

TIME #3 SURFERS

A comic book cover illustration. In the foreground, two young boys are shown from the chest up. The boy on the left wears a red t-shirt and a black baseball cap, looking off to the side with a concerned expression. The boy on the right wears a light green t-shirt and has a shocked expression with his mouth open and hands raised. In the background, a large, green, goblin-like creature with a wide, toothy grin and a sword on its back is running towards the viewer. Two other figures are visible in the distance, one running and one jumping. The setting appears to be a city street at night with tall buildings and a bright light source in the background.

This journey surveys the wonderful art from its traditional function in the distant past to the present era where Zam ragg and hip hop have taken root. The book also plays tribute to the often unsung heroes who have devoted their lives and careers to the growth of the music industry. Music is an essential mass media tool that contributes to the socio cultural development of society. As a result of this the book further attempts to look at the role music has played in shaping the socio cultural and economic development of the country. Cover **The Global Financial Crisis** Steven Kates, 2011 *The Global Financial Crisis* is a unique investigation into the causes of the most savage economic downturn experienced since the Great Depression. Employing wide and divergent perspectives which are themselves critically examined this study analyses the measures that have been taken to restore our economies to acceptable rates of unemployment and growth. This book brings together economists all of whom are from outside the mainstream and who collectively represent the broadest range of views from across the entire spectrum of economic opinion to examine what has been learnt from this experience. With the advent of this challenging new work these alternative perspectives should now receive a far closer examination given the unmistakable economic failures endured over the past few years. Written in an accessible manner this book will appeal to economists economic policy makers and students of economics and public policy who are trying to look at alternative ways of understanding why the Global Financial Crisis GFC occurred and what ought to have been the appropriate response. Anyone who is genuinely interested in the causes of the GFC and why the policies that were adopted failed to bring about the recovery that was intended will find this book a fascinating read.
