*Encyclopedia of United States National Security* Richard J. Samuels, 2006 Covers the origin development and results of all major national security policies over the last seven decades A thoroughly interdisciplinary work the encyclopedia views national security from a historical economic political and technological perspective **Africa** Air University (U.S.).

Library, 1988 **Deadly Contradictions** Stephen P. Reyna, 2016-08-01 As US imperialism continues to dictate foreign policy Deadly Contradictions is a compelling account of the American empire Stephen P Reyna argues that contemporary forms of violence exercised by American elites in the colonies client state and regions of interest have deferred imperial problems but not without raising their own set of deadly contradictions This book can be read many ways as a polemic against geopolitics as a classic social anthropological text or as a seminal analysis of twenty four US global wars during the Cold War and post Cold War eras *Human Rights and America's War on Terror* Satvinder S. Juss, 2018-10-25 This volume examines the

success of the 9 11 attacks in undermining the cherished principles of Western democracy free speech and tolerance which were central to US values It is argued that this has led to the USA fighting disastrous wars in Afghanistan and Iraq and to sanctioning the use of torture and imprisonment without trial in Guantamo Bay extraordinary rendition surveillance and drone attacks At home it has resulted in restrictions of civil liberties and the growth of an ill affordable military and security apparatus In this collection the authors note the irony that the shocking destruction of the World Trade Center on 9 11 should become the justification for the relentless expansion of security agencies Yet this is a salutary illustration of how the security agencies in the USA have adopted faulty preconceptions which have become too embedded within the institution to be abandoned without loss of credibility and prestige The book presents a timely assessment of both the human rights costs of the war on terror and the methods used to wage and relentlessly continue that war It will be of interest to researchers academics practitioners and students in the fields of human rights law criminal justice criminology politics and international studies **United States Foreign Policy and the Middle East/North Africa** Sanford R. Silverburg, Bernard

Reich, 2015-07-16 This bibliography first published in 1990 is a result of a quarter century professional and personal relationship between two academics interested in Middle East studies The comprehensive bibliography consists of western primarily English language sources published through 1988 and early 1989 concerning foreign policy toward the Middle East and North Africa during the twentieth century Included are materials that deal directly with the topic material that has appeared in published form ie books monographs essays and articles Also included are some non published items most importantly American and British doctoral dissertations and master s theses **The Future of International Law and American Foreign Policy** Francis Anthony Boyle, 2023-09-29 This in depth analysis based on the implicit connection between the basic principles of international law and the effective practice of international relations by a constitutional democracy with a commitment to the rule of law takes into account the diversity of viewpoints held by the different states and peoples of

the world community to provide a global perspective Published under the Transnational Publishers imprint **Imperial Alibis** Stephen Rosskamm Shalom, 1993 Lucidly argued and carefully documented Stephen Shalom's study of the pretexts for intervention is an invaluable guide to the recent past and unlikely future Noam Chomsky author of *Necessary Illusions* Lightning Print On Demand Title Secret State, Silent Press Richard Keeble, 1997 Keeble seeks to problematise the Gulf war of 1991 and argues controversially that there was no war at all Central to his argument is the notion of myth used in the sense of manufactured story and constructed illusion *The Web of Violence* Jennifer E. Turpin, Lester R. Kurtz, 1997 An excellent representation of the interdisciplinary thrust of peace studies Paul Joseph Tufts University Violence is a topic of concern everywhere in the media in churches in the halls of governments In every land and in every culture violence is considered by most to be taboo a last resort Yet under certain conditions from the level of the family to the level of nations violence is used as a mechanism of social control Various rationalizations thus emerge to distinguish between legitimate and illegitimate violence *The Web of Violence* explores the interrelationship among personal collective national and global levels of violence This unique collection brings together a number of internationally known contributors to address the genesis and manifestations of violence in the search for a remedy for this confounding social problem As the global community becomes more intimate we must better understand the nature of violence *The Web of Violence* supports this aim by examining the dangerous human phenomenon from many perspectives at different levels and using multiple methodologies
