Offers a full introduction to and survey of runes and runology their history how they were used and their interpretation Runes often considered magical symbols of mystery and power are in fact an alphabetic form of writing Derived from one or more Mediterranean prototypes they were used by Germanic peoples to write different kinds of Germanic language principally Anglo Saxon and the various

Scandinavian idioms and were carved into stone wood bone metal and other hard surfaces types of inscription range from memorials to the dead through Christian prayers and everyday messages to crude graffiti First reliably attested in the second century AD runes were in due course supplanted by the roman alphabet though in Anglo Saxon England they continued in use until the early eleventh century in Scandinavia until the fifteenth and later still in one or two outlying areas This book provides an accessible general account of runes and runic writing from their inception to their final demise It also covers modern uses of runes and deals with such topics as encoded texts rune names how runic inscriptions were made runological method and the history of runic research A final chapter explains where those keen to see runic inscriptions can most easily find them Professor MICHAEL P BARNES is Emeritus Professor of Scandinavian Studies University College London

Norma Ever After Nancy Baxter, 2007-12-18 Once upon a time specifically our time there lived an ordinary commoner named Norma Dale Hovering near thirty Norma no longer expected passion or even romance Not since puberty and the retirement of her single Ken doll and his harem of Barbies When Norma's father leaves her a sea chest brimming with cash and her beloved plush puffin from childhood she takes the old stuffed bird as a sign and decides that it's high time she started believing in fairy tales Particularly the ones her father used to tell her about the mystical Orkney Islands So Norma travels to the far north of Scotland where she discovers that nesting puffins are indeed real And unbelievably so are the handsome men of the heather she's always dreamed of and they're looking in her direction Suddenly Norma feels sexy Not go go boots and hot pants sexy more mysterious like a lithe and lovely young Catherine from Wuthering Heights sexy minus the dead part But there's more than one Heathcliff on these moors Will she choose the brooding artist the brash Texan or the sensitive professor If those Barbies could see her now

Art and Architecture in Neolithic Orkney

Antonia Thomas, 2016-09-26. This book offers a groundbreaking analysis of Neolithic art and architecture in Orkney, focussing upon the incredible collection of hundreds of decorated stones being revealed by the current excavations at the Ness of Brodgar.

Temporary Palaces Richard Bradley, 2021-05-31. The Great Houses of the prehistoric and early medieval periods were enormous structures whose forms were modelled on those of domestic dwellings. Most were built of wood rather than stone; they were used over comparatively short periods; they were frequently replaced in the same positions and some were associated with exceptional groups of artefacts. Their construction made considerable demands on human labour and approached the limits of what was possible at the time. They seem to have played specialised roles in ancient society but they have been difficult to interpret. Were they public buildings or the dwellings of important people? Were they temples or military bases and why were they erected during times of crisis or change? How were their sites selected and how were they related to the remains of a more ancient past? Although their currency extended from the time of the first farmers to the Viking Age, the similarities between the Great Houses are as striking as the differences. This study focuses on the monumental buildings of northern and northwestern Europe but draws on structures over a wide area extending from Anatolia as far as Brittany and Norway. It employs ethnography as a source of ideas and discusses the concept of the House Society and its usefulness in archaeology. The main examples are taken from the Neolithic and Iron Age periods but this account also draws on the archaeology of the first millennium AD. The book emphasises the importance of comparing archaeological sequences with one

another rather than identifying ideal social types In doing so it features a range of famous and less famous sites from Stonehenge to the Hill of Tara and from Old Uppsala to Yeavering
