Canada Michelangelo Sabatino, Rhodri Windsor Liscombe, 2016-11-15 Canada is a country of massive size of diverse geographical features and an equally diverse population all features that are magnificently reflected in its architecture In this book Rhodri

Windsor Liscombe and Michelangelo Sabatino offer a richly informative history of Canadian architecture that celebrates and explores the country's many contributions to the spread of architectural modernity in the Americas. A distinct Canadian design attitude coalesced during the twentieth century, one informed by a liberal hybrid and pragmatic mindset, intent less upon the dogma of architectural language and more on thinking about the formation of inclusive spaces and places. Taking a fresh perspective on design production, they map the unfolding of architectural modernity across the country from the completion of the transcontinental railway in the late 1880s through to the present. Along the way, they discuss architecture within the broader contexts of political, industrial, and sociocultural evolution, the urban/suburban expansion, and new building technologies. Examining the works of architects and firms such as ARCOP, Eric Arthur, Ernest Cormier, Brigitte Shim, and Howard Sutcliffe, this book brings Canadian architecture chronologically and thematically to life.

The Visual Arts in Canada Brian Foss, Sandra Paikowsky, Anne Whitelaw, 2010. This book charts the developments in Canadian art from the late nineteenth century to the present, with new essays by the country's leading art historians. A comprehensive overview, this volume embraces painting, sculpture, photography, design, video, and conceptual and cross-disciplinary art, as well as studies of art institutions and historiography. Each chapter explores the richness and diversity of Canadian art; topics range from impressionist painting to the multimedia work of First Nations artists and from the Group of Seven to contemporary video production. Newly commissioned, carefully edited, and with 185 full-colour illustrations, *The Visual Arts in Canada* will appeal to general readers and students alike. An extensive index, as well as an appendix that lists galleries and artist-run centres across the country, make this the definitive resource for Canadian art from the past century. Throughout the twenty chapters, readers will recognize favourite artists and encounter new ones, all of whom play an integral role in the country's visual history.

Designing Disability Elizabeth Guffey, 2017-12-28. *Designing Disability* traces the emergence of an idea and an ideal physical access for the disabled through the evolution of the iconic International Symbol of Access (ISA). The book draws on design history, material culture, and recent critical disability studies to examine not only the development of a design icon but also the cultural history surrounding it. Infirmary and illness may be seen as part of human experience, but disability is a social construct, a way of thinking about and responding to a natural human condition. Elizabeth Guffey's highly original and wide-ranging study considers the period both before and after the introduction of the ISA, tracing the design history of the

wheelchair a product which revolutionised the mobility needs of many disabled people from the 1930s onwards She also examines the rise of barrier free architecture in the reception of the ISA and explores how the symbol became widely adopted and even a mark of identity for some especially within the Disability Rights Movement Yet despite the social progress which is inextricably linked to the ISA a growing debate has unfurled around the symbol and its meanings The most vigorous critiques today have involved guerrilla art graffiti and studio practice reflecting new challenges to the relationship between design and disability in the twenty first century
