## **Monopoly Competition Their Regulation:**

Evolution of Competition Laws and Their Enforcement Pradeep S. Mehta, 2012 This edited volume identifies the various country specific factors that warrant changes in the design and implementation of competition laws The book covers case studies of nine countries of differing sizes and at varying stages of economic development that have at one stage or another repealed extant competition laws for new ones and seeks to examine the motivations and contexts under which this was done The countries examined include the Czech Republic Hungary India Ireland Poland Serbia South Africa Tanzania and the UK Tracing the evolution of competition regimes in the countries covered the book provides lessons for countries still in the process of forming their competition regimes The contributions show that the road to strong competition regimes is seldom smooth and that social economic and political factors in the country hugely impact on the pace and effectiveness of competition reforms The volume also addresses the issue of when the development of competition policies and laws can be seen to be in conflict with national development strategies

**Big Data and Competition Law** Alptekin

Koksal, 2023-11-13 Recent studies on competition law and digital markets reveal that accumulating personal information through data collection and acquisition methods benefits consumers considerably Free of charge fast and personalised services and products are offered to consumers online Collected data is now an indispensable part of online businesses to the point that a new economy a data driven sector has emerged Many markets such as the social network search engine online advertising and e commerce are regarded as data driven markets in which the utilisation of Big Data is a requisite for the success of operations However the accumulation and use of data brings competition law concerns as they contribute to

market power in the online world resulting in a few technology giants gaining unprecedented market power due to the Big Data accumulation indirect network effects and the creation of online ecosystems As technology giants have billions of consumers worldwide data driven markets are truly global In these data driven markets technology giants abuse their dominant positions but existing competition law tools seem ineffective in addressing market power and assessing abusive behaviour related to Big Data This book argues that a novel approach to the data driven sector must be developed through the application of competition law rules to address this It argues that current and potential conflicts can be mitigated by extending the competition law assessment beyond the current competition law tools to offer a modernised and unified approach to the Big Data related competition issues Promoting new legal tests for addressing the market power of technology giants and assessing abusive behaviour in data driven markets this book advocates for cooperation between competition and data protection authorities It will be of interest to students academics and practitioners with an interest in competition law and data protection
