Mondrian: the Transatlantic Paintings Harry Cooper, Ron Spronk, Harvard University. Art Museums, 2001 Just before World War II Piet Mondrian fled from Paris to London and later to New York where he lived until his death in 1944 Upon his arrival in Manhattan the artist began reworking seventeen of the paintings he brought with him many of which had already been finished and exhibited He changed lines and added blocks and bars of color to give them what he called more boogie woogie By inscribing these so called transatlantic works with a double date for example 38 42 Mondrian emphasized the exceptional history of the series

Mondrian Evolution Sam Keller, Ulf Küster, Susanne Gaensheimer, Kathrin Beßen, Susanne Meyer-Büser, 2022-01-01 Piet Mondrian hat die Entwicklung der Malerei von der Figuration zur Abstraktion maßgebend geprägt Anlässlich seines 150. Geburtstags widmet sich Mondrian Evolution seinem vielgestaltigen Werk und seiner künstlerischen Entwicklung Zunächst in der Tradition der niederländischen Landschaftsmalerei des späten 19. Jahrhunderts arbeitend gewannen bald Symbolismus und Kubismus große Bedeutung für ihn Erst seit Anfang der 1920er Jahre konzentrierte sich der Künstler auf eine komplett gegenstandslose Bildsprache die sich auf die rechtwinklige Anordnung von schwarzen Linien mit Flächen in Weiß und den drei Grundfarben Blau Rot und Gelb konzentriert In einzelnen Kapiteln wird dieser Weg anhand von Motiven wie Windmühlen Dörfern und das Meer sich im Wasserpiegelnden Bauernhöfen und Pflanzen in verschiedenen Formen der Abstraktion nachverfolgt

Mondrian's Philosophy of Visual Rhythm Eiichi Tosaki, 2017-11-15 This volume investigates the meaning of visual rhythm through Piet Mondrian's unique approach to understanding rhythm in the compositional structure of painting drawing reference from philosophy aesthetics and Zen culture Its innovation lies in its reappraisal of a forgotten definition of rhythm as stasis or composition which can be traced back to ancient Greek thought This conception of rhythm the book argues can be demonstrated in terms of pictorial strategy through analysis of East Asian painting and calligraphy with which Greek thought on rhythm has identifiable commonalities The book demonstrates how these ideas about rhythm draw together various threads of intellectual development in the visual arts that cross disparate aesthetic cultural practices As an icon of early 20th Century Modernism Mondrian's neoplasticism is a serious painterly and philosophical achievement In his painting Mondrian was deeply influenced by Theosophy which took its influence from Eastern aesthetics particularly East Asian and Indian thought However Mondrian's approach to visual rhythm was so idiosyncratic that his contribution to studies of visual rhythm is often under recognized This volume shows that a close inspection of Mondrian's own writing thinking and painting has much to tell scholars about how to understand a long forgotten aspect of visual rhythm Rodin's famous criticism of photography athlete in motion is forever frozen can be applied to Muybridge's zoopraxiscope the Futurists' rendition of stroboscopic images and

Duchamp's *Nude Descending a Staircase* Through a comparative study between Mondrian's painting and these seminal works this volume initiates a new convention for the cognition of the surface of painting as visual rhythm Mondrian's simultaneous emphasis on the static and the rhythmic is hardly fodder for a publicist Eiichi Tosaki has taken on the challenge of elucidating Mondrian's theories of rhythm and particularly his conception of static rhythm The result is a tour de force that will forever alter the reader's encounter with the works of Mondrian Prof Kathleen Higgins *Pixels & Paintings* David G. Stork, 2023-11-14 *PIXELS PAINTINGS* The discussion is firmly grounded in established art historical practices such as close visual analysis and an understanding of artists' working methods and real world examples demonstrate how computer assisted techniques can complement traditional approaches Dr Emilie Gordonker Director of the Van Gogh Museum The pioneering presentation of computer based image analysis of fine art forging a dialog between art scholars and the computer vision community In recent years sophisticated computer vision graphics and artificial intelligence algorithms have proven to be increasingly powerful tools in the study of fine art These methods some adapted from forensic digital photography and others developed specifically for art empower a growing number of computer savvy art scholars conservators and historians to answer longstanding questions as well as provide new approaches to the interpretation of art *Pixels Paintings* provides the first and authoritative overview of the broad range of these methods which extend from image processing of palette marks brush strokes and shapes up through analysis of objects poses style composition to the computation of simple interpretations of artworks This book stresses that computer methods for art analysis must always incorporate the cultural contexts appropriate to the art studies at hand a blend of humanistic and scientific expertise Describes powerful computer image analysis methods and their application to problems in the history and interpretation of fine art Discusses some of the art historical lessons and revelations provided by the use of these methods Clarifies the assumptions and applicability of methods and the role of cultural contexts in their use Shows how computation can be used to analyze tens of thousands of artworks to reveal trends and anomalies that could not be found by traditional non computer methods *Pixels Paintings* is essential reading for computer image analysts and graphics specialists conservators historians students psychologists and the general public interested in the study and appreciation of art *Late Thoughts* Karen Painter, Thomas E. Crow, 2006 Collects nine essays that discuss the creativity of influential artists as well as the legacy of their work following their deaths and covers Wolfgang Amadeus Mozart Piet Mondrian Frank Gehry and others *Science and Art* Antonio Sgamellotti, Brunetto Giovanni Brunetti, Costanza Miliani, 2020-02-24 Science and art are increasingly interconnected in the activities of the study and conservation of works of art Science plays a key role in cultural heritage from developing new analytical techniques for studying the art to investigating new ways of preserving the materials for the future For example high resolution multispectral examination of paintings allows art historians to view underdrawings barely visible before while the use of non invasive and micro sampling analytical techniques allow scientists to identify pigments and binders that help art conservators

in their work It also allows curators to understand more about how the artwork was originally painted Through a series of case studies written by scientists together with art historians archaeologists and conservators Science and Art The Painted Surface demonstrates how the cooperation between science and humanities can lead to an increased understanding of the history of art and to better techniques in conservation The examples used in the book cover paintings from ancient history Renaissance modern and contemporary art belonging to the artistic expressions of world regions from the Far East to America and Europe Topics covered include the study of polychrome surfaces from pre Columbian and medieval manuscripts the revelation of hidden images below the surface of Van Gogh paintings and conservation of acrylic paints in contemporary art Presented in an easily readable form for a large audience the book guides readers into new areas uncovered by the link between science and art The book features contributions from leading institutions across the globe including the Metropolitan Museum of Art New York Art Institute of Chicago Getty Conservation Institute Opificio delle Pietre Dure Firenze National Gallery of London Tate Britain Warsaw Academy of Fine Art and the National Gallery of Denmark as well as a chapter covering the Thangka paintings by Nobel Prize winner Richard Ernst

Galenson, 2009-09-14 From Picasso's Cubism and Duchamp's readymades to Warhol's silkscreens and Smithson's earthworks the art of the twentieth century broke completely with earlier artistic traditions A basic change in the market for advanced art produced a heightened demand for innovation and young conceptual innovators from Picasso and Duchamp to Rauschenberg and Warhol to Cindy Sherman and Damien Hirst responded not only by creating dozens of new forms of art but also by behaving in ways that would have been incomprehensible to their predecessors **Conceptual Revolutions in Twentieth Century Art** presents the first systematic analysis of the reasons for this discontinuity David W Galenson whose earlier research has changed our understanding of creativity combines social scientific methods with qualitative analysis to produce a fundamentally new interpretation of modern art that will give readers a far deeper appreciation of the art of the past century and of today than is available elsewhere **From the Private Collections of Texas** Richard R. Brettell, 2009 This stunning catalogue documents and accompanies an exhibition held at the Kimbell Art Museum that represents the first comprehensive survey of the history of private art collecting in Texas **Paintings and the Past** Ivan Gaskell, 2019-05-13 This book is an exploration of how art specifically paintings in the European manner can be mobilized to make knowledge claims about the past No type of human made tangible thing makes more complex and bewildering demands in this respect than paintings Ivan Gaskell argues that the search for pictorial meaning in paintings yields limited results and should be replaced by attempts to define the point of such things which is cumulative and ever subject to change He shows that while it is not possible to define what art is other than being an open kind it is possible to define what a painting is as a species of drawing regardless of whether that painting is an artwork or not at any given time The book demonstrates that things can be artworks on some occasions but not necessarily on others though it is easier for a thing to acquire artwork status than to lose it That is the movement of a thing into and out of the artworld is not symmetrical All such considerations are properly matters not of ontology what is and what is not an artwork but of use that is how a thing might or might not function as an artwork under any given circumstances These considerations necessarily affect the approach to paintings that at any given time might be able to function as an artwork or might not be able to function as such Only by taking these factors into

account can anyone make viable knowledge about the past This lively discussion ranges over innumerable examples of paintings from Rembrandt to Rothko as well as plenty of far less familiar material from contemporary Catholic devotional works to the Chinese avant garde Its aim is to enhance philosophical acuity in respect of the analysis of paintings and to increase their amenability to philosophically satisfying historical use Paintings and the Past is a must read for all advanced students and scholars concerned with philosophy of art aesthetics historical method and art history I'd Rather Be Reading Guinevere de la Mare,2017-08-15 A compendium of delightful essays poems photos quotations and illustrations for book lovers For anyone who d rather be reading than doing just about anything else this ebook is the ultimate must have In this visual ode to all things bookish readers will get lost in page after page of beautiful contemporary art photography and illustrations depicting the pleasures of books Artwork from the likes of Jane Mount Lisa Congdon Julia Rothman and Sophie Blackall is interwoven with text from essayist Maura Kelly bestselling author Gretchen Rubin and award winning author and independent bookstore owner Ann Patchett Rounded out with poems quotations and aphorisms celebrating the joys of reading this lovingly curated compendium is a love letter to all things literary and the perfect thing for bookworms everywhere **The Aesthetic Mind** Elisabeth Schellekens,Peter Goldie,2011-10-13 The Aesthetic Mind breaks new ground in bringing together empirical sciences and philosophy to enhance our understanding of art and the aesthetic An eminent international team of experts explores the roles of emotion imagination empathy and beauty in this realm of human experience discussing visual and literary art music and dance **Transnational American Memories** Udo J.
