The Mongols Middle East Continuity and Transformation in Ilkhanid Iran offers a collection of academic articles that investigate different aspects of Mongol rule in 13th and 14th century Iran Sometimes treated only as part of the larger Mongol Empire the volume focuses on the Ilkhanate 1258 1335 with particular reference to its relations with its immediate neighbours It is divided into four parts looking at the establishment the internal and external dynamics of the realm and its end The different chapters covering several topics that have received little attention before aim to contribute to a better understanding of Mongol rule in the Middle East and its role in the broader medieval Eurasian world and its links with China With contributions by Reuven Amitai Michal Biran Bayarsaikhan Dashdondog Bruno De Nicola Florence Hodous Boris James Aptin Khanbaghi Judith Kolbas George Lane Timothy May Charles Melville Esther Ravalde Karin R hrantz *History of the Muslim World: The Mongol period* Bertold Spuler, 1994 A history of the Muslim world during the Mongol period The author offers a bird s eye view of both the Mongols and the countries with whom they came into contact and conflict including the Great Mongol Empire the Ilkhans in Persia the Russian Domination the Crimea and more **The Mongols and the Islamic World** Peter Jackson, 2017-01-01 The Ilkhanate from Teg der A mad to ljeit Muslim Ilkhans the Buddhists and the People of the Book Rash d al D n Islam and the Mongols The Islam of Ghazan his generals and his minister the view from outside EPILOGUE Legitimation by Chinggisid descent Allegiance to Mongol norms and institutions Turkicization The exodus of Muslims from the Mongol world The spread of Islam across Eurasia The movement of peoples and the emergence of new ethnicities The integration of Eurasia within a single disease zone the Black Death CONCLUSION APPENDIX 1 Glossary of Technical Terms APPENDIX 2 Genealogical Tables and Lists of Rulers NOTES BIBLIOGRAPHY INDEX **Introduction to the History of the Muslim East** Jean Sauvaget, 1965 **Jean Sauvaget's Introduction to the History of the Muslim East** Jean Sauvaget, Claude Cahen, 2023-11-15 This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1965 *The A to Z of the Crusades* Corliss K. Slack, 2009-07-24 During the late 11th through the early 14th centuries at least seven major expeditions were made between Western Europe and the Holy Land with the goal of ending Muslim control of Jerusalem Ultimately the crusaders were driven out but not before a cultural exchange had taken place that had an immense impact on Western Europe and an equally enormous albeit less positive impact on Arabs and the Islamic world Although the crusades occurred many centuries ago echoes still resound through the current clashes of nations and ideologies kidnappings for ransom assassinations and the declaring of jihad all

making the crusades an eminently timely subject This one volume overview provides an accessible reference work for scholars students and general readers on the period with numerous entries on key persons places events battles and sieges use of weapons and armor and the deeper issues of the political and cultural background Complete with a detailed chronology and a bibliography this work allows readers to learn how Europe was changed forever by these battles with Islam

The Muslim World Bertold Spuler,1960 **The Heirs of Archimedes** Brett D. Steele,Tamera Dorland,2005 Essays analyze the connections between science and technology and military power in the late medieval Renaissance and Enlightenment periods The integration of scientific knowledge and military power began long before the Manhattan Project In the third century BC Archimedes was renowned for his research in mechanics and mathematics as well as for his design and coordination of defensive siegecraft for Syracuse during the Second Punic War This collection of essays examines the emergence during the early modern era of mathematicians chemists and natural philosophers who along with military engineers navigators and artillery officers followed in the footsteps of Archimedes and synthesized scientific theory and military practice It is the first collaborative scholarly assessment of these early military scientific relationships which have been long neglected by scholars both in the history of science and technology and in military history From a historical perspective this volume investigates the deep connections between two central manifestations of Western power examining the military context of the Scientific Revolution and the scientific context of the Military Revolution Unlike the classic narratives of the Scientific Revolution that focus on the theories of and conflicts between Aristotelian and Platonic worldviews this volume highlights the emergence of the Archimedean ideal in which a symbiosis exists between the supply of mechanistic science and the demand for military capability From a security studies perspective this work presents an in depth study of the central components of military power as well as their dynamic interactions in the political acquisitional operational and tactical domains The essays in this volume reveal the intellectual and cultural struggles to enhance the capabilities of these components an exercise in transforming military power that remains relevant for today s armed forces The volume sets the stage by examining the innovation of gunpowder weaponry in both the Christian and the Islamic states of the late medieval and Renaissance eras It then explores such topics as the cultural resistance to scientific techniques and the relationship between early modern science and naval power particularly the intersecting developments in mathematics and oceanic navigation Other essays address the efforts of early practitioners and theorists of chemistry to increase the power and consistency of gunpowder The final essays analyze the application of advanced scientific knowledge and Enlightenment ideals to the military engineering and artillery organizations of the eighteenth century The volume concludes by noting the global spread of the Archimedean ideal during the nineteenth century as an essential means for resisting Western imperialism **Historical Dictionary of the Crusades** Corliss K. Slack,2013-05-09 The crusades were among the longest and most bitter wars in human history and consisted of no less than seven major expeditions from Western Europe

from the late 11th to the early 14th centuries for the purpose of wresting Jerusalem and the Holy Land from the control of the Muslims. In the end it was the Muslims who won and the Christians who suffered a major setback and the Middle East remained firmly in Muslim hands. This was one of the worst clashes between different religions and civilizations and for long it was largely forgotten or brushed over. That is no longer the case with many Muslims regarding Western interference in the region as a repeat of the crusades while launching their own jihads. So while an old conflict it is still with us today. Even at the time it was very hard to understand the causes and outcome of the crusades and that remains a problem today. This Historical Dictionary of the Crusades cannot claim to have resolved it but it most definitely does make the situation easier to understand. The introduction provides an overview tracing the crusades from one expedition to the next and assessing their impact. The actual flow of events is far easier to follow thanks to the chronology. And maps help to trace the events geographically. The entries and there are more than 300 of them in this second edition look more closely at notable figures including Pope Gregory VII, Richard the Lionhearted and Saladin as well as important places, Jerusalem, Constantinople and others, events, battles and sieges as well as the use of weapons and armor. The bibliography points to further reading.

Mapping the Chinese and Islamic Worlds Hyunhee Park, 2012-08-27. This book documents the relationship and wisdom of Asian cartographers in the Islamic and Chinese worlds before the Europeans arrived. *The Formation of Turkey* Claude Cahen, 2014-06-11. From Byzantium to the Mongols to the Sultans of Rum, this acclaimed book offers an important insight into the evocative history of Turkey before the coming of Ottoman power. Turkey forms a historical bridge between Europe and Asia and as such has played a pivotal role throughout history. The rise of Constantinople and the later Ottoman Empire are well known; less well understood are developments in the three centuries in between. What led to the decline of the Byzantine Empire and what happened in the intervening years before the rise of the Ottomans? Translated from the original French, this classic work examines the history of the Turkey that eventually gave rise to an imperial power whose influence spanned East and West.

The Muslim World, 1969 **Wolfhart Heinrichs' Essays and Articles on Arabic Literature** Hinrich Biesterfeldt, Alma Giese, 2024-05-30. Wolfhart Heinrichs' *Essays and Articles on Arabic Literature* General Issues Terms is the first of two volumes that showcase a great number of Heinrichs' writings on his central field of research: Arabic literature. This volume specifically looks at poetry and rhetoric and their indigenous theories and terminologies.

Wolfhart Heinrichs 1941-2014 was James Richard Jewett, Professor of Arabic at Harvard University. He is remembered as a significant adviser to Fuat Sezgin's *fundamental Geschichte des arabischen Schrifttums* as an editor of and contributor to the *Encyclopaedia of Islam*, Second edition, and most importantly as an author of many independent studies on Arabic literature, many of which were groundbreaking in the history of Arabic philology. He is also known for his studies on Semitic linguistics and Islamic jurisprudence. This volume collects relevant bibliographical data, offers an introductory essay on the author by his distinguished student Michael Cooperson, UCLA, and provides a selection of Wolfhart Heinrichs' essays. The articles in this

volume deal with general issues in the field that are central to pre modern Arab and Islamic culture and their concepts and terminologies An index of classical authors book titles and technical terms concludes the volume This volume and the accompanying volume will appeal to students and researchers in the field of Arabic and Islamic Studies and particularly to those interested in Arabic literature

Women in Mongol Iran Bruno De Nicola,2017-03-08 This book shows the development of women s status in the Mongol Empire from its original homeland in Mongolia up to the end of the Ilkhanate of Iran in 1335 Taking a thematic approach the chapters show a coherent progression of this development and contextualise the evolution of the role of women in medieval Mongol society The arrangement serves as a starting point from where to draw comparison with the status of Mongol women in the later period Exploring patterns of continuity and transformation in the status of these women in different periods of the Mongol Empire as it expanded westwards into the Islamic world the book offers a view on the transformation of a nomadic shamanist society from its original homeland in Mongolia to its settlement in the mostly sedentary Muslim Iran in the mid 13th century

Power, Politics, and Tradition in the Mongol Empire and the Ilkhānate of Iran Michael Hope (College teacher),2016 This study provides a new interpretation of how political authority was conceived and transmitted in the Early Mongol Empire 1227 1259 and its successor state in the Middle East the Ilkhanate 1258 1335 Authority within the Mongol Empire was intimately tied to the character of its founder Chinggis Khan whose reign served as an idealized model for the exercise of legitimate authority amongst his political successors Yet Chinggis Khan s legacy was interpreted differently by the various factions within his army In the years after his death two distinct political traditions emerged within the Mongol Empire the collegial and the patrimonialist Each of these streams represented the economic and political interests of different groups within the Mongol Empire respectively the military aristocracy and the central government The supporters of both streams claimed to adhere to the ideal of Chinggisid rule but their different statuses within the Mongol community led them to hold divergent views of what constituted legitimate political authority Michael Hope s study details the origin of and the differences between these two streams of tradition analyzing the role that these streams played in the political development of the Mongol Empire and the Ilkhanate and assessing the role that ideological tension between the two streams played in the events leading up to the division of the Ilkhanate Hope demonstrates that the policy and identity of both the Early Mongol Empire and the Ilkhanate were defined by the conflict between these competing streams of Chinggisid authority
