Mongolia In The Twentieth Century:

Mongolia in the Twentieth Century Stephen Kotkin, Bruce Allen Elleman, 2015-02-12 The remote vastness of Mongolia has remained somewhat of a mystery to most Westerners no less so in the 20th century Homeland of the legendary conqueror Chingiz Khan in modern times Mongolia itself has been the object of imperial rivalry For most of the 20th century it was under Soviet domination Mikhail Gorbachev began the withdrawal of Soviet troops from Mongolia in 1989 a process completed in 1992 By 1996 a coalition of opposition parties triumphed in national elections and Mongolia launched itself on a new course It is perhaps the most intriguing of the post community transition societies This volume examines Mongol history over the past century embracing not only Mongolia proper but also Mongol communities in Russia and China Contributions based on new archival research and the latest fieldwork are from the world's top experts in the field including four authors from Mongolia and others from Japan Russia Taiwan Great Britain and the United States Stephen Kotkin's introductory chapter is an overview of Mongol studies The essays in part 1 examine Sino Russian competition over Outer Mongolia Part 2 looks at international diplomacy in Mongolia including the role of Japan Part 3 focuses on contemporary issues ranging from economic and cultural change to emergent elites A concluding essay surveys Mongolian foreign policy

Revolutions in Asia Irina Y. Morozova, 2009-01-20 Contemporary Mongolia is often seen as one of the most open and democratic societies in Asia undergoing remarkable post socialist transformation Although the former ruling party the Mongolian People's Revolutionary Party the MPRP has fundamentally changed its platform it holds leadership and frames nation building policy This book re conceptualises the socialist legacy of Mongolia and explains why in the 1920s a shift to socialism became possible Furthermore the role of Mongolian nationalism in the country's decision to ally with the USSR in the 1920 1930s and to choose a democratic path of development at the end of the 1980s is explored Focusing on social systems in crisis periods when the most radical differentiation in social relationships and loyalties occur the book describes the transformation of the elite and social structures through the prism of the MPRP cadres policy and the party's

collaborations with the Third Communist International and other Soviet departments that operated in Mongolia Based on original sources from former Soviet and Mongolian archives the author offers a critique of the post modernist approaches to the study of identity and its impact on political change This book will be of interest to academics working on the modern history of Central and Inner Asia socialist societies and communist parties in Asia as well as the USSR s foreign policy

relevance of the term Eurasia as a concept in the global geopolitical and ethno cultural discourse It focuses on the contested meanings attached to the idea and traces its historical evolution and interpretations The volume examines the contours and characteristics of power politics in the Eurasian landscape by exploring the dynamics of the contending and competing interests that have come to occupy the region particularly in the aftermath of the disintegration of the Soviet Union It further examines the multiple narratives that define the socio political realities of the region and also the policies of the state actors involved by reflecting upon the multifaceted dimensions of the Eurasian issues These include nation building strategies identity ethnic conflicts security democratization globalization international migration climate change and energy extraction The geopolitical and civilizational aspects of Eurasianism in which Russia occupies a pivotal geo political place creates both opportunities and anxieties for other stakeholders in the region The book also holistically analyses the developmental dimensions of the post Soviet space and Eurasianism as a concept and political practice in domestic regional and global affairs The book also analyses the developmental dimensions of the post Soviet space and Eurasianism as a concept and political practice in domestic regional and global affairs

Reins of Liberation Xiaoyuan Liu, 2006 The author s purpose in writing this book is to use the Mongolian question to illuminate much larger issues of twentieth century Asian history how war revolution and great power rivalries induced or restrained the formation of nationhood and territoriality He thus continues the argument he made in *Frontier Passages* that on its way to building a communist state the CCP was confronted by a series of fundamental issues pertinent to China s transition to nation statehood The book s focus is on the Mongolian question which ran through Chinese politics in the first half of the twentieth century Between the Revolution of 1911 and the Communists triumph in 1949 the course of the Mongolian question best illustrates the genesis clashes and convergence of Chinese and Mongolian national identities and geopolitical visions
