Color in the Age of Impressionism Laura Anne Kalba, 2017-04-21 This study analyzes the impact of color making technologies on the visual culture of nineteenth century France from the early commercialization of synthetic dyes to the Lumière brothers' perfection of the autochrome color photography process Focusing on Impressionist art Laura Anne Kalba examines the importance of dyes produced in the second half of the nineteenth century to the vision of artists such as Edgar Degas Pierre Auguste Renoir and Claude Monet The proliferation of vibrant new colors in France during this time challenged popular understandings of realism abstraction and fantasy in the realms of fine art and popular culture More than simply adding a touch of spectacle to everyday life Kalba shows these bright varied colors came to define the development of a consumer culture increasingly based on the sensual appeal of color Impressionism emerging at a time when inexpensively produced color functioned as one of the principal means by and through which people understood modes of visual perception and signification mirrored and mediated this

change shaping the ways in which people made sense of both modern life and modern art Demonstrating the central importance of color history and technologies to the study of visuality Color in the Age of Impressionism adds a dynamic new layer to our understanding of visual and material culture

Computer Security - ESORICS 2024 Joaquin Garcia-Alfaro, Rafał Kozik, Michał Choraś, Sokratis Katsikas, 2024-09-04 This four volume set LNCS 14982 14983 14984 14985 constitutes the refereed proceedings of the 29th European Symposium on Research in Computer Security

ESORICS 2024 held in Bydgoszcz Poland during September 16-20, 2024. The 86 full papers presented in these proceedings were carefully reviewed and selected from 535 submissions. They were organized in topical sections as follows: Part I Security and Machine Learning; Part II Network, Web, Hardware and Cloud, Privacy and Personal Data Protection; Part III Software and Systems Security Applied Cryptography; Part IV Attacks and Defenses; Miscellaneous. Truth in Serial Form Malika Maskarinec, 2023-04-27. This volume has its starting point in the veritable explosion of serialized formats in all of forms representation from painting to printing beginning in the mid nineteenth century and the well known fascination with series in biology, mathematics, music, art or literature. The new media culture of the late nineteenth century very much shaped by these serialized formats sees itself confronted with questions of truthfulness in new and profound ways just as perhaps the accelerated rhythm, anonymity and broadened accessibility of new media today have created new possibilities for the dissemination of misinformation and conversely give us cause to interrogate anew our notions of truthfulness. By examining both the formal operations of both aesthetic and scientific objects in a series form and the historical context of their publication or presentation, the contributions in this volume examine the often strained but yet immensely productive relationship between the way in which a series negotiates questions of truthfulness both by reference to the rules established in its series form or by means of its serial format. This volume provides ten detailed cases of the series form from the history of science and journalism and the history of painting, photography and literature as well. **Monet's Passion**, 1989. In this best selling book Elizabeth Murray discusses the development and maintenance of Claude Monet's Giverny estate as well as Monet's color theories, design elements and use of light and shade. Richly illustrated with Murray's lush photographs of the present day Giverny gardens, *Monet's Passion* also offers full color illustrations of the gardens drawn to scale and four Giverny based garden plans that can be executed anywhere. **Origins of Impressionism** Gary Tinterow, Henri Loyrette, 1994. This handsome publication which accompanies a major exhibition at The Metropolitan Museum of Art is a lively and engaging account of the artistic scene in Paris in the 1860s, the years that witnessed the beginnings of Impressionism. For the first time the interactions and relationships among the group of painters who became known as the Impressionists are examined without the overworn art historical polarities commonly evoked: academic versus avant garde, classicist versus romantic, realist versus impressionist. A host of strong personalities contributed to this history and their style evolved into a new way of looking at the world. These artists wanted above all to give an impression of truth and to have an impact on or even to shock the public. And they wanted to measure up to or surpass their elders. This complex and rich environment is presented here: the grand old men and the young Turks encounter each other, the Salon pontificates and the new generation moves fitfully ahead, benignly but always with determination. *Origins of Impressionism* gives a day by day, year by year study of the genesis of an epoch making style. Bibliographies and provenances are provided for each of the almost two hundred works in the exhibition and there is an illustrated chronology. With more than two hundred superb
