Mongoose Snake Killers of the Animal Kingdom Meagunn Hart 4 16 The story of Rikki Tikki Tavi written by Rudyard Kipling and based on an Indian folktale features one of the fiercest killers in the animal kingdom the mongoose The main character is a loyal pet mongoose who saves his family from death at the hands of a pair of cobras For most people this story is their first and only exposure to these slender bodied bushy tailed and highly curious animals so there is much that people don't understand about them For instance many believe a mongoose's superpower is being immune to snake venom After all in the Kipling story the mongoose survives a visit to a cobra's den The reality is that while mongooses can tolerate quite a lot of snake venom they will die if they sustain enough bites Luckily mongooses have a fighting strategy that puts them mostly out of the reach of a snake's strike A mongoose will circle around the snake biting its tail and causing it to repeatedly strike in defense Eventually the snake wearies a situation that gives the mongoose a chance to deliver a final fatal blow to the back of the snake's head In this way mongooses win around 80 percent of their fights with snakes even against the most dangerous kinds 4 17 The mongoose's reputation as a capable killer has made it a popular companion animal for centuries since they keep their owners safe and their owners property pest free They were held in great regard by ancient Egyptians for daring to eat the eggs of crocodiles Like the Egyptians other groups throughout history have seen mongooses as lucky or even sacred Deciding to capitalize on the mongoose's skills farmers in Hawaii and the West Indies imported the animal during the 1890s to help eliminate rats from their sugarcane fields There were two major problems with this plan unlike rats mongooses are active during the day and they will generally eat whatever prey is easiest to find and kill On these islands the easiest sources of prey were the native bird and reptile populations This resulted in the mongooses harming sea turtles and causing ground nesting birds in Jamaica to go extinct Due to the damage they can bring about keeping mongooses is now illegal in the United States and several other countries Though they threaten animals in places where they've been

introduced mongooses are themselves threatened in their native habitats because of farming and land development It seems even such fierce killers cannot withstand the force that is humankind News Report Cambodia s Angkor Wat Bans Elephant Rides for Tourists Literature The 30 000 Bequest Plus Talk Showing That You Care 1 Comforting a Friend 2 Sharing Excitement 3 Expressing Concern 4 Calming Down a Coworker Psychology Your Cat s Purrsonality and You Topic Writing An Event Organizing Email CNN News The Difficulties of Providing Food for Astronauts on a Mission to Mars People Henry Golding Hollywood s Asian Heartthrob Dialogue Focus What s in Your Wardrobe Organizing Your Closet Animals Mongooses Snake Killers of the Animal Kingdom Debate Is Renting Really the Green Solution to Fast Fashion Writing Translation Practice Culture How to Impress as a Foreign Guest Reading Skill A Peek into Bhutan Environment Seeing through the Smog Understanding and Fighting Air Pollution

Kuwert,C. Merieux,H. Koprowski,K. Bögel,2012-12-06 Rabies as in former times is still today a major killer affecting man and animals especially in many tropical and sub tropical countries of Asia Africa and South America Some 50 000 people and literally millions of animals suffer and die of this disease each year This dramatic death toll and the enormous economic losses which ensue are nowadays un tolerable and no longer justified Worldwide strategy for Rabies control has been established and the World Health Organization recently formulated an elimination programme for dog Rabies Methods for wildlife Rabies control are also under way For the realisation of control campaigns careful epid emiological analysis is necessary This involves antigenical characterisation of Rabies Virus Strains using monoclonal antibodies observation of foci follow up of the front wave of the disease specific ecology of target populations and Rabies carrier species The financial point of view of such campaigns has of course to be ascertained It is for the first time ever that representatives and specialists of

different biological disciplines from nearly 70 countries have had the opportunity in Tunis to discuss these important issues and to evaluate on the basis of their own experimental results and personal epidemiological observations the possibility of ultimate elimination of Rabies in tropical and sub tropical countries and also to contribute their share for a better understanding of the natural history of this disease
