This monograph is concerned with the formulation and implementation of ORANI INT an intertemporal Computable General Equilibrium CGE model of the Australian economy The aim is to bring together in a balanced approach theory and data for the purpose of developing a practical state of the art tool for policy analysis The modelling approach adopted is motivated by the recent trend in economy wide modelling to combine the respective strengths of traditional CGE models and modern macroeconomic models Traditional CGE models typically provide a disaggregate representation of the economy at a single point in time Such models are useful for analysing issues involving the allocation of resources among the various agents identified at a particular point in time Modern macroeconomic models on the other hand usually provide an aggregate representation of the economy over many points in time Such models are useful for analysing issues involving the allocation of resources across time A model that combines the strengths of static CGE models and modern macro dynamic models is amenable to addressing a wide range of policy issues To demonstrate this point ORANI INT is used to analyse tariff reform

Canadian Economic Forecasting Mervin Daub,1987-11-01 Daub discusses both the rationale for the practice of forecasting and the methods commonly used and traces the history of aggregate economic forecasting in Canada examining the structure conduct and performance of the present forecasting industry particularly the nature of demand and supply pricing and promotion considerations and profits and efficiency He also examines factors which influence the accuracy of forecasts and reviews the record of Canadian forecasting In the last chapters Daub considers public policy aspects of economic forecasting Should forecasters be held liable for inaccurate forecasts Should they be subject to regulation He concludes by observing that the practice of forecasting is inextricably linked to our sense of time as is the very different exercise of time keeping with clocks or watches It is socially complex highly institutionalized and informed by the many and varied visions we carry of the world Through it we attempt to organize and shape our individual and collective futures Until uncertainty is eliminated from human affairs forecasting will continue to be a necessary social practice despite recurring bouts of cynicism as to its worth **A Comprehensive Guide to General Awareness for NRA CET Exam eBook**

Third Series* Library of Congress. Copyright Office,1971 Regulation Theory and Australian Capitalism Brett Heino,2017-11-22 The end of the post World War II long boom in the mid 1970s proved the beginning of a process of political economic change that has fundamentally transformed labour law both in Australia and across the developed world more generally This is a phenomenon with deep ramifications for social justice The dissolution of productive industry the fragmentation of employment categories the rise of profound employment precarity and an increasingly hostile legal environment for trade unionism have been of immense significance for key social justice issues including income inequality the rise of a new working underclass and the marginalization of organised labour By combining the concepts of the Parisian Regulation Approach with an explicitly Marxist jurisprudence this study offers a theoretically rigorous yet empirically sensitive account of legal transition with key case studies in the metal food processing and retail sectors Given the similar development logic of post World War II capitalism in Western societies this theory although operationalised in the Australian context can be used in the effort to explain labour law change more broadly The Power of Economic Ideas Alex Millmow,2010-05-01 Economics Keynes once wrote can be a very dangerous science Sometimes though it can be moulded to further the common good though it might need a leap in mental outlook a whole new zeitgeist to be able do do This book is about a transformation in Australian economists thought and ideas during the interwar period It focuses upon the interplay between economic ideas players and policy sometimes in the public arena In a decade marked by depression recovery and international political turbulence Australian economists moved from a classical orthodox economic position to that of a cautious Keynesianism by 1939 We look at how a small collective of economists tried to influence policy making in the nineteen thirties Economists felt obliged to seek changes to the parameters as economic conditions altered but more importantly as their insights about economic management changed There are three related themes that underscore this book Firstly the professionalisation of Australian economics took a gigantic leap in this period aided in part by the adverse circumstances confronting the economy but also by the aspirations economists held for their discipline A second theme relates to the rather unflattering reputation foisted upon interwar economists after 1945 That transition underlies a third theme of this book namely how Australian economists were emboldened by Keynes s General Theory to confidently push for greater management of economic activity By 1939 Australian economists conceptualized from a new theoretic framework and from one which they advanced comment and policy advice This book therefore will rehabilitate the works of Australian

interwar economists arguing that they not only had an enviable international reputation but also facilitated the acceptance of Keynes's General Theory among policymakers before most of their counterparts elsewhere American Book Publishing Record, 1997
