Money On The Run Canada And How The Worlds Dirty Profits Are Laundered:

Money Laundering in Canada Margaret E. Beare, 2007-06-09 Money laundering is the process of converting or transferring cash or other assets generated from illegal activity in order to conceal or disguise their origins In recent years the international community has decided that focusing on money laundering is an efficient strategy in policing organized crime and now terrorism To this end countries are encouraged to harmonize their policies and legislation and to some extent their policing strategies Before adopting these new strategies however it is important to understand the extent of money laundering in different jurisdictions as well as the likelihood of success and the costs involved in these anti laundering strategies This new work by Margaret E Beare and Stephen Schneider brings empirical evidence to the study of money laundering in Canada a topic that has recently assumed an international profile They challenge the seemingly common sense notion fueled by political posturing and policing rhetoric that taking the profits away from criminals is a rational law enforcement strategy Using data from police cases the inner working of financial institutions and the successful claims of privilege from our legal profession the final picture that the authors paint is of a good enforcement strategy run amuck amid conflicting interests and agendas an overly ambitious set of expectations and an ambiguous body of evidence as to the strategy s overall merits

Who Pays for Canada? E.A. Heaman, David Tough, 2020-09-17 Canadians can never not argue about taxes From the Chinese head tax to the Panama Papers from the National Policy to the Canada United States Mexico Agreement tax grievances always inspire private resentments and public debates But if resentment and debate persist the terms of the debate have continually altered

and adapted to reflect changing social economic and political conditions in Canada and the wider world The centenary of income tax is the occasion for Canadian scholars to wrestle with past and present debates about tax equity efficiency and justice Who Pays for Canada explores the different ways governments can and should tax their peoples and evaluates how well Canada has done so It brings together a diverse group of perspectives from academia law economics political science history geography philosophy and accountancy and from the wider world of activists and public servants It asks how Canada compares to other countries and how other countries especially the United States influence Canadian tax policies It also surveys internal tax tensions and politics through the lenses of region and jurisdiction as well as race class and gender Reasoning from tax perplexities and reforms in the past and the present it argues that fair taxation requires an informed populace and a democratically inclined public will Above all this book serves as a reminder that it is not only what counts as fair that is important but how fairness is evaluated Revealing how closely tax policy is tied to mainstream politics human rights and morality Who Pays for Canada represents new perspectives on a matter of tremendous national urgency
