Mondrian Studies:

Mondrian Studies Kermit Swiler Champa, 1985 **Mondrian Flowers** David Shapiro, 1991 With 57 full color plates this book reveals a side of the great Dutch born abstract painter Piet Mondrian rarely seen In delicate portraits of roses lilies amaryllis chrysantheums and sunflowers Mondrian proves that he ranks with Georgia O Keeffe as one of this century s most gifted painters of flowers 75 illustrations 57 in full color *Mondrian's Philosophy of Visual Rhythm* Eiichi Tosaki, 2017-11-15 This volume investigates the meaning of visual rhythm through Piet Mondrian s unique approach to understanding rhythm in the compositional structure of painting drawing reference from philosophy aesthetics and Zen culture Its innovation lies in its reappraisal of a forgotten definition of rhythm as stasis or composition which can be traced back to ancient Greek thought This conception of rhythm the book argues can be demonstrated in terms of pictorial strategy through analysis of East Asian painting and calligraphy with which Greek thought on rhythm has identifiable commonalities The book demonstrates how these ideas about rhythm draw together various threads of intellectual development in the visual arts that cross disparate aesthetic cultural practices As an icon of early 20th Century Modernism Mondrian s neoplasticism is a serious painterly and philosophical achievement In his painting Mondrian was deeply influenced by Theosophy which took its influence from Eastern aesthetics particularly East Asian and Indian thought However Mondrian s approach to visual rhythm was so idiosyncratic that his contribution to studies of visual rhythm is often under recognized This volume shows that a close inspection of Mondrian s own writing thinking and painting has much to tell scholars about how to understand a long forgotten aspect of visual rhythm Rodin s famous criticism of photography athlete in motion is forever frozen can be applied to Muybridge s zoopraxiscope the Futurists rendition of stroboscopic images and Duchamp s *Nude Descending a Staircase* Through a comparative study between Mondrian s painting and these seminal works this volume initiates a new convention for the cognition of the surface of painting as visual rhythm Mondrian s simultaneous emphasis on the static and the rhythmic is hardly fodder for a publicist Eiichi Tosaki has taken on the challenge of elucidating Mondrian s theories of rhythm and particularly his conception of static rhythm The result is a tour de force that will forever alter the reader s encounter with the works of Mondrian Prof Kathleen Higgins *The Truthful and the Good* J.J. Drummond, J.G. Hart, 2013-12-11 This volume was occasioned by the desire of its contributors to honor Robert Sokolowski on his sixtieth birthday The desire first took form on the streets of an American metropolis when several of us while attending a philosophy conference were bemoaning the lack of passion for doing philosophy as we all conceived it In this expression of our discontent we all had a common exemplar in mind someone for whom the passion for the truthful and the good is embodied in every sentence of his rich writings Felicitously this very thinker was someone whom we can regard as manifesting in his person and life these same properties which his writings exhibit and pursue as luminous ideals As a result John Brough John Drummond and I came up with the idea that we hold our own conference and do philosophy as we envisage it and at the

same time honor its foremost exemplary practitioner whose sixtieth birthday was the following year Immediately the idea took wings among the handful of us and the dreariness of that philosophy congress receded The first task of thinking of possible speakers was easy The issue of the venue for our symposium what I like to call the Sokofest had to be decided as well as the details of its realization

Aesthetic Science Arthur P. Shimamura, Stephen E. Palmer, 2012-01-02 What do we do when we view a work of art What does it mean to have an aesthetic experience Are such experiences purely in the eye of the beholder This book addresses the nature of aesthetic experience from the perspectives of philosophy psychology and neuroscience

Historical Dictionary of the Netherlands Joop W. Koopmans, Arend H. Huussen Jr., 2007-05-22 The Netherlands frequently but erroneously called Holland is one of the most densely populated countries in the world In the past few decades it has been undergoing many transformations made possible by its dynamic and fast moving political landscape It has shifted from fierce nationalism toward a self image of tolerance and permissiveness the national identity and self consciousness has slowly eroded through decolonization and immigration Unfortunately several murders of prominent controversial politicians have started yet another shift away from tolerance and economic stagnation has bred pessimism Nonetheless despite many trials and tribulations there has been real progress and the Dutch have perhaps done a better job of coming to terms with their limitations than many others in the world The second edition of the Historical Dictionary of the Netherlands contains more

than 700 cross referenced dictionary entries on individual topics spanning the Netherlands political economic and social system along with short biographies on important figures who have shaped the Netherlands history Supplementing the entries are a list of acronyms and abbreviations a chronology an introduction appendixes and a bibliography making this a superb quick reference on the Netherlands

Levenson, 2000-01-01 This prize winning book offers the only comprehensive discussion available on materials techniques and condition issues in Western easel paintings from medieval times to the present An essential handbook for the pro and also a beautifully illustrated primer for the layperson Kirsh and Levenson teach the most valuable lessons about painting of all how meanings material and techniques are bound up together John Walsh former director J Paul Getty Museum Every element of Kirsh and Levenson s book is smart concise and informative It is the essential book on its subject Kenneth Baker San Francisco Examiner Chronicle A long overdue book with direct relevance for modern students of the history of art Libby Sheldon Burlington Magazine

Faith in Art Joseph Masheck, 2023-06-15 Metaphysical thought has been excluded from much of the discourse on modern art especially abstract painting By connecting ideas about faith with the initiators of abstract painting Joseph Masheck reveals how an underlying religiosity informed some of our most important abstract painters Covering Wassily Kandinsky Kazimir Malevich Piet Mondrian and El Lissitzky Masheck shows how revealed religion has been an underlying but fundamental determinant of the thinking and practice of abstract painting from its very originators He contextualizes their art within some of the historical moments of the early 20th century including the Russian revolution and the Stalinist period and explores the appeal of certain themes such as the Passion of Christ A radical new theorization of the influence of religion over visual art Faith in Art asks why metaphysics has been eliminated from the discussion where it might have something to say This is a new way of thinking about a hundred years of abstract painting

Handbook of the Theosophical Current Olav Hammer, Mikael Rothstein, 2013-01-09 This title represents pioneering research into an important but under researched current The three sections in the book are devoted to the Theosophical Society Theosophically influenced religious currents and the interaction between Theosophy and surrounding culture

publication is a valuable reference for philosophers and architects wanting to study further the philosophy and practice of architecture The Aesthete in the City: The Philosophy and Practice of American Abstract Painting in the 1980s ,1994

Alchemy in Contemporary Art Urszula Szulakowska,2017-07-05 Alchemy in Contemporary Art analyzes the manner in which twentieth century artists beginning with French Surrealists of the 1920s have appropriated concepts and imagery from the western alchemical tradition This study examines artistic production from c 1920 to the present with an emphasis on the 1970s to 2000 discussing familiar names such as Andre Breton Salvador Dali Yves Klein Joseph Beuys and Anselm Kiefer as well as many little known artists of the later twentieth century It provides a critical overview of the alchemical tradition in twentieth century art and of the use of occultist imagery as a code for political discourse and polemical engagement The study is the first to examine the influence of alchemy and the Surrealist tradition on Australian as well as on Eastern European and Mexican art In addition the text considers the manner in which women artists such as Leonora Carrington Remedios Varo and Rebecca Horn have critically revised the traditional sexist imagery of alchemy and occultism for their own feminist purposes *The Language of Displayed Art* Michael O'Toole,1994 Drawing on his background as a linguist O Toole analyses in detail a number of major works of art to show how the semiotic approach relates a work s immediate impact to other aspects of our response to it to the scene portrayed to the social intellectual and economic world within which the artist and his or her patrons worked and to our own world It further provides ways of talking about and interrelating aspects of composition technique and the material qualities of the work Naturalized Aesthetics Richard A. Richards,2022-06-29 This book bridges the gap between the many insights into art provided by research in evolutionary theory psychology and neuroscience and those enduring normative issues best addressed by philosophy The sciences have helped us understand how art functions our art preferences and the neurological systems underlying our engagement with art But we continue to rely on philosophy to tell us what is truly good in art how we should engage with art and the conceptual basis for this engagement Naturalized Aesthetics A Scientific Framework for the Philosophy of Art integrates a systematic and comprehensive naturalism grounded in the sciences with an ecology of art It shows how the environments in which we make and experience art our engineered art niches affect the practice and experience of art and generate normativity the goods and the shoulds in our engagement with art There are in effect two streams of normativity according to this book a niche dependent social impersonal and objective stream and a niche independent individual personal and subjective stream Recognition of these two streams allows us to make progress in long standing and unresolved philosophical disputes about how to interpret evaluate and conceive art Key Features Provides a structured and critical introduction to the scientific accounts of art based on evolutionary thinking psychology and neuroscience Develops an ecology of art based on the insight that we engage with art in engineered niches Presents a naturalistic account of normativity based on the recognition of two streams a niche dependent social impersonal and objective stream and a niche independent individual

personal and subjective stream Serves as an introduction and critical analysis of the debates about the interpretation evaluation and definitions of art **Humanities** ,1986 **Twelve Views of Manet's Bar** Bradford Collins,2021-01-12 Bradford Collins has assembled here a collection of twelve essays that demonstrates through the interpretation of a single work of art the abundance and complexity of methodological approaches now available to art historians Focusing on Manet's A Bar at the Folies Berg re each contributor applies to it a different methodology ranging from the more traditional to the newer including feminism Marxism Lacanian psychoanalysis and semiotics By demonstrating the ways that individual practitioners actually apply the various methodological insights that inform their research Twelve Views of Manet's Bar serves as an excellent introduction to critical methodology as well as a provocative overview for those already familiar with the current discourse of art history In the process of gaining new insight into Manet's work and into the discourse of methodology one discovers that it is not only the individual painting but art history itself that is under investigation An introduction by Richard Shiff sets the background with a brief history of Manet scholarship and suggestions as to why today's accounts have taken certain distinct directions The contributors selected to provide a broad and balanced range of methodological approaches include Carol Armstrong Albert Boime David Carrier Kermit Champa Bradford R Collins Michael Paul Driskel Jack Flam Tag Gronberg James D Herbert John House Steven Z Levine and Griselda Pollock **Invisible, but how? The depth of unconscious processing as inferred from different suppression techniques.** Julien Dubois, Nathan Faivre,2015-02-09 To what level are invisible stimuli processed by the brain in the absence of conscious awareness It is widely accepted that simple visual properties of invisible stimuli are processed however the existence of higher level unconscious processing e g involving semantic or executive functions remains a matter of debate Several methodological factors may underlie the discrepancies found in the literature such as different levels of conservativeness in the definition of unconscious or different dependent measures of unconscious processing In this research topic we are particularly interested in yet another factor inherent differences in the amount of information let through by different suppression techniques In the same conditions of well controlled conservatively established invisibility can we show that some of the techniques in the psychophysical magic arsenal e g masking but also visual crowding attentional blink etc reliably lead to higher level unconscious processing than others e g interocular suppression Some authors have started investigating this question using multiple techniques in similar settings We argue that this approach should be extended and refined Indeed in order to delineate the frontiers of the unconscious mind using a contrastive method one has to disentangle the limits attributable to unawareness itself and those attributable to the technique inducing unawareness The scope of this research topic is to provide a platform for scientists to contribute insights and further experiments addressing this fundamental question

Paradata and Transparency in Virtual Heritage Anna Bentkowska-Kafel,Hugh Denard,2016-05-13 Computer Generated Images CGIs are widely used and accepted in the world of entertainment but the use of the very same

visualization techniques in academic research in the Arts and Humanities remains controversial The techniques and conceptual perspectives on heritage visualization are a subject of an ongoing interdisciplinary debate By demonstrating scholarly excellence and best technical practice in this area this volume is concerned with the challenge of providing intellectual transparency and accountability in visualization based historical research Addressing a range of cognitive and technological challenges the authors make a strong case for a wider recognition of three dimensional visualization as a constructive intellectual process and valid methodology for historical research and its communication Intellectual transparency of visualization based research the pervading theme of this volume is addressed from different perspectives reflecting the theory and practice of respective disciplines The contributors archaeologists cultural historians computer scientists and ICT practitioners emphasize the importance of reliable tools in particular documenting the process of interpretation of historical material and hypotheses that arise in the course of research The discussion of this issue refers to all aspects of the intellectual content of visualization and is centred around the concept of paradata Paradata document interpretative processes so that a degree of reliability of visualization outcomes can be understood The disadvantages of not providing this kind of intellectual transparency in the communication of historical content may result in visual products that only convey a small percentage of the knowledge that they embody thus making research findings not susceptible to peer review and rendering them closed to further discussion It is argued therefore that paradata should be recorded alongside more tangible outcomes of research preferably as an integral part of virtual models and sustained beyond the life span of the technology that underpins visualization
