*Stabilization policies in Greece in the context of modern macroeconomic theory* Karl Jürgen Numrich, Carl Walter Meyer,

Kurt Nagel, Volbert Alexander, George D. Demopoulos, 2019 **IMF Staff papers** International Monetary Fund. Research Dept., 1986-01-01 This paper examines how the effects of fiscal policies are transmitted internationally The analysis emphasizes that fiscal shifts of recent years constitute major disturbances to saving and investment flows An increase in a country's fiscal deficit corresponds to a higher level of public sector dissaving For increased foreign saving to enter through the capital account the current account deficit must rise via an appreciating real exchange rate An autonomous rise in investment such as that induced by US tax measures passed in 1981 1982 produces qualitatively similar effects in the short run Simulations suggest that a permanent fiscal deficit reduction of 1 percent of capacity output in any one of the three largest industrial countries produces a significant decline in real interest rates and a large initial depreciation in that country's currency US tax incentives for investment would induce higher interest rates and an appreciated dollar Simulations of the combined effects of increased US investment and observed movements in inflation adjusted deficits in all three countries in 1981 1985 suggest that substantial fractions of these interest and exchange rate movements were related to shifts in fiscal policy

Jackson, 1982-06-22 Western economic historians have traditionally concentrated on the success stories of major developed economies while development economists have given most of their attention to the problems of the Third World The authors of this pioneering work study a part of Europe neglected by both approaches Modernizing patterns in Balkan economic history are traced from the sixteenth century when the territory was shared by Ottoman and Habsburg empires through the nineteenth century when they emerged as independent states to the end of World War II and its aftermath Despite present differences in economic systems Greece's private market economy Yugoslavia's planned market economy and the centrally planned economies of Romania Bulgaria and Albania the authors find that shared origins and common subsequent experiences are ample justifications for treating the area as an economic unit *Balkan Economic History 1550 1950* will be a major case study for development economists and will provide historians with the first analytical and statistical study to survey the entire region from the start of the early modern period
