Computing and Monitoring in Anesthesia and Intensive Care Kazuyuki Ikeda, Matsuyuki Doi, Tomiei Kazama, Kazuo Sato, Tsutomu Oyama, 2012-12-06 In April of 1991 425 participants from 18 countries met in Hamamatsu in Japan for the 6th International Symposium on Computing in Anesthesia and Intensive Care ISCAIC The meeting was one of the most spectacular academic and fruitful in the history of ISCAIC We had four days of fascinating presentations and discussions covering many areas of technology in Anesthesia and intensive care New technologies were presented and old technology reexamined The measures of success of the meeting were the excellent research material in oral and poster presentations and state of the art reviews of the latest issues by distinguished worldwide key speakers It must be sure that the meeting was most effective to promote and disseminate up to date information in these fields across the participating countries The aim of this book is to record the exciting achievements of the meeting and extend them further among our colleagues We hope the readers of this book will share the same excitation as well as the latest information in this speciality Finally we would like to extend our deepest gratitude to all participants and others for the contribution to the compilation of this book Kazuyuki Ikeda M D

Central Nervous System Monitoring in Anesthesia and Intensive Care Jochen Schulte am Esch, Eberhard Kochs, 2012-12-06 Research in electrophysiologic monitoring in anesthesia and intensive care has focussed mostly on questions pertinent for patient care First how to quantitate drug effects on brain electrical activity and the degree of anesthetic induced suppression of the central nervous system Second how to monitor functional impairment following cerebral ischemia and hypoxia And third how to differentiate between drug induced effects on the central nervous system and deleterious events related to reductions in cerebral blood flow and or oxygen delivery Even though progress has been achieved over the last 10 years in this field and fascinating new techniques have been developed it is still not clear which monitor parameter will provide adequate information on the depth of anesthesia and the analgesic level Because the central nervous system has been one of the main research areas in our department over the last 10 years we organized a workshop to summarize the latest developments in central nervous system monitoring This book comprises the topics of this workshop and is intended to provide insight into the current status of central nervous system monitoring elucidating possible indications and delineating its limitations
