Sagal,2022-08-18 To this day women face barriers in entering scientific professions and in earlier eras the challenges were greater still But in Botanical Entanglements Anna Sagal reveals how women s active participation in scientific discourses of the eighteenth century was enabled by the manipulation of social and cultural conventions that have typically been understood as limiting factors By taking advantage of the intersections between domesticity femininity and nature the writers and artists studied here laid claim to a specific authority on naturalist subjects ranging from botany to entomology to natural history more broadly Botanical Entanglements pairs studies of well known authors Eliza Haywood Charlotte Lennox Maria Edgeworth and Charlotte Smith with authors and artists who receive less attention in this context Priscilla Wakefield Maria Jacson Elizabeth Blackwell Henrietta Maria Moriarty and Mary Delany to offer a nuanced portrait of the diverse strategies women employed to engage in scientific labor Using socially acceptable forms of textual production including popular periodicals didactic texts novels illustrated works craftwork and poetry these women advocated for more substantive and meaningful engagement with the natural world In parallel the book also illuminates the emotional and physical intimacies between women plants and insects to reveal an early precursor to twenty first century theorizing of plant intelligence and human plant relationships Recognizing such literary and artistic entanglement facilitates a more profound understanding of the multifaceted relationship between women and the natural world in eighteenth century England *The Spaces and Places of Horror* Francesco Pascuzzi,Sandra Waters,2020-01-16 This volume explores the complex horizon of landscapes in horror film culture to better understand the use that the genre makes of settings locations spaces and places be they physical imagined or altogether imaginary In The Philosophy of Horror No 1 Carroll discusses the geography of

horror as often situating the filmic genre in liminal spaces as a means to displace the narrative away from commonly accepted social structures this use of space is meant to trigger the audience's innate fear of the unknown This notion recalls Freud's theorization of the uncanny as it is centered on recognizable locations outside of the Lacanian symbolic order In some instances a location may act as one of the describing characteristics of evil itself In *A Nightmare on Elm Street* teenagers fall asleep only to be dragged from their bedrooms into Freddy Krueger's labyrinthine lair an inescapable boiler room that enhances Freddie's powers and makes him invincible In other scenarios the action may take place in a distant little known country to isolate characters Roth's *Hostel* films or as a way to mythicize the very origin of evil Bava's *Black Sunday* Finally anxieties related to the encroaching presence of technology in our lives may give rise to postmodern narratives of loneliness and disconnect at the crossing between virtual and real places in Kurosawa's *Pulse* the internet acts as a gateway between the living and spirit worlds creating an oneiric realm where the living vanish and ghosts move to replace them This suggestive topic begs to be further investigated this volume represents a crucial addition to the scholarship on horror film culture by adopting a transnational comparative approach to the analysis of formal and narrative concerns specific to the genre by considering some of the most popular titles in horror film culture alongside lesser known works for which this anthology represents the first piece of relevant scholarship

Best Bear Buds Stephen T. McCullum, 2022-11-03 This is a children's fiction story that emphasizes creativity by using talking animals make believe plots and different settings that may go against reality It also portrays a sense of humor and adventure as many events involving a polar bear and a grizzly bear in this story are considered to be funny and intense moments A polar bear and a grizzly bear expressed hatred toward each other because of their differences and tried to build a rivalry between polar bears and grizzly bears A gray bear neutral placed both bears polar and grizzly in a dream that was real to them In the dream both bears had to put their differences aside and work together to be one of the winners of the animal survival race in order to save the lives of all bear species Their failure would be an old evil serpent's opportunity to come back to earth The message informs readers to accept all differences with love and without hate

Killer Carnivorous Plants Nathan Aaseng, 2018-12-15 Plants sit at the bottom of the food chain They provide meals for the vast majority of animals on earth but what if the food chain were upset Strange as it may sound there are places on virtually every continent where plants are the hunters and animals the hunted Some plants move so quickly that insects do not know what hit them Others lay elaborate traps to lure their prey Featuring stunning full color photographs informative sidebars and accessible text this book will fascinate young readers as it introduces them to real meat eating plants of the world

Covert Plants Prudence Gibson, Baylee Brits, 2018 *Covert Plants* contributes to newly emerging discourses on the implications of vegetal life for the arts and culture This stretches to changes in our perception of nature and to the adapting roles of botany evolutionary ecology and environmental aesthetics in the humanities Its editors and contributors seek various expressions of vegetal life rather than the mere representation of such and they

proceed from the conviction that a rigorous approach to thinking with and through vegetal life must be interdisciplinary At a time when urgent calls for restorative care and reparative action have been sounded for the environment this essay volume presents a range of academic and creative perspectives from evolutionary biology to literary theory philosophy to poetry which respond to the perplexing problems and paradoxes of vegetal thinking Representations of vegetal life often include plant analogies and plant imagery These representations have at times obscured the diversity of plant behavior and experience Covert Plants probes the implications of vegetal life for thought and how new plant science is changing our perception of the vegetal around us and in us How can we think speak and write about plant life without falling into human nature dyads or without tumbling into reductive theoretical notions about the always complex relations between cognition and action identity and value subject and object A full view of this shifting perspective requires a stereoscopic lens through which to view plants but also simultaneously to alter our human centered viewpoint Plants are no longer the passive object of contemplation but are increasingly resembling subjects stakeholders or actors As such the plant now makes unprecedented demands upon the nature of contemplation itself Moreover the aesthetic political and legal implications of new knowledge regarding plants ability to communicate sense and learn require intensive cross disciplinary investigation By doing this we can intervene into current attitudes to climate change and sustainability and hopefully revise for the better human philosophies ethics and aesthetics that touch upon plant life
