Rowe, 2018-10-24 When it was first published in 1972 this was the first book to analyze the experience of Australia Canada New Zealand and South Africa in the field of macro economic policy The characteristics of this group of countries gives them much in common with both industrialized and emerging economies Their experience of economic policy making has therefore an unusually wide relevance *Australian National Bibliography: 1992* National Library of Australia, 1988 *The Reform of Macroeconomic Policy* J. Perkins, 2016-01-13 This book discusses ways to improve

macroeconomic policy in the context of the various macroeconomic problems of the past two decades with the chapters having been written at various times over that period It emphasises the need to find the best combinations of monetary policy and different forms of taxation and government outlays to achieve high employment and low inflation There is a concluding chapter discussing the special problems that arise when inflation has become low zero or even negative General Approach to Macroeconomic Policy J. O. N. Perkins,1997-05-29 Discussions of macroeconomic policy often focus on changes in the budget deficit A low budget deficit is one of the criteria for admission to the EMU But some combinations of fiscal measures having a given effect on the budget deficit can have damaging effects on the principal macroeconomic objectives such as inflation and full employment whereas other combinations will not This is illustrated by using results from simulations for various OECD countries *Observers and Macroeconomic Systems* Ric D. Herbert,2012-12-06 *Observers and Macroeconomic Systems* is concerned with the computational aspects of using a control theoretic approach to the analysis of dynamic macroeconomic systems The focus is on using a separate model for the development of the control policies In particular it uses the observer based approach whereby the separate model learns to behave in a similar manner to the economic system through output injections The book shows how this approach can be used to learn the forward looking behaviour of economic actors which is a distinguishing feature of dynamic macroeconomic models It also shows how it can be used in conjunction with low order models to undertake policy analysis with a large practical econometric model This overcomes some of the computational problems arising from using just the large econometric models to compute optimal policy trajectories The work also develops visual simulation software tools that can be used for policy analysis with dynamic macroeconomic systems Structural Reforms and Macroeconomic Performance - Country Cases International Monetary Fund,2015-10-14 As a companion piece to the Board paper on Structural Reforms and Macroeconomic Performance Initial Considerations for the Fund this paper presents a selection of case studies on the structural reform experiences of member countries These papers update the Board on work since the Triennial Surveillance Review toward strengthening the Fund's capacity to analyze and where relevant offer policy advice on macro relevant structural issues The paper builds on the already considerable analytical work underway across the Fund setting out considerations to support a more strategic approach going forward
