Macroeconomic Policy Modelling For Developing Countries:

Macroeconomic Policy Modelling for Developing Countries Victor Murinde, 1993 How can developing countries design a macroeconomic policy framework that will reverse the current trend of persistent inflation regressive real growth and foreign exchange bottlenecks One plausible answer emerges from an intersection between the dilemma and a novel analytical approach In this book Victor Murinde develops one novel approach by drawing on the first principles of economic theory to construct a macroeconomic model such that the structural features and bottlenecks of a developing country are integrally incorporated The model is small and congruent with the limited available data but it is comprehensive enough to address the key policy instruments and targets A battery of modern econometric techniques are called upon to estimate and test the model on Kenya Tanzania and Uganda since independence in a country specific as well as cross country spirit Policy experiments are performed to highlight the macroeconomic scenario generated each time a policy instrument or a stabilization policy package is implemented The experiments fully demonstrate the practicability of the small model limited data methodology developed in the book *Macroeconomic Modeling And Policy Analysis For Less Developed Countries* Mohammed F Khayum, 2019-03-07 This book provides an overview of macroeconometric modeling for less developed countries a description of the structure and performance of Guyana s economy an empirical testing of the model using annual data for Guyana and a simulation approach to policy evaluation Macroeconomic Policy Modelling of African Economies Charles Chukwuma Soludo, 1998 Macroeconomic Policies for Emerging and Developing Economies A Vasudevan, Partha Ray, 2023-12-01 This book examines the relevance of the concepts and hypotheses of macroeconomics in the contemporary world It discusses the current debates on theory and practices of macroeconomic policies with a focus on developing economies emerging from the impact of Covid 19 pandemic The volume advocates for a symbiotic relationship between macroeconomic policies and development strategies It analyses several issues related to macroeconomic tools which include openness capital flows exchange rate and financial strategies It underscores the need to design a development strategy that accounts for the economic context of the countries concerned Further the book advocates for well regulated macrofinancial policies promoting sustainable growth It also provides recommendations to policy makers on formulating a sound and inclusive macroeconomic policy essential for financial stability This book will be of interest to students and researchers of macroeconomics public administration development studies management and policymaking It will also be useful to economists policymakers and journalists working on emerging and developing economies *A Macroeconomics Model and Stabilisation Policies for the OPEC Countries* A. Mallick, 2018-08-13 First published in 1999 this influential volume explores Macroeconomic Adjustment with a particular focus on India Its inspiration originated from the introduction of stabilisation and structural adjustment policies in India in 1991 Mallick examines the application of this policy package by the International Monetary Fund and the World Bank to Developing Economies First looking at the initial conditions and generators of imbalances the appropriate policy framework for India s initial conditions and structural characteristics is considered While the effectiveness of the IMF had been strongly criticised Mallick explains how it could be used more effectively He argues that the programs applied are often contradictory and using India as an example examines the effects of policy reform on its trade sector the repercussions on the direct economy and the costs associated with such policies in restoring stability and future economic growth with particular support for the Vector Autoregression VAR framework Mallick forwards a new structural model for policy purposes evaluated for overall performance and optimal control

Project Appraisal and Macroeconomic Policy T. van der Burg, 2012-12-06 Environmental economics addresses the issues that arise on the boundaries between economic systems and natural systems such as pollution and natural resource depletion and degradation Like any other branch of applied economics it has drawn its tools and techniques from the wide range already available in economics generally selecting adapting and extending these to meet its own particular requirements in its own particular context Here as elsewhere in economics public policy analysis requires quantitative assessments of the economic impact of different policy choices Perhaps the most distinctive contribution of environmental economics has been the development of techniques for the economic valuation of environmental goods and services in the absence of markets for such goods and services or in the presence of markets that are at best imperfect or incomplete Nevertheless policy analysis still relies on one or another of three broad groups of methods used in economics generally One is project appraisal which at the micro level provides an evaluation of the costs and benefits of investment options to inform the choice among them while at the macro level policy analysis rests either on computable general equilibrium CGE models or on economy wide macroeconometric models All models are simplifications designed to focus attention on the important features of the problem at hand and neglecting other features that might for a different problem assume greater importance
