A History of Madeira William Combe, 1821 **Volcanic Geology of São Miguel Island (Azores Archipelago)** J.L. Gaspar, J.E. Guest, A.M. Duncan, F.J.A.S. Barriga, D.K. Chester, 2015-10-12 The Azores archipelago in the Atlantic Ocean is composed of nine volcanic islands and São Miguel is the largest and most volcanically active. During the past 5000 years several eruptions have taken place on the three active central volcanoes Sete Cidades, Fogo, and Furnas, and in the basaltic fissure systems of Picos and Congro. There is evidence that Furnas was in eruption when the first settlers arrived some time between 1439 and 1443. In the sixteenth and seventeenth centuries there were two explosive sub-Plinian eruptions: Fogo in 1563 and Furnas in 1630. The last eruption on land occurred in the Picos Fissural Volcanic System in 1652, involving the extrusion of lava domes. In 22 chapters, this volume considers the volcanic geology of the island under the headings of geological setting, volcanic history, geological hazards and risk assessment, volcano monitoring, and natural resources.

Encyclopedia of Nineteenth-Century Photography John Hannavy, 2013-12-16 The Encyclopedia of Nineteenth Century Photography is the first comprehensive encyclopedia of world photography up to the beginning of the twentieth century. It sets out to be the standard definitive reference work on the subject for years to come. Its coverage is global, an important first in that authorities from all over the world have contributed their expertise and scholarship towards making this a truly comprehensive publication. The Encyclopedia presents new and ground-breaking research alongside accounts of the major established figures in the nineteenth-century arena. Coverage includes all the key people, processes, equipment, movements, styles, debates, and groupings which helped photography develop from being a solution in search of a problem when first invented to the essential communication tool, creative medium, and recorder of everyday life which it had become by the dawn of the twentieth century. The sheer breadth of coverage in the 1200 essays makes the Encyclopedia of Nineteenth Century Photography an essential reference source for academics, students, researchers, and libraries worldwide.

Archipelago Tourism Revisited Godfrey Baldacchino, 2024-09-13 This timely and innovative book explores the dynamics of inter-island tourism, also known as archipelago tourism, on the cusp of the post-pandemic epoch. Embellished with illustrative maps and diagrams, the volume examines what novel approaches have been developed, if at all, so as not to repeat past mistakes and nurture a more sustainable island tourism business model. It looks at how the political-economic relationship between main and outer islands changed during the pandemic and if so, whether this shift has had a bearing on current tourism policy. The book also explores how these and other changes are reflected in how islands are branded, island destinations are marketed, and island transport logistics play out. An array of archipelagos of varying sizes and locations is explored, assuring a global perspective. The book furthers our understanding of core-periphery dynamics in archipelago tourism. The volume will be of interest to students, researchers, policy makers, and academics in the fields of tourism policy and planning, sustainability, island studies, and development studies. **Portuguese Brazil** James
