From the

moment of birth humans crave love and intimacy and we devote much energy to creating and maintaining successful personal relationships throughout our personal and our working lives. However, modern industrialized societies present a particularly challenging environment for sustaining rewarding personal relationships. Understanding how people initiate, develop, maintain, and terminate relationships is one of the core issues in psychology and the subject matter of this book. Contributors to this volume are all leading researchers in relationship science and they seek here to explore and integrate the subtle influence that evolutionary, socio-cultural, and intra-psychic cognitive, affective, and motivational variables play in relationship processes. In addition to discussing the latest advances in areas of relationship research, they also advocate an expanded theoretical approach that incorporates many of the insights gained from evolutionary psychology, social cognition, and research on affect and motivation. The contributions should be highly relevant to researchers, teachers, students, laypersons, and to everyone who is interested in the subtleties of human relationships. The book is also highly recommended to clinical health and relationship professionals who deal with relationship issues in their daily work.

Mind the Gap Peter Kappeler, Joan Silk, 2009-11-09 This volume features a collection of essays by primatologists, anthropologists, biologists, and psychologists who offer some answers to the question of what makes us human, i.e., what is the nature and width of the gap that separates us from other primates. The chapters of this volume summarize the latest research on core aspects of behavioral and cognitive traits that make humans such unusual animals. All contributors adopt an explicitly comparative approach which is based on the premise that comparative studies of our closest biological relatives, the nonhuman primates, provide the logical foundation for identifying human universals as well as evidence for evolutionary continuity in our social behavior. Each of the chapters in this volume provides comparative analyses of relevant data from primates and humans or pairs of chapters examine the same topic from a human or primatological perspective, respectively. Together they cover six broad topics that are relevant to identifying potential human behavioral universals: Family and social organization, Predation pressure is thought to be the main force favoring group living in primates, but there is great diversity in the size and structure of social groups across the primate order. Research on the behavioral ecology of primates and other animals has revealed that the distribution of males and females in space and time can be explained by sex-specific adaptations that are sensitive to factors that limit their access to resources for females and access to potential mates for males.

'Good Women do not Inherit Land' Nitya Rao, 2017-08-03 Land for the adivasi Santal women in Dumka, Jharkhand stands for security, social position, and identity, and in this men have a distinct advantage. The time period covered is from historic times to the present. The role of government administrative bodies, NGOs, and political leaders is also emphasized. Please note: Taylor Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh, and Sri Lanka.

Human Cultures through the Scientific Lens Pascal Boyer, 2021-07-09 This volume brings together a collection of seven articles previously published by the author with a new introduction reframing the articles in the context of past and present.

questions in anthropology psychology and human evolution It promotes the perspective of integrated social science in which social science questions are addressed in a deliberately eclectic manner combining results and models from evolutionary biology experimental psychology economics anthropology and history It thus constitutes a welcome contribution to a gradually emerging approach to social science based on E O Wilson s concept of consilience Human Cultures through the Scientific Lens spans a wide range of topics from an examination of ritual behaviour integrating neuro science ethology and anthropology to explain why humans engage in ritual actions both cultural and individual to the motivation of conflicts between groups As such the collection gives readers a comprehensive and accessible introduction to the applications of an evolutionary paradigm in the social sciences This volume will be a useful resource for scholars and students in the social sciences particularly psychology anthropology evolutionary biology and the political sciences as well as a general readership interested in the social sciences

Societies Past and Present Thomas C. Burr, 2025-09-24 This global and comparative history examines the evolution of human societies over many millennia illuminating patterns within societies today It shows how the original human groups bands of hunter gatherers grew over time into larger and more complex societies through three major transformations settlement and domestication the development of complexity and inequality and industrial globalization The book describes how each of these major changes in economy and political structure created new types of societies villages chiefdoms and other complex societies agrarian states and empires and today s global social system It therefore shows how different types of societies came to co exist and interact on Earth The book compares societies along seven aspects their economies political systems cultural patterns inequalities family structures demographics and environmental patterns It shows that even societies that shared similar basic features still exhibited great variety The comparative framework presented here helps readers develop a conceptual vocabulary for understanding societies the larger social systems within which they exist and the major social changes that led to this continuing expansion
