lives to service to God with an emphasis on the tension between the two basic modes of monastic life cenobitic and eremitic. It stresses the individual character of each Byzantine monastic community in contrast to the monastic orders of the Western medieval world and yet at the same time demonstrates that there were more connections between certain groups of monasteries than previously realized. The most original sections include an in depth analysis of the challenges facing hermits in the wilderness and special attention to enclosed monks, recluses and urban monks and nuns who lived independently outside of monastic complexes. Throughout Talbot highlights some of the distinctions between the monastic life of men and women and makes comparisons of Byzantine monasticism with its Western medieval counterpart.

The Oxford Handbook of the Merovingian World Bonnie Effros, Isabel Moreira, 2020. The Merovingian world has become more visible in Anglophone historical studies in the past two decades as attention to the social and economic networks of empires and modes of communication has begun to change older frameworks that viewed these centuries in terms of decline and characterized them as the Dark Ages. The Merovingian epoch witnessed something which we understand from the perspective of hindsight: a tilt to the middle ages. The forty six essays included in this volume thus highlight the vitality and importance of the Merovingian kingdoms in the fifth through eighth centuries. Rather than suggest that this was a chaotic and obscure interlude between the Fall of the Roman Empire and the Rise of the Carolingians and named for a dynasty with a reputation for few accomplishments and even fewer memorable kings, the essays demonstrate that the Merovingian era is an important field in its own right. The Handbook's contributors highlight recent research that moves beyond the political developments that were until recently the bread and butter of most historians and include many contributions based on material culture that shed new light on subjects that previously were inaccessible. They demonstrate that the Merovingian world was at the center of a wide ranging Merovingian empire of elites, peasants, economies and cultures and its story must be told through archaeology, bio archaeology, architecture, hagiographic literature, manuscripts, liturgy, visionary literature and eschatology, patristics, numismatics and material culture. In addition to mainland France, the essays encompass the geographic conduits of power, culture and trade that connected the Merovingian world with Anglo Saxon England, Ireland, Frisia, Spain, Italy, North Africa and the Byzantine Empire. This network empire of intersecting and often conflicting identities, political interests, religions, economies, patronage and cultures were intrinsically connected to contemporary developments not just among the Burgundians and Visigoths but among the Byzantines, Avars, Anglo Saxons, Frisians and the Irish, fields that were once viewed like the Merovingians themselves in isolation. These important developments reveal why the Merovingian period has attracted new audiences and why it will never be viewed as a backwater again.

Fraternal Relations in Monasteries Mikaela Sundberg, 2022-10-31. This is a book about the tensions between Christian ideals of love and the concrete realities of everyday monastic life. Based on a study of Cistercian monasteries in France, it develops a novel conceptualization of fraternal relations and addresses how monks and nuns strive to accomplish such relationships within their communities. By focusing on

the main interaction contexts of monasteries as a form of voluntary total institution the book shows how attempts to generate collective solidarity relate to other members as equals and avoid preferential relations conflict with practices of everyday life Although fraternal ideals are similar for monks and nuns the analysis reveals significant gender differences regarding the legitimacy of different forms of interaction and relationships as well as how to control them The book appeals to readers with an interest in total institutions sociology of religion sociology of friendship sociology of intimacy and also to scholars with an interest in theology of love and practical theology

Episcopal Visitation of Monasteries in the Thirteenth Century Christopher Robert Cheney,1983 **British Monachism; Or, Manners and Customs of the Monks and Nuns of England** Thomas Dudley Fosbroke,1802 **Monasticism in Eastern Europe and the Former Soviet Republics** Ines Angeli Murzaku,2015-08-27 This book looks at Eastern and Western monasticism s continuous and intensive interactions with society in Eastern Europe Russia and the Former Soviet Republics It discusses the role monastics played in fostering national identities as well as the potentiality of monasteries and religious orders to be vehicles of ecumenism and inter religious dialogue within and beyond national boundaries Using a country specific analysis the book highlights the monastic tradition and monastic establishments It addresses gaps in the academic study of religion in Eastern European and Russian historiography and looks at the role of monasticism as a cultural and national identity forming determinant in the region

In Truth Matthew Fraser,2020-03-27 From ancient Rome to the current Internet age this sweeping history of ideas explores how different epochs wrestled with the issue of truth and lies From the ancient Greeks and Romans to the modern era how have people determined what is true How have those with power and influence sought to control the narrative Are we living in a post truth era or is that notion simply the latest attempt to control the narrative The relationship between truth and power is the key theme Moving through major historical periods the author focuses on notable people and events from well known leaders like Julius Caesar and Adolf Hitler to lesser known individuals like Procopius and Savonarola He notes distinct parallels in history to current events Julius Caesar s publication of his Gallic Wars and Civil Wars was an early exercise in political spin not unlike what we see today During the English Civil War and the Enlightenment pamphleteering coupled with the new power of the printing press challenged the status quo as online and social media does in our time And fake news was already being used by German chancellor Otto von Bismarck in nineteenth century Europe and by the yellow journalism of American newspaper magnates William Randolph Hearst and Joseph Pulitzer near the turn of the twentieth century The author concludes optimistically noting that we are debating and discussing truth more fiercely today than in any previous era The determination to arrive at the truth despite the manipulations of the powerful bodes well for the future of democracy The Evangelical Dictionary of World Religions H. Wayne House,2019-02-19 With all of the different religions sects denominations and belief systems out there it can be difficult to separate the facts from mere opinion especially if one is relying solely on online sources which may or may not be vetted and which often have an ideological or political slant to

them How can we truly understand if we cannot even be sure we are getting the facts straight In this comprehensive resource more than 75 evangelical scholars offer a thoroughly researched guide to Christianity other world religions and alternative religious views including entries on movements theological terms and major historical figures Perfect for pastors students and anyone who wants ready access to information on today s religious landscape *Women and Religiosity in Orthodox Christianity* Ina Merdjanova,2021-11-02 *Women and Religiosity in Orthodox Christianity* fills a significant gap in the sociology of religious practice Studies focused on women s religiosity have overlooked Orthodox populations while studies of Orthodox practice operating within the dominant theological historical and sociological framework have remained gender blind The essays in this collection shed new light on the women who make up a considerable majority of the Orthodox population by engaging women s lifeworlds practices and experiences in relation to their religion in multiple varied localities discussing both contemporary and pre 1989 developments These contributions critically engage the pluralist and changing character of Orthodox institutional and social life by using feminist epistemologies and drawing on original ethnographic research to account for Orthodox women s previously ignored perspectives knowledges and experiences Combining the depth of ethnographic analysis with geographical breadth and employing a variety of research methodologies this book expands our understanding of Orthodox Christianity by examining Orthodox women of diverse backgrounds in different settings parishes monasteries and the secular spaces of everyday life and under shifting historical conditions and political regimes In defiance of claims that Orthodox Christianity is immutable and fixed in time these essays argue that continuity and transformation can be found harmoniously in social practices demographic trends and larger material contexts at the intersection between gender Orthodoxy and locality Contributors Kristin Aune Milica Bakic Hayden Maria Bucur Ketevan Gurchiani James Kapal Helena Kupari Ina Merdjanova Sarah Riccardi Swartz Eleni Sotiriou Tatiana Tiaynen Qadir Detelina Tocheva *Being a Buddhist Nun* Kim Gutschow,2009-07-01 This book is the first ethnography of Tibetan Buddhist society from the perspective of its nuns Gutschow lived for over three years among them collecting their stories observing them and studying their lives This picture of the little known culture provides valuable insight into the relationship between women and religion in South Asia today **Encyclopedia of Monasticism: A-L** William M.
