Mad or Bad? James Wakely, 2012-02-15 I would crave the Court's indulgence and beg the consideration that my Client has been examined by Dr X Consultant Psychiatrist and has been diagnosed as suffering from an Impulsive Personality Disorder pleads the Defence Barrister The pencil held by the Magistrate whizzes intently across an A4 folder page in the process The temptation to stand up and shout But this is bovine excrement That's not a mental illness of

any kind and should not have to be tempered with the knowledge that such behaviour is liable to be deemed Contempt of Court not exactly an ideal outcome for a Deputy Police Surgeon after giving evidence as a Witness for the Court You are allowed to stay and observe after giving evidence but not to spark off like that This book is an attempt to remedy this sort of thing as it all too often results in Counselling or similar being recommended for a defendant criminal who has NO genuine intention of really co operating with Psychiatric Psychological services once his Custodial i e prison Sentence has been waived in this fashion This book quotes many cases Dr Wakely has actually seen in his time as a General Practitioner Psychiatrist and Police Surgeon and in simple terms that can be understood by lay people spells out the kinds of mental illness that should perhaps in certain circumstances lead to defendants in Court being let off as well as those that emphatically should NOT be Dr Wakely is unable to stick to stodgy text book prose very much and writes exactly as he thinks He apologises to those who hate humour and might thus be offended but uses readability clarity and comprehensibility as feeble excuses for such honesty in his opinions **Mad Or Bad?** Michael Bavidge,1989 No Marketing Blurb Punishment and Madness Toby Seddon,2007-03-12 The focus of this book is on the government of prisoners with mental health problems in England and Wales over the last twenty five years The wider context and backdrop to the book is the shift to late modernity which since the 1970s has seen massive structural change in most Western societies affecting the social economic and cultural spheres as well as the field of crime and punishment This book investigates whether these profound transformations have also led to a reconfiguring of responses to mentally vulnerable offenders who end up in prison Specifically it explores how this group of prisoners has come to be viewed increasingly as sources of risk requiring management or containment rather than as people suitable for therapeutic responses The book draws on primary research carried out by the author including interviews with key informants involved in the field during this period such as former cabinet ministers senior civil servants campaigners and academics In conducting this investigation the author has developed a method of research which combines and synthesizes different forms of analysis to create a novel approach to socio historical research *Sneakers* Neal Heard,2022-11-08 Now in its fifth edition this comprehensive and highly illustrated edition of *Sneakers* spans over 300 shoes while also giving advice on shoe care and maintenance **100 Years of the Infanticide Act** Karen Brennan,Emma Milne,2023-10-19 This book provides the first comprehensive and detailed analysis of the Infanticide Act and its impact in England and Wales and around the world It is 100 years since an Infanticide Act was first passed in England and Wales The statute re enacted in 1938 allows for leniency to be given to women who kill their infants within the first year of life This legislation is unique and controversial it creates a specific offence and defence that is available only to women who kill their biological infants Men and other carers are not able to avail of the special mitigation provided by the Act nor are women who kill older children The collection brings together leading experts in the field to offer important insights into the history of the law how it works today the impact and legacy of the statute and potential futures of infanticide laws around the world Contributors consider the Act in practice in

England and Wales the ways it has been portrayed in the British media and justifications for and criticisms of the provision of special treatment for women who kill their infants within a year of birth It also looks at the criminal justice responses to infanticide in other jurisdictions such as Australia Ireland Sweden and the United States of America Invisible Insanity John Deadman, Sam Sussman, David Streiner, 2023-07-06 From the frontlines of the fight for dignity and appropriate treatment for those struggling with mental health challenges John Deadman Sam Sussman and David Streiner offer a social history of mental illness in Canada and the world that is rich in research personal experience scientific knowledge and challenging truths Reaching back to ancient times the authors trace the story of mental health treatment and connect past events to the eventual policy of deinstitutionalization in Canada As eyewitnesses to the painful fallout of deinstitutionalization the authors are well positioned to describe the results of this policy particularly for the severely mentally ill incarceration homelessness and helplessness The shocking visibility of these challenges has led to calls for action but major social institutions such as government and religious organizations have been unable to provide lasting solutions Invisible Insanity A Social History of Mental Illness in Canada and the World will appeal to mental health professionals those who suffer from mental illness family and friends of those who suffer and members of society as a whole It's an issue that touches all of us in some way and the authors will inspire readers to advocate for comprehensive care that meets the needs of patients and treats them with the dignity and professionalism they deserve Sanity, Madness and the Family R.D Laing, Aaron Esterson, 2016-10-04 In the late 1950s the psychiatrist R D Laing and psychoanalyst Aaron Esterson spent five years interviewing eleven families of female patients diagnosed as schizophrenic Sanity Madness and the Family is the result of their work Eleven vivid case studies often dramatic and disturbing reveal patterns of affection and fear manipulation and indifference within the family But it was the conclusions they drew from their research that caused such controversy they suggest that some forms of mental disorder are only comprehensible within their social and family contexts their symptoms the manifestations of people struggling to live in untenable situations Sanity Madness and the Family was met with widespread hostility by the psychiatric profession on its first publication where the prevailing view was to treat psychosis as a medical problem to be solved Yet it has done a great deal to draw attention to the complex and contested nature of psychosis Above all Laing and Esterson thought that if you understood the patient's world their apparent madness would become socially intelligible This Routledge Classics edition includes a new Foreword by Hilary Mantel **Conflict Resolution - Volume I** Keith William Hipel, 2009-11-10 Conflict Resolution is a component of Encyclopedia of Institutional and Infrastructural Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The Theme on Conflict Resolution deals with conflict which is an integral component in the utilization and management of all life support systems These volumes give a comprehensive review on Conflict Domains Warfare Internal Conflicts and the Search for Negotiated or Mediated Resolutions Analysis methods of conflict and its

resolution Approaches to Conflict Resolution Formal Models for Conflict Resolution and Case Studies These two volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs **The Last Trade** James

Conway,2013-02-05 James Conway has written the corporate thriller for our age an age when the power of new media and the hunger of Wall Street converge to form a deadly entity capable of bringing the global economy to its knees Drew Havens made a killing for the Rising Fund which thanks to his prognostications was the only hedge operation to anticipate and capitalize on the mortgage crisis of 2008 Havens sees things others can't from the collapse of the American real estate market to the multibillion dollar rise of his ruthless and charismatic boss Havens is rich beyond his dreams but his work has cost him his marriage And now it may cost him his life It starts with the brutal murder of his young protégé and over the course of six days six other brokers around the world each killed after executing a trade linked to the Rising Fund And as the violence escalates to an international level Havens frantically tries to construct a model that will reveal the catastrophic event that only he can see coming and confirm that his boss and the Rising Fund are at the center of it Crime and

Criminality Sandie Taylor,2015-12-22 The question of why and how certain individuals are drawn towards behaving in a way that contravenes the Law of the Land is not an easy one to address Researchers from various different fields have nevertheless attempted to develop theoretical explanations for the existence of different types of crime and why some individuals commit such acts Crime and Criminality draws on criminology sociology psychology and neuroscience to offer a balanced perspective of crime the criminal and criminality Coverage includes a comprehensive discussion of theoretical approaches to criminal behaviour including biological social and rational choice approaches an analysis of legal and social definitions of crime and how these definitions influence the way specific behaviours are labelled as criminal an examination of different types of crime and criminals from delinquents to psychopaths and sex offenders an exploration of different ways in which crime is predicted including risk assessment and offender profiling and an overview of investigative techniques Addressing a broad range of topics and offering a synthesis of competing theoretical explanations of criminality this book is essential reading for students taking courses in criminology criminal psychology criminal behaviour forensic psychology and psychological criminology Crime, Punishment, and Mental Illness Patricia Erickson,Steven Erickson,2008-07-18

Hundreds of thousands of the inmates who populate the nation's jails and prison systems today are identified as mentally ill Many experts point to the deinstitutionalization of mental hospitals in the 1960s which led to more patients living on their own as the reason for this high rate of incarceration But this explanation does not justify why our society has chosen to treat these people with punitive measures In Crime Punishment and Mental Illness Patricia E Erickson and Steven K Erickson explore how societal beliefs about free will and moral responsibility have shaped current policies and they identify the differences among the goals ethos and actions of the legal and health care systems Drawing on high profile cases the authors

provide a critical analysis of topics including legal standards for competency insanity versus mental illness sex offenders psychologically disturbed juveniles the injury and death rates of mentally ill prisoners due to the inappropriate use of force the high level of suicide and the release of mentally ill individuals from jails and prisons who have received little or no treatment Treatment of Disorders in Childhood and Adolescence, Fourth Edition Mitchell J. Warner, 2012-07-19 Drawing on government data and interdisciplinary expertise this timely book seeks to explain why the changing economic and legal status of women has not reduced the gender gap in criminal offending Women and Crime A Reference Handbook examines how women s patterns of offending have changed over time in America from the Colonial period to the present The book sets the stage with a historical overview of women s criminal activity Subsequent chapters

cover such topics as changes in women's status and patterns of offending the impact of childhood abuse on the development of criminality and how changes in law the War on Drugs and other crime policy have in fact increased the frequency of women's imprisonment and arrests International issues such as legalization of prostitution sex trafficking and women's involvement in organized crime including drug cartels are also explored Each chapter examines theory research law policy and key players in the evolving response to women's crime patterns Throughout the work the author links women's status victimization and offending patterns and suggests how crime control policy far from saving women is increasingly making it impossible for female offenders to live on the outside

Vice and Psychiatric Diagnosis John Z. Sadler, 2024-02-28 *Vice and Psychiatric Diagnosis* begins with the simple question of why some categories of mental disorder include immoral or criminal conduct as diagnostic features while most mental disorders in the DSM and ICD do not involve such vice laden concepts While this initial puzzle seems to concern only the limited domain of psychiatric nosology Sadler's expansive scholarship reveals that this simple question leads inexorably to complex questions about the role of madness and morality in intellectual history and to today's many conflicts and contradictions in the policy and culture of mental health criminal justice and related social welfare efforts The book outlines the implications of vice concepts being incorporated into psychiatric diagnosis and clinical practice leading to some of the vexing problems in mental health and social care These issues include the fragmentation of care in social welfare efforts involving mentally ill people criminal offenders intellectually disabled individuals and juvenile offenders The analysis extends to cultural attitudes and policies as well the insanity defense managing the mentally ill criminal offender the value of punishment in criminal justice and derivative issues such as the ethics of forensic psychiatry the growing problem of mass shootings stigma health literacy and the difficulties in pursuing rigorous and consistent approaches to psychiatric diagnostic classification In the pursuit of untangling these threads of vice and psychiatric diagnosis Sadler provides a brief history of ideas about madness and morality beginning in prehistory and extending into the late 20th century The lessons from this history are applied in subsequent chapters examining the vice mental disorder relationship from the perspectives of philosophical conceptual issues the perspectives of criminal law and the criminal justice system and the perspectives of public interest and public opinion The concluding chapters formulate an alternative way of thinking about the vice mental disorder relationship in clinical practice and public policy culminating in Forty Theses which present the detailed conclusions and social implications for this monumental work
