Russian aircraft on World War II's Eastern Front and the almost slave-like conditions in which those aircraft were made. The Soviet history of the Second World War, written under the conditions of a totalitarian regime, reflected all its features with the result that it includes solid sets of patriotic fables that have no connection with reality. Many of the events of the war were distorted beyond recognition or even made up from beginning to end. Archives containing original documents were available only to selected specially verified KGB historians who presented only the version of the war that was acceptable to the Soviet regime. After the collapse of the Soviet Union, the process of declassifying archives and gaining wide access to information gradually began to reveal the terrible truth of the crimes of the Soviet regime. One of which, of course, was the incompetent leadership of the Red Army which led to massive loss of life across the military and civilians alike. However, the consequences of decades of Soviet propaganda had a strong impact on both Russian and world historical science. Because of this, not only Russian but unfortunately many European and American historians found themselves repeating the Soviet myths they had been fed. The history of Soviet fighter aircraft did not escape this fate. The tale of Stalin's so-called Falcons, who allegedly shot down dozens and even hundreds of Luftwaffe aircraft, was persistently drummed into the heads of many generations of Russian people. These heroes supposedly flew Soviet fighters whose technical characteristics were many times superior to their German counterparts, with the result that Luftwaffe aces were reportedly afraid of meeting them in the air. These primitive propaganda clichés became a model for describing the actions of Stalin's fighter aircraft. In this stunning exposé, Stalin's Falcons reveals the stark and dark truth of the terrible losses suffered by Soviet flyers, the inferiority of the Russian aircraft, and the almost slave-like conditions in which those aircraft were made. [The Encyclopaedia Britannica](#) James Louis Garvin, Franklin Henry Hooper, Warren E. Cox, 1929 [Secret Forces of World War II](#) Philip Warner, 2004-01-20 One of the lasting legacies of World War 2 was the proliferation of what today are known as Special Forces. At the time, many soldiers, often of high rank, regarded these units as nothing short of ill-disciplined cowboys or worse. However, desperate times called for desperate measures, and there were those in high places who were prepared to take risks. As specially recruited units such as the LRDG, SAS, and SBS earned their spurs and scored significant victories at high cost, both to the enemy and themselves, so faith in the concept grew.

Ecological Security Dennis Clark Pirages, Theresa Manley DeGeest, 2003-07-28 Global environmental politics has emerged from its initial incarnation in the arena of low politics and is rapidly becoming a high politics concern. Concern over water pollution, air pollution, deforestation, and related basic environmental issues is giving way to a broader ecological

security agenda In this pathbreaking book Dennis Clark Pirages and Theresa Manley DeGeest argue for dramatically broadening the context in which security priorities are established in an age of increasing globalization Addressing the very fundamental question of the sources of premature human deaths and associated insecurity both historically and in the contemporary world the authors observe that in the twentieth century starvation killed nearly as many people as did military conflict But disease was responsible for killing nearly fourteen times as many people as was warfare And in the contemporary world of the twenty first century environmental terrorism and biological warfare are blurring the traditional distinctions between natural disasters accidental deaths and military casualties Ecological Security moves the analysis of global environmental and resource issues to the next level by developing an eco evolutionary perspective for analyzing emerging problems associated with rapid globalization Preserving future ecological security will depend upon maintaining dynamic equilibriums among human populations and between them and pathogenic microorganisms other species and the sustaining capabilities of nature This eco evolutionary framework is used to anticipate and analyze emerging demographic ecological and technological discontinuities and dilemmas associated with rapid globalization The authors conclude by stressing the need for new kinds of global public goods to mitigate the harshest impacts of these rapid and interrelated changes
